

2017年11月3日  
按照城市規劃條例第5條展出的  
核准圖編號 S/TM/33 的修訂  
AMENDMENTS TO APPROVED PLAN No. S/TM/33 EXHIBITED  
UNDER SECTION 5 OF THE TOWN PLANNING ORDINANCE ON  
3 NOVEMBER 2017

Fiona LUNG  
SECRETARY  
TOWN PLANNING BOARD

香港城市規劃委員會依據城市規劃條例擬備的屯門分區計劃大綱圖  
TOWN PLANNING ORDINANCE, HONG KONG TOWN PLANNING BOARD  
TUEN MUN - OUTLINE ZONING PLAN

圖則編號  
PLAN No. S/TM/34

SCALE 1:50,000 比例尺  
0 500 1000 METRES

**SCHEDULE OF AMENDMENTS TO  
THE APPROVED TUEN MUN OUTLINE ZONING PLAN NO. S/TM/33  
MADE BY THE TOWN PLANNING BOARD  
UNDER THE TOWN PLANNING ORDINANCE (Chapter 131)**

**I. Amendments to Matters shown on the Plan**

- Item A1 – Rezoning of a site to the north of Wu Shan Road, Tuen Mun Area 28 from “Green Belt” (“GB”) and “Government, Institution or Community” (“G/IC”) to “Residential (Group A)26” (“R(A)26”) with stipulation of building height restriction.
- Item A2 – Rezoning of a site abutting Wong Chu Road and adjoining Yip Wong Road, Tuen Mun Area 17 from “Open Space” (“O”), “G/IC”, “Other Specified Uses” (“OU”) annotated “Comprehensive Industrial Development with Ancillary Commercial and Community Facilities” and area shown as ‘Road’ to “R(A)26” with stipulation of building height restrictions.
- Item A3 – Rezoning of a site to the east of Tuen Hing Road, Tuen Mun Area 23 from “GB” and “Residential (Group B)10” (“R(B)10”) to “R(A)26” with stipulation of building height restriction.
- Item A4 – Rezoning of a site to the west of Nerine Cove, Tuen Mun Area 16 from “G/IC” to “R(A)26” with stipulation of building height restriction.
- Item A5 – Rezoning of a site to the north of Handsome Court, Tuen Mun Area 39 from “R(A)22”, “G/IC” and “GB” to “R(A)26” with stipulation of building height restriction.
- Item A6 – Rezoning of a small piece of land to the north of Handsome Court from “G/IC” to “GB”.
- Item B – Rezoning of a site to the south of Harrow International School Hong Kong, Tuen Mun Area 48 from “GB” and “R(B)” to “R(B)20” with stipulation of building height restriction.
- Item C – Rezoning of a site to the southeast of Chu Hai College of Higher Education, Tuen Mun Area 48 from “GB” to “G/IC” with stipulation of building height restriction.
- Item D1 – Rezoning of a site to the south of So Kwun Wat Road near Tuen Mun Road, Tuen Mun Area 56 from “Comprehensive Development Area” (“CDA”) to “CDA(3)” with stipulation of building height restriction.

- Item D2 – Rezoning of a site to the east of So Kwun Wat Road near Tuen Mun Road, Tuen Mun Area 55 from “O” to “G/IC(1)” with stipulation of building height restriction.
- Item E1 – Rezoning of an area in the western part of Wu Shan Recreation Playground and an existing road to the south of Sun Tuen Mun Centre, Tuen Mun Area 28 from “GB” to “O”.
- Item E2 – Rezoning of a site to the south of Tuen Hing Road, Tuen Mun Area 23 from “GB” to “OU” (Electricity Substation) with stipulation of building height restriction.
- Item F1 – Rezoning of a strip of land to the south of Harrow International School Hong Kong across Tuen Mun Road, Tuen Mun Area 48 from area shown as ‘Road’ to “R(B)15” with stipulation of building height restriction.
- Item F2 – Rezoning of a strip of land to the south of Harrow International School Hong Kong across Tuen Mun Road, Tuen Mun Area 48 from “R(B)15” to area shown as ‘Road’.
- Item F3 – Rezoning of a strip of land to the south of Harrow International School Hong Kong across Tuen Mun Road, Tuen Mun Area 48 from area shown as ‘Road’ to “R(B)14” with stipulation of building height restrictions.
- Item F4 – Rezoning of a strip of land to the south of Harrow International School Hong Kong across Tuen Mun Road, Tuen Mun Area 48 from “R(B)14” to area shown as ‘Road’.
- Item F5 – Rezoning of a site to the southeast of Harrow International School Hong Kong across Tuen Mun Road, Tuen Mun Area 48 from “GB” to “R(B)” with stipulation of building height restriction.

