Application for Open Storage and Port Back-up Uses  
(TPB PG-No. 13E)**

1. On 17.10.2008, the Town Planning Board Guidelines for Application for Open Storage and Port Back-up Uses under Section 16 of the Town Planning Ordinance (TPB PG-No. 13E) were promulgated, which set out the following criteria for the various categories of area:
  - (a) Category 1 areas: favourable consideration will normally be given to applications within these areas, subject to no major adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments should be submitted if the proposed uses may cause significant environmental and traffic concerns;
  - (b) Category 2 areas: planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions. Technical assessments, where appropriate, should be submitted to demonstrate that the proposed uses would not have adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas;
  - (c) Category 3 areas: applications would normally not be favourably considered unless the applications are on sites with previous planning approvals. Sympathetic consideration may be given if the applicants have demonstrated genuine efforts in compliance with approval conditions of the previous planning applications and included in the fresh applications relevant technical assessments/proposals to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. Planning permission could be granted on a temporary basis up to a maximum period of 3 years, subject to no adverse departmental comments and local objections, or the concerns of the departments and local residents can be addressed through the implementation of approval conditions; and
  - (d) Category 4 areas: applications would normally be rejected except under exceptional circumstances. For applications on sites with previous planning approvals, and subject to no adverse departmental comments and local objections, sympathetic consideration may be given if the applicants have demonstrated genuine efforts in compliance with approval conditions of the previous planning applications and included in the applications relevant technical assessments/proposals to demonstrate that the proposed uses would not generate adverse drainage, traffic, visual, landscaping and environmental impacts on the surrounding areas. The intention is however to encourage the phasing out of such non-conforming uses as early as possible. A maximum period of 2 years may be allowed upon renewal of planning permission for an applicant to identify suitable sites for relocation. No further renewal of approval will be given unless under very exceptional circumstances and each application for renewal of approval will be assessed on its individual merit.

2. In assessing applications for open storage and port back-up uses, the other major relevant assessment criteria are also summarized as follows:
- (a) there will be a general presumption against development on sites of less than 1,000 m<sup>2</sup> for open storage uses and 2,000 m<sup>2</sup> for port back-up uses in rural areas, other than sites located in major corridors, industrial/godown/workshop areas, quarrying activities or where it is demonstrated that optimum use is made of the site. This is to prevent the further proliferation of small sites in rural areas, minimizing sprawl over countryside areas and reducing travel trips;
  - (b) port back-up sites and those types of open storage uses generating adverse noise, air pollution and visual intrusion and frequent heavy vehicle traffic should not be located adjacent to sensitive receivers such as residential dwellings, hospitals, schools and other community facilities;
  - (c) port back-up uses are major generators of traffic, with container trailer/tractor parks generating the highest traffic per unit area. In general, port back-up sites should have good access to the strategic road network, or be accessed by means of purpose built roads;
  - (d) adequate screening of the sites through landscaping and/or fencing should be provided where sites are located adjacent to public roads or are visible from surrounding residential areas;
  - (e) there is a general presumption against conversion of agricultural land and fish ponds to other uses on an ad hoc basis, particularly in flood prone areas or sites which would obstruct natural drainage channels and overland flow; and
  - (f) for applications involving sites with previous planning approvals, should there be no evidence to demonstrate that the applicants have made any genuine effort to comply with the approval conditions of the previous planning applications, planning permission may be refused, or a shorter compliance period for the approval conditions may be imposed, notwithstanding other criteria set out in the Guidelines are complied with.
