

**Similar Application for Shop and Services
within the Same "I(D)" Zone on the Kam Tin North Outline Zoning Plan**

Approved Application

	<u>Application No.</u>	<u>Proposed Uses</u>	<u>Date of Consideration (RNTPC/TPB)</u>	<u>Approval Conditions</u>
1	A/YL-KTN/573	Proposed Temporary Shop and Services (Retail Shop) for a Period of 3 Years	22.9.2017	(1), (2), (3)

Approval Conditions

- (1) Restriction on operation hours
- (2) The submission and implementation of fire service installations proposals
- (3) If any of the planning conditions is not complied with during the planning approval period/by a specified date, the approval hereby given shall cease to have effect and shall be revoked without further notice.

Advisory Clauses

- (a) resolve any land issue relating to the development with the concerned owner(s) of the Site;
- (b) note DLO/YL, LandsD's comments that the Site comprises 4 Old Schedule Agricultural Lots (OSAL) and an Old Schedule Mixed Lot. The OSALs are held under the Block Government Lease (BGL) which the OSAL contains the restriction that no structures are allowed to be erected without the prior approval of the Government. For the Old Schedule Mixed Lot No. 640 in D.D. 107 (House and Agricultural) held under the BGL, erection of building is allowed. However, should the development involve any rebuilding, application to his office for approval will be required. No permission is given for occupation of Government Land (GL) (about 243m² subject to verification) included in the Site. Attention is drawn to the fact that any occupation of GL without Government's prior approval is not allowed. The Site is accessible to San Tam Road via GL and private land. His office provides no maintenance work for the GL involved and does not guarantee any right-of-way to the Site. The lot owner(s) will need to apply to his office to permit the structures to be erected or regularize any irregularities on site. Furthermore, the applicant has to either exclude the GL portion from the Site or apply for a formal approval prior to the actual occupation of the GL portion. Such application(s) will be considered by LandsD acting in the capacity as landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application(s) is approved, it will be subject to such terms and conditions, including among others the payment of premium or fee, as may be imposed by the LandsD;
- (c) note C for T's comments that Site is connected to the public road network via a section of a local access road which is not managed by TD. The land status of the local access road should be checked with the LandsD. Moreover, the management and maintenance responsibilities of the local access road should be clarified with the relevant lands and maintenance authorities accordingly;
- (d) note CHE/NTW, HyD's comments that his department is not responsible for the maintenance of the village access road outside the Site. Adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains;
- (e) follow the relevant mitigation measures and requirements in the latest "Code of Practice on Handling the Environmental Aspects of Temporary Uses and Open Storage Sites" issued by the DEP;
- (f) note CBS/NTW, BD's comments that if the existing structures (not being a New Territories Exempted House) are erected on leased land without the approval of the BD, they are unauthorized building works (UBW) under the Buildings Ordinance (BO) and should not be designated for any proposed use under the application. For UBW erected on leased land, enforcement action may be taken by the BD to effect their removal in accordance with BD's enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO. Before any new building works (including containers/ open sheds as temporary buildings and land filling) are to be carried

out on the Site, prior approval and consent of the BD should be obtained, otherwise they are UBW. An Authorized Person should be appointed as the co-ordinator for the proposed building works in accordance with the BO. The Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations (B(P)R) respectively. If the Site does not abut on a specified street of not less than 4.5m wide, its permitted development intensity shall be determined under Regulation 19(3) of the B(P)R at the building plan submission stage;

- (g) note D of FS's comments that in consideration of the design/nature of the proposal, FSIs are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed FSIs to his department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy, and the location of where the proposed FSI to be installed should be clearly marked on the layout plans. The applicant is reminded that if the proposed structure(s) is required to comply with the BO (Cap. 123), detailed fire service requirements will be formulated upon receipt of formal submission of general building plans;
- (h) note CE/C, WSD's comments that for provision of water supply to the development, the applicant may need to extend his/her inside services to the nearest suitable government water mains for connection. The applicant shall resolve any land matter (such as private lots) associated with the provision of water supply and shall be responsible for the construction, operation and maintenance of the inside services within the private lots to WSD's standards; and
- (i) note DEMS's comments that in the interests of public safety and ensuring the continuity of electricity supply, the parties concerned with planning, designing, organizing and supervising any activity near the underground cable or overhead line under the application should approach the electricity supplier (i.e. CLP Power) for the requisition of cable plans (and overhead line alignment drawings, where applicable) to find out whether there is any underground cable and/or overhead line within and/or in the vicinity of the Site. They should also be reminded to observe the Electricity Supply Lines (Protection) Regulation and the 'Code of Practice on Working near Electricity Supply Lines' established under the Regulation when carrying out works in the vicinity of the electricity supply lines.