## **II. Amendments to the Notes of the Plan**

- (a) Revision to the Notes for the “Residential (Group A)” zone to reflect the planning intention of the “R(A)26” sub-area and to incorporate into the Remarks the development restrictions for the “R(A)26” sub-area.
- (b) Revision to the Remarks of the “Residential (Group B)” zone to incorporate updated development restrictions for the “R(B)14” and “R(B)15” sub-areas, and development restrictions for the “R(B)20” sub-area.
- (c) Revision to the Remarks of the “Comprehensive Development Area” zone to incorporate development restrictions for the “CDA(3)” sub-area.

- (d) Incorporation of a new set of Notes for the “G/IC(1)” zone.
- (e) Incorporation of ‘Art Studio (excluding those involving direct provision of services or goods)’ as a Column 1 use in Schedule II of the “OU” annotated “Business” zone and “Industrial” (“I”) zone, and corresponding amendment to replace ‘Place of Recreation, Sports or Culture’ use under Column 2 in the same schedule by ‘Place of Recreation, Sports or Culture (not elsewhere specified)’.
- (f) Revision to the Notes for the “I” zone to update the planning intention.

Town Planning Board

3 November 2017

**List of Representers in respect of  
the Draft Tuen Mun Outline Zoning Plan No. S/TM/34**

Representation No.	Name of 'Representer'
R1	Wong Chun Tak
R2	Name Illegible
R3	Ng Tin Lok

**Summary of Representations and Government Departments' Responses**

The major grounds and proposals of representation R1 to R921 and R923 to R4409 and R4412 as well as responses of Government departments are summarised below:

Major Grounds and Proposals of Representations	Responses of Government Departments
S1. More shops and eating places will be provided in the neighbourhood with the addition of population.	Noted.
S2. Wu Shan site (Item A1) should be used for subsidized housing development.	Noted. Housing type will be considered at detailed design stage.
S3. For Item C site, it is suggested that a lease condition be incorporated to require the future school at the site to open its facilities for public use into the lease.	Education Bureau (EDB) advises that the suggestion will be conveyed to the future operator to decide whether and if so which facilities to be opened up for public use in accordance with its operational needs.
<b>Adverse Representations and Representations Providing Views</b>	
<i>A. Comprehensive Planning and Housing Supply/ Mix</i>	
A1. There is no comprehensive planning for Tuen Mun. Population density is too high in the area. Capacity of road network, infrastructure, Government, Institution or Community (GIC) facilities, open space and other supporting facilities etc. has already overloaded. Quality of life of local residents will worsen as a result of the infill housing developments. The deficient facilities should be addressed first.	(i) Housing is one of the most important livelihood issues to be addressed by the Government. It was stated in the Policy Address that the Government would adopted a multi-pronged approach to identify suitable land to meet housing and other needs. To optimise the use of land, the Government has continued reviewing various land uses and rezoning sites as appropriate and, where the original intended use is no longer required, converting the land for housing development. The Government's land use reviews cover all districts in Hong Kong and not limited to Tuen Mun District. Amongst the total 210 sites identified for rezoning in the short to medium term, about <del>30</del> 20 sites (including the six housing sites under Items A1 to A5 and Item B) are in Tuen Mun District while the remaining distribute amongst the other 17 districts in Hong
A2. The document and assessments for supporting the rezoning did not comprehensively examine the overall impact on Tuen Mun with the addition of population arising from the rezoning and other planned developments in the area. The information contained in the document and assessments are biased/ misleading.	

