Advisory Clauses

- (a) to note the comments of the District Lands Officer/Yuen Long, Lands Department (DLO/YL, LandsD) that:
- (i) the Site comprises Lot 1640 S.A (Part) in D.D. 114 held under Tai Po New Grant No. 2998 (demised for agricultural use);
 - (ii) the Site is accessible from Kam Sheung Road via Government Land (GL) and private land. His office provides no maintenance work for the GL involved and does not guarantee any right-of-way over the GL to the Site;
 - (iii) the Site falls within the Shek Kong Airfield Height Restriction Area (SKAHRA). The height of the proposed structures shall not exceed relevant airfield height limit within the SKAHRA; and
 - (iv) the lot owner(s) will need to apply to his office to permit the structures to be erected or regularize any irregularities on site, if any. Besides, given the proposed use is temporary in nature, only application for regularization or erection of temporary structure(s) will be considered. No construction of New Territories Exempted Building(s) will be considered or allowed. Applications for any of the above will be considered by LandsD acting in the capacity as landlord or lessor at its sole discretion and there is no guarantee that such application will be approved. If such application(s) is approved, it will be subject to such terms and conditions, including among others the payment of premium or fee, as may be imposed by LandsD.
- (b) to note the comments of the Commissioner for Transport (C for T) that the Site is connected to the public road network via a section of a local access road which is not managed by his department. The land status of the local access road should be checked with LandsD. Moreover, the management and maintenance responsibilities of the local access road should be clarified with the relevant lands and maintenance authorities accordingly.
- (c) to note the comments of the Chief Highway Engineer/New Territories West, Highways Department (CHE/NTW, HyD) that his department does not and will not maintain the access connecting the Site and Kam Sheung Road. Adequate drainage measures should be provided to prevent surface water running from the Site to the nearby public roads and drains.
- (d) to note the comments of the Director of Environmental Protection (DEP) to adopt the latest "Code of Practice on Handling the Environmental Aspects of Temporary uses and Open Storage Sites" issued by his department to minimize any potential environmental nuisances.
- (e) to note the comments of the Chief Engineer/Construction, Water Supplies Department (CE/C, WSD) that:

- (i) existing water mains within/near the Site will be affected. The cost of any necessary diversion shall be borne by the developer;
 - (ii) in case it is not feasible to divert the affected water mains, a waterworks reserve within 1.5m from the center line of the water mains shall be provided to WSD. No structure shall be built or materials stored within this waterworks reserve. Free access shall be made available at all time for staff of the Director of Water Supplies or their contractor to carry out construction, inspection, operation, maintenance and repair works;
 - (iii) no trees or shrubs with penetrating roots may be planted within the waterworks reserve or in the vicinity of the water mains; and
 - (iv) the Government shall not be liable to any damage whatsoever and howsoever caused arising from burst or leakage of the public water mains within and in close vicinity of the Site.
- (f) to note the comments of the Chief Building Surveyor/New Territories West, Buildings Department (CBS/NTW, BD) that:
- (i) before any new building works (including containers/open sheds as temporary buildings) are to be carried out on the Site, prior approval and consent of BD should be obtained, otherwise they are unauthorized building works (UBW) under the Buildings Ordinance (BO). An Authorized Person (AP) should be appointed as the coordinator for the proposed building works in accordance with the BO;
 - (ii) for UBW erected on leased land, enforcement action may be taken by BD to effect their removal in accordance with BD's enforcement policy against UBW as and when necessary. The granting of any planning approval should not be construed as an acceptance of any existing building works or UBW on the Site under the BO;
 - (iii) the Site shall be provided with means of obtaining access thereto from a street and emergency vehicular access in accordance with Regulations 5 and 41D of the Building (Planning) Regulations respectively; and
 - (iv) if the Site does not abut on a specified street of not less than 4.5m wide, its permitted development intensity shall be determined under Regulation 19(3) of the Building (Planning) Regulations at the building plan submission stage.
- (g) to note the comments of the Director of Fire Services (D of FS) that in consideration of the design/nature of the proposal, fire service installations are anticipated to be required. Therefore, the applicant is advised to submit relevant layout plans incorporated with the proposed fire service installations to his department for approval. The layout plans should be drawn to scale and depicted with dimensions and nature of occupancy. The location of where the proposed fire service installations to be installed should be clearly marked on the layout plans. The applicant is reminded that if the proposed structure(s) is required to comply with the BO, detailed fire service requirements will be formulated upon receipt of formal submission of general building plans.