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p data-bbox="1223 193 1301 228">Kong.</p> <p data-bbox="1160 268 2045 963">(ii) For the public housing sites (Item A1 to Item A5) under the draft Tuen Mun OZP No. S/TM/34, the Civil Engineering and Development Department (CEDD) has undertaken ‘Preliminary Development Review for Housing Sites at Tuen Mun Central – Feasibility Study’ (‘the Study’) to assess the impact on Tuen Mun arising from the proposed public housing on aspects like transport, environment, infrastructure, ecological, visual, air ventilation and landscape. The Study has taken into account the existing and planned developments and infrastructures in the district and concludes that there is no insurmountable technical problem for the proposed public housing developments in the Tuen Mun Central sites. As for the housing site in Tuen Mun East (Item B), the Government has also assessed the proposed development on traffic, sewerage, drainage, water supply, air ventilation, visual and landscape aspects. Relevant Government departments had been consulted and confirmed that there is no insurmountable technical problem for the proposed housing development in Tuen Mun East.</p> <p data-bbox="1160 1007 2045 1409">(iii) The existing and planned provision of GIC facilities and open space are generally adequate to meet the demand of the overall planned population of Tuen Mun in accordance with the requirements of Hong Kong Planning Standards and Guidelines (HKPSG) (<b>Annex X</b>). Planning Department (PlanD) will liaise with relevant bureaux/departments to review the GIC facilities and open space provision in the area from time to time. Follow-up action will be taken by PlanD if relevant bureaux/ departments request for sites for provision of GIC facilities. Housing Department (HD) will work with the concerned Government departments to provide suitable</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>supporting facilities for residents, including recreation, open space, community, social welfare, education and retail facilities in the proposed housing developments. HD will also consult Tuen Mun District Council (TMDC) on the latest position of the development schemes during the design stage.</p>
<p>A3. The Long Term Housing Strategy (LTHS) does not have information about the housing target of 460,000 flats for the next decade: such as geographical distribution of public and private housing, no. of people for each flat etc. It is also questionable how the private-public housing mix is derived. Reference should be made to the Housing Need and Demand Assessment in the UK, i.e. to conduct a detailed assessment on housing demand before searching land for housing developments</p>	<p>(i) According to LTHS, the Government updates the long term housing demand projection annually and presents a rolling ten-year housing supply target. Details on the housing demand projection for the ten-year period from 2018-19 to 2027-28 and the corresponding ten-year housing supply target of 460,000 units are set out in the LTHS Annual Progress Report 2017 – <a href="https://www.thb.gov.hk/eng/policy/housing/policy/lths/LTHS_Annual_Progress_Report_2017.pdf">https://www.thb.gov.hk/eng/policy/housing/policy/lths/LTHS_Annual_Progress_Report_2017.pdf</a></p> <p>(ii) For the above ten-year period, the Government has adopted a public/private split of 60:40 for the supply of new housing units (i.e. the public and private housing supply targets are 280,000 units and 180,000 units respectively). The key consideration is to underline the Government’s commitment in increasing public housing supply while ensuring the stable and healthy development of the private market.</p>
<p>A4. Increase in housing land supply is not effective to alleviate housing shortage. In the past years, the Government had focused on increase in land supply by rezoning. However, the property price is still going up and the shortage has not been resolved. Moreover, there is pitfall in policy on allocation of public housing resources.</p>	<p>(i) As committed in the Policy Address announced in October 2017, to increase land supply is a must, be it about people’s home ownership problems or improving their living conditions. Over the years, the Government has proposed many strategies for increasing land supply including reclamation outside the Victoria Harbour, and is actively pursuing New Development Area (NDA) projects, which cover brownfield sites such as Hung Shui Kiu NDA.</p>
<p>A5. According to the Census and Statistics Department, the number of residential flats was more than the number of household by 180,000</p>	

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>in 2004. The difference would increase to 250,000 after 10 years. The figures reflect that allocation of housing resources is the main issue of housing problem rather than insufficient residential units.</p>	<p>(ii) For the current rezoning exercises, five of the six housing sites under the current rezoning are for public housing development. As advised by HD, the public housing demand is acute. As at end-March 2018, there were about 153,300 general applications for public rental housing, and about 119,000 non-elderly one-person applications under the Quota and Points System. The average waiting time for general applicant is 5.1 years. Based on the latest projection under the Long Term Housing Strategy Annual Progress Report 2017, the Government's public housing target is 280,000 units for the ten-year period from 2018-19 to 2027-28, and the split between public rental housing and subsidised sale flat is 200,000 and 80,000 units respectively. As of December 2017, assuming that all sites identified can be smoothly delivered on time for housing developments, the Government has identified land for the construction of about 247,000 public housing units for the ten-year period from 2018-19 to 2027-28. This lags behind the ten year supply target of 280,000 units. For this reason, HD is in dire need of sufficient land for public housing development to meet the LTHS's public housing supply target and there is a genuine need to use the five public housing sites for public housing purpose.</p>
<p>A6. The Government should consider other land resources/ alternatives for housing developments, such as brownfield sites, golf course in Fanling, idle military camp, sites being used as private club, sites in Hong Kong Island, sites at the periphery of country parks, vacant school sites, agricultural land owned by private developers, the sites at Kai Tak and reclamation etc. Besides, there are plenty of sites within Tuen Mun for development, including vacant Government land available for rent of about 321,724m<sup>2</sup>, "Village Type Development" zone, Government sites and "Comprehensive Development Area" zone of about 66,835m<sup>2</sup>, as well as reserved</p>	<p>(i) Over the years, the Government has adopted multi-pronged approach for increasing land supply, including reclamation outside the Victoria Harbour, intensification of the development potential of sites in urban area and is actively pursuing New Development Area (NDA) projects which cover brownfield sites such as Hung Shui Kiu NDA. Notwithstanding these efforts, the Government still needs to continue taking forward other land supply measures for meeting the housing and other development needs. The most immediate and effective way to augment housing land supply in the short to</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>sites for HD of about 11,140m<sup>2</sup>. The Government is wasting land resource.</p>	<p>medium term is to make more optimal use of the developed areas in the existing urban areas and new towns, as well as nearby land in the vicinity of existing infrastructure.</p> <p>(ii) Regarding the other land resources/ alternative sites suggested by some representers, most of them are not available for development in the near future because they are either private land, currently occupied by existing government facilities under operation, pending comprehensive land use review, or already committed for other uses.</p> <p>(iii) Notwithstanding the above, it has always been Housing Authority's intention to consider any suitable sites across the territory for public housing development. If suitable land is identified, the Government will need to complete all procedures, which include conducting technical feasibility studies, carrying out public consultation, rezoning, seeking funding approval from Legislative Council (LegCo) and executing relevant works etc.</p>
<p>A7. There are alternative sites in Tuen Mun that can be used for housing developments, including the bus depot in Area 16, the site opposite to Waldorf Garden across Castle Peak Road, Tuen Mun Golf Centre and Archery Range, the site opposite to Goodview Garden, the empty market near Primeview Garden, Liu Yuen (柳園), the knoll near Tin Hau Temple and various government land currently under short term tenancy (STT) and temporary vacant government sites available for greening/ community uses etc.</p>	<p>The alternative sites suggested by representers (<b>Plans H-6a, H-6b and H-7</b>) are not suitable/available for development because they are either currently occupied by existing government facilities, already committed for other uses, subject to development constraints or privately owned.</p>
<p>A8. The Government should stop land sale to address the acute shortage of public housing flats.</p>	<p>There is an imminent need for both public and private housing. The sites on the land sale programme are to meet the demand for private housing.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>A9. The rezoning of “Green Belt” (“GB”) sites for housing developments will set an undesirable precedent. The Government has rezoned many “GB” sites for housing developments since 2014 without any Environmental Assessment for assessing the overall impact on Hong Kong. The consequential ecological impact is uncertain.</p>	<p>(i) Response (i) to Ground A6 is relevant.</p> <p>(ii) Under Government’s multi-pronged approach to increase land supply with a view to meeting housing and other development needs, “GB” sites close to developed areas or public roads, which have relatively less buffering effect and lower conservation value, and close to supporting infrastructure facilities, such as transport, water supply and sewerage, would be reviewed for housing purpose.</p> <p>(iii) In considering if the “GB” sites are suitable for development, concerned Government departments will examine if the development would bring about significant adverse impacts on the surroundings and if necessary, technical assessments would be carried out to ascertain these impacts and devise mitigating measures to minimize the potential impacts. Relevant considerations including transport and infrastructure capacity, provision of community facilities and open space, appropriate development restrictions, local character and existing development intensity, potential environmental, visual and air ventilation impacts etc. have been taken into account in the “GB” review. Based on the above and in consideration of the assessments conducted, the sites involving “GB” under the proposed amendments are identified as suitable for housing development.</p> <p>(iv) Since 2014, the area zoned “GB” on the Tuen Mun OZP has been reduced by about 1.7% from about 745 ha to about 732 ha due to rezoning of the sites for housing developments. The amendments will not affect the overall integrity of the “GB” zone or jeopardize its function to contain urban sprawl.</p>
<p>A10. The “GB”, “G/IC” and “Open Space” (“O”) sites proposed for</p>	<p>(i) On the concern about “GB” zone, responses (ii), (iii) and (iv) to</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
rezoning for housing development are lost without compensation in the current rezoning exercise.	Ground A9 are relevant.  (ii) As for the concern about “G/IC” and “O” zone, response (iii) to Grounds A1 and A2 are relevant.
A11. There are about 130,000 residents in Tuen Mun that work in other districts. There are insufficient job opportunities in Tuen Mun. Land should be reserved for commercial use in order to create job opportunities in the area.	The supporting commercial and community facilities associated with the proposed public housing developments would generate new job opportunities. No commercial or industrial sites are affected by the rezoning. Besides, the Hung Shui Kiu NDA to the north of Tuen Mun would also generate about 150,000 job opportunities.
<i>B. Suitability of the Sites for Public Housing Development</i>	
B1. No information is provided to justify why the representation sites are suitable for public housing developments. The proposed public housing developments are incompatible with the surrounding private housing neighbourhood.	(i) Responses (i), (ii) and (iii) to Ground A1 and A2 are relevant.  (ii) Response (ii) to Grounds A4 and A5 is also relevant.
B2. There are already many public housing estates in Tuen Mun. Public housing developments should not concentrate in one district.	(i) Response (ii) to Grounds A4 and A5 is relevant.  (ii) To meet the housing target of providing 460,000 housing units in the future 10 years, the Government has continued its efforts to identify suitable sites via various land use reviews over the territory. The Government’s land use reviews cover all districts in Hong Kong and not limited to Tuen Mun District. In fact, amongst the total 210 sites identified for rezoning in the short to medium term, about <del>30</del> 20 sites are in Tuen Mun District while the remaining distribute amongst the other 17 districts in Hong Kong. With the public housing development at Item A1 to Item A5 sites, the ratio of public to private housing units in Tuen Mun OZP will be about 56% to 44%. The overall proposed housing mix in the area is considered reasonable.
B3. The planning intention of Tuen Mun town centre is for private	(i) Response (ii) to Grounds A4 and A5 is relevant.

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>development. This is also the reason of redevelopment of San Fat Estate. The proposed public housing development at TTST site (Item A3) is in conflict with the planning intention of Tuen Mun town centre.</p>	<p>(ii) Tuen Mun town centre consists of a mixture of high-density public and private residential, commercial/ retail developments with open space (Tuen Mun Park) and GIC facilities. This serves as a major focal area for economic, social and civic activities in Tuen Mun New Town.</p> <p>(iii) The proposed public housing development will not be incompatible with the mix of uses.</p>
<i>C. Development Scale and Building Design</i>	
<p>C1. Queried why the plot ratio (PR) of some representation sites is 6.5, which exceeds the maximum plot ratio of 6 for new towns stated in the HKPSG. Besides, the proposed BH is not in line with the HKPSG that developments should be the highest in the central part of a new town and gradually descend down to medium to low rise development at the edges.</p>	<p>It is assumed in the Study that the domestic PR of the proposed development is 6 and the remaining 0.5 will be used for provision of commercial and welfare facilities. The housing sites are located within Tuen Mun new town. The VIA under the Study concludes that the proposed housing developments are considered not incompatible with the existing urban context of Tuen Mun Central, which is predominately medium-to high-rise residential developments mixed with GIC uses.</p>
<p>C2. Details about the proposed developments are yet to be provided, including which type of public housing and what supporting facilities, will be accommodated in the representation sites.</p>	<p>HD will work with the concerned Government departments to provide suitable supporting facilities for residents, including recreation, open space, community, social welfare, education and retail facilities in the proposed housing developments. Housing type will be determined at implementation stage.</p>
<p>C3. Specific comments/ views on the development scale, development scheme and building design are as follows:</p> <p>(i) To reduce the number of public housing blocks and maximum building height of the proposed development at Wu Shan site to align with the adjacent Siu Shan Court;</p>	<p>(i) As mentioned in the responses to Grounds A4 and A5 above, there is acute demand for public housing. The reduction of building development intensity or using part of the site for private development will affect the public housing production and exacerbate the shortfall. Technical assessments conducted for the proposed public housing developments</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>(ii) To maintain the building gap between the proposed development and the adjacent developments/ facilities;</p> <p>(iii) TTST site (Item A3) should be used for subsidized housing and only two housing blocks should be provided;</p> <p>(iv) To divide TTST site (Item A3) into two portions. While 3/5 of the site should be for private development, the remaining portion of the site should be for subsidized housing. Both developments should have two building blocks. Building gap of not less than 60m should be provided for air ventilation.</p> <p>(v) To relocate the proposed school at TTST site (Item A3) to southeastern part of the site, Pui Oi site (Item A5) or other districts.</p>	<p>conclude that the proposed development intensity would not have insurmountable technical problems.</p> <p>(ii) HD will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity.</p> <p>(iii) In respect of primary school provision, a total of 1,062 primary school classrooms are required according to HKPSG, taking into account the planned population in Tuen Mun District. However, currently there are only 950 primary school classrooms in the district. The planned provision of 1,046 classrooms includes the 30-classroom of the proposed school at TTST (Item A3). As advised by EDB, a site with an area of about 0.62ha should be reserved for a proposed 30-classroom school at TTST site (Item A3) is to meet the shortfall for primary school in Tuen Mun district. For the suggestion of relocating the proposed school to Pui Oi site (Item A5), its developable site area (i.e. about 0.59ha) is insufficient to accommodate a 30-classroom primary school.</p>
<i>D. Traffic and Transport</i>	
<p>D4. The road network of Tuen Mun is overloaded. Traffic congestion at major roads, including Wong Chu Road, Lung Mun Road, Tuen Mun Road and Castle Peak Road is severe. Besides, the traffic at the junction between Castle Peak Road- Castle Peak Bay and Tuen Hing Road (Tsuen Wan bound) is always busy. The situation would be aggravated by the proposed housing developments and after the opening of Hong Kong-Zhuhai-Macao Bridge. The traffic congestion will also affect the timely provision of emergency services.</p>	<p>(i) Traffic impact assessment (TIA) has been conducted as part of the Study. The TIA has taken into account the changes of the traffic pattern due to the commissioning of Tuen Mun - Chek Lap Kok Link and Hong Kong-Zhuhai-Macao Bridge Hong Kong Link Road. It concludes that even taking into account the said road infrastructure and Hung Shui Kiu NDA, the impact on major road network, including Tuen Mun Road, and Wong Chu Road, is manageable.</p> <p>(ii) With the implementation of the proposed traffic arrangement</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>and junction improvement works (<b>Plans H-9a to H-9g</b>), there is no insurmountable technical problem arising from the proposed public housing developments.</p> <p>(iii) For the longer future, there would be a number of major transport infrastructure projects in Tuen Mun, which included the proposed Tuen Mun Western Bypass ('TMWB') and Route 11 (<b>Plan H-8</b>). On TMWB, the Government had started the investigation study and preliminary design for the implementation of the plan. For Route 11, Highways Department (HyD) commenced the Feasibility Study in May 2018.</p>
<p>D2. As for Tuen Mun East, with the proposed housing development at the representation sites, coupled with the ongoing expansion of Harrow International School Hong Kong, and completion of several private housing developments and more than one hundred village houses in So Kwun Wat area, the traffic condition in the area will deteriorate. It is concerned about the traffic impact arising from the proposed development at Item D1.</p>	<p>(i) Under the HyD's project 'Widening of Castle Peak Road – Castle Peak Bay', TIA was conducted to assess whether the Castle Peak Road- Castle Peak Bay (CPR-CPB) could be able to cater for the traffic growth due to the proposed amendments and other potential planned developments in Tuen Mun East area.</p> <p>(ii) The TIA concluded that with the proposed junction improvement works for the junction at Sam Shing Street, Tsing Yung Street, Tsing Ying Road, Golden Beach Path, Kwun Fat Street and Tsing Fat Street, and widening of CPR-CPB to dual 2-lanes configuration with associated junction improvement works, it could accommodate the traffic from the proposed private housing developments under the current OZP amendments in Tuen Mun East, other potential developments and natural growth of traffic demand in Tuen Mun East.</p> <p>(iii) Item D1 is a technical amendment to reflect decision of the Board to approve a s.12A application to increase the development intensity of a comprehensive residential</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>development. Subject to the implementation of the proposed road improvement works at the junction of Castle Peak Road and So Kwun Wat Road, adverse traffic impact is not anticipated. Transport Department (TD) has no in-principle objection to the proposed development from traffic engineering viewpoint.</p>
<p>D3. Public transport services are insufficient. Buses are already full when they arrive at the stops near the representation sites. Traffic problems will be more serious with the additional population.</p>	<p>(i) Starting from 2016, trains of the WRL have been progressively changing from 7-car to 8-car, representing an increase in at least 14% capacity comparing with the capacity in 2015. After mid-2019, subject to the actual patronage, the fleet size of the West Rail can be further increased until reaching its ultimate capacity by operating with 8-car trains with an hourly frequency of 28 at each direction. On this basis, the carrying capacity of the West Rail will increase by 60% comparing with the capacity in 2015.</p>
<p>D4. The Light Rail Transit (LRT) and West Rail are overcrowded. Residents find it difficult to get onto the trains. Even if West Rail trains have increased from 7 to 8 compartments, the trains are still very congested. The Technical Assessment Report does not provide any assessment on carrying capacity of West Rail with the additional population nor the timeline for implementation of the proposed improvement measures (i.e. increase the train frequency from 20 per hour to 28 per hour) be implemented.</p>	<p>(ii) As for LRT, the Public Transport Strategy Study released by the Transport and Housing Bureau (THB) in June 2017 suggested a number of measures to improve the capacity of the LRT in short, medium and long run, in order to satisfy the public transport need of Northwest New Territories. The Government is following up relevant measures, together with the MTR Corporation.</p>
<p>D5. Increase in LRT frequency cannot alleviate public transport problem. Since LRT system takes up certain road space, increase in LRT frequency will further aggravate traffic congestion in the area.</p>	<p>(iii) According to the TIA under the Study, the existing bus services should have spare capacity to cater for the public transport demand generated by additional population. Bus layby has been planned in some representation sites to cater for the demand of public transport arising from the proposed housing developments (<b>Plans H-9a, H-9b and H-9c</b>).</p> <p>(iv) TD will closely monitor the construction progress and</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>completion dates of the five proposed public housing developments, and consider increasing appropriate public transport services having regard to population change, local development, prevailing condition of public transport services, passenger volume and passengers' needs, etc. Coupled with the proposed public transport infrastructures, such as provision/extension of bus lay-by and taxi stands, as well as improvement works to enhance the pedestrian accessibility to nearby public transport facilities, the public transport demand could be met.</p>
<p>D6. The Traffic Impact Assessment (TIA) is not comprehensive. It does not examine the traffic impact on the existing road network, nor the traffic from Hong Kong-Zhuhai-Macao Bridge and other areas/districts to Tuen Mun.</p>	<p>(i) Regarding the concerns about TIA, response (i) to Ground D1 is relevant.</p> <p>(ii) According to the Study, with the proposed junction improvement works at Hoi Wong Road/Hoi Chu Road, Castle Peak Road – Castle Peak Bay/ Hin Fat Lane and Castle Peak Road – Castle Peak Bay/ Tuen Hing Road (<b>Plans H-9e, H-9f and H-9g</b>), the degree of congestion will be manageable.</p>
<p>D7. Effectiveness of the proposed traffic improvement measures and infrastructure in the TIA is in doubt due to the following reasons:</p> <p>(i) Road widening at Hoi Wong Road could not alleviate the existing traffic problem, but would create bottleneck at the junction of Hoi Wong Road and Wong Chu Road.</p> <p>(ii) Road widening will take up area for pedestrian walkway and community facilities.</p> <p>(iii) Increase in bus frequency cannot help. It is because there is only one road linking Tuen Mun and urban areas, and the increase in bus frequency will aggravate traffic congestion.</p> <p>(iv) The capacity of West Rail cannot support the demand of Hung Shui Kiu NDA even after the completion of Shatin-Central Link, not to mention the additional population in Tuen Mun.</p> <p>(v) Route 11 and TMWB are still in early planning stage without</p>	<p>(iii) For West Rail Tuen Mun South Extension, having regard to the indicative implementation window recommended in the Railway Development Strategy, THB had invited the MTR Corporation Limited (MTRCL) to submit a proposal for the implementation (<b>Plan H-8</b>). The MTRCL submitted a proposal for this project in end December 2016. THB, HyD and relevant bureaux/ departments are evaluating the proposal and have requested the MTRCL to provide additional information and supplement details of the proposal in order to ensure that its proposal will be practically feasible and will bring maximum benefit to the community. THB aims to consult the public on the detailed alignment, station location, mode of implementation, cost estimate, mode of financing and</p>

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>funding commitment. It cannot help to divert the traffic in Tuen Mun but will attract more vehicles to the area.</p> <p>(vi) Development programme of West Rail Tuen Mun south extension is yet to be confirmed. Besides, it takes time to implement the extension.</p>	<p>actual implementation timetable of the Tuen Mun South Extension within 2018.</p> <p>(iv) TD and HyD are planning to take forward the ‘Strategic Studies on Railways and Major Roads beyond 2030’ (RMR2030+ Studies) on the basis of the conceptual spatial requirements to be firmed up under the ‘Hong Kong 2030+: Towards a Planning Vision and Strategy Transcending 2030’ (Hong Kong 2030+ Study), which is being conducted by the Development Bureau (DevB) and PlanD. The RMR2030+ Studies will examine the performance of the transport infrastructure (including railways and major roads) in Hong Kong between 2031 and 2041, based on the latest planning information available (up to 2041). The RMR2030+ Studies will focus on the loading of the heavy rails in the NWNT beyond 2030 according to the planning data up to 2041. Based on the forecast demand, HyD will study whether it is necessary to construct a new heavy rail to directly connect NWNT to urban areas. The RMR2030+ Studies will be commenced as soon as funding is secured.</p> <p>(v) As for the concern about Route 11 and TMWB, response (iii) to Ground D1 is relevant.</p>
<p>D8. Parking spaces are insufficient in Tuen Mun. It is suggested to provide parking spaces in the public housing sites.</p>	<p>(i) The Government has always been concerned about the supply of, and demand for, parking spaces for different types of vehicles, and understands that different types of vehicles have different parking needs. The Government provides parking spaces mainly by the following means:</p> <ul style="list-style-type: none"> <li>- requiring private developers and Housing Authority , etc. to provide parking spaces in their projects;</li> <li>- through short-term tenancy (‘STT’) car parks;</li> </ul>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<ul style="list-style-type: none"> <li>- through multi-storey car parks under the management of the TD; and</li> <li>- providing on-street parking spaces.</li> </ul> <p>(ii) For the proposed public housing development in Items A1 to A5, HD will make reference to HKPSG and consult relevant departments to provide adequate parking facilities.</p>
<p>D9. There are concerns about traffic safety during construction and operation of the proposed developments.</p>	<p>(i) CEDD/HD will consider necessary temporary traffic arrangement at specific major junctions and roads according to the actual situation during construction so as to ensure that they could operate with spare capacity.</p> <p>(ii) The design and construction of the roads, traffic signs and road markings in Hong Kong are designed and constructed in accordance with international standards. Besides, TD improves traffic facilities and traffic management on an on-going basis to further enhance road safety.</p>
<p>D10. Specific comments/ views on traffic/ transport related issues:</p> <ul style="list-style-type: none"> <li>(i) It is proposed to provide railway connections between Tuen Mun and Tsuen Wan, extension of West Rail to Tuen Mun Ferry Pier as well as extension of LRT to Fu Tai Estate, Yan Tin Estate and along Castle Peak Road to Golden Beach.</li> <li>(ii) It is proposed to provide additional roads/ lanes to connect Tuen Mun with urban area/ other areas in Hong Kong.</li> <li>(iii) To provide efficient cycle track.</li> <li>(iv) To provide cross harbour connection between West Rail Hung Hom Station to Hong Kong Island East.</li> </ul>	<p>(i) Regarding comments on extension of West Rail to Tuen Mun Ferry Pier, response (iii) to Grounds D6 and D7 is relevant.</p> <p>(ii) Feasibility of constructing a railway along the coastline between Tuen Mun and Tsuen Wan was evaluated during the formulation of the RDS-2014. The findings are that the local population is mainly concentrated at the eastern and western ends of the coastline between Tuen Mun and Tsuen Wan; whilst the development density of the remaining areas is relatively low and no basis for new source of passengers is anticipated. Meanwhile, due to the technical difficulties involved, the construction cost of a railway along the coastline between Tuen Mun and Tsuen Wan is expected to be very high. The cost-effectiveness can hardly be established. Furthermore,</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>after the completion of the improvement works for Tuen Mun Road in 2014, the road network between Tuen Mun and the urban areas has been further improved. This helped shorten the journey time for the bus services between Tuen Mun and the urban areas. Insofar as time savings were concerned, more passengers may prefer to travel to and from Tuen Mun by buses, making the railway scheme relatively less attractive. Besides, implementation of this scheme will create negative visual and landscape impacts along the scenic coastal areas. In longer term, THB would consider revisiting the railway proposal if there are further changes in the planning circumstances and population as well as an increase in transport demand in the coastal areas between Tuen Mun and Tsuen Wan, or other relevant new considerations in the planning for development in the region.</p> <p>(iii) On the concerns about LRT, response (ii) to Grounds D3, D4 and D5 is relevant.</p> <p>(iv) There are existing cycle tracks or planned cycle track in the vicinity of the five public housing sites</p> <p>(v) The proposed cross harbour connection is not related to the land use proposals on TM OZP.</p>
<i>E. Open Space, GIC, Commercial and Supporting Facilities</i>	
<p>E1. GIC facilities, including hospital beds, clinics, sport facilities and open space etc., are in deficit in Tuen Mun. The deficiency will be aggravated by addition of population. The proposed housing developments would undermine the interests and affect the livelihood of the existing residents as the additional population will impose pressure on the existing facilities. No proposals are provided in the current rezoning to alleviate the deficiency.</p>	<p>(i) The provision of GIC facilities within the planning scheme area of Tuen Mun OZP has been assessed. Based on HKPSG requirements and a planned population of about 572,500, including the population of the six housing sites, the GIC facilities and open space provision are generally sufficient except clinic/ health centre (<b>Annex X</b>). PlanD will liaise with relevant bureaux/departments to review the GIC facilities and</p>

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>Sufficient GIC facilities should be provided in accordance with HKPSG before putting forward any housing development proposals.</p>	<p>open space provision in the area from time to time. Follow-up action will be taken by PlanD if relevant bureaux/ departments request for sites for provision of GIC facilities.</p> <p>(ii) On provision of clinic/ health centre, Food and Health Bureau (FHB) and the Hospital Authority (HA) are planning to develop a sizeable Community Health Centre in the public housing development project in Tuen Mun Area 29 West led by HD. Meanwhile, the concerned Government department is exploring the proposal of redevelopment of the Tuen Mun Clinic site (where the HA's Tuen Mun Clinic is located) and undergoing initial assessment on the land use. To cater for the long-term medical needs of the district, a site in Tuen Mun Area 3 has been reserved for clinic development in the long run. Taking into account the population growth and the five existing/planned clinics, there will be a deficit of about 0.7 clinic. HA will continue to increase the service capacity of General Out-Patient Clinics subject to resources and manpower availability.</p> <p>(iii) With regard to the concerns about hospital services, HA plans its services on cluster basis. The New Territories West (NTW) cluster covers the service requirement from residents in Tuen Mun and Yuen Long Districts. In service planning, HA takes into account a number of factors, including the increase of service demand as a result of population growth and demographic changes, advancement of medical technology, manpower availability as well as organisation of services of the clusters and hospitals. Population is only one of the factors for consideration. HA monitors the service utilisation and updates the service demand projection regularly according to the latest population projection parameters and development plan of the Government.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(iv) As stated in the Clinical Services Plan for NTW Cluster published in 2017, Tin Shui Wai Hospital has commenced operation in the first quarter of 2017 by phases. It will provide 300 hospital beds when it comes into full operation. In the long run, the HA would consider making use of the adjoining site of TSWH for future expansion of the hospital to further increase service capacity. The construction of an extension to the Operating Theatre Block of Tuen Mun Hospital, which is the major acute hospital in the cluster, is underway. At the same time, in the light of an increasing demand for healthcare services, the Government has invited HA to start planning the second 10-year hospital development plan. The Government has also reserved a site at Hung Shui Kiu NDA for the construction of a new hospital to meet the growing healthcare demand of the population in NTW.</p> <p>(v) On the concern about insufficient primary school, generally speaking, EDB makes projections on the supply and demand of different types of school places having regard to the forecast growth and movement of population provided by relevant Government departments (including the Census and Statistics Department, PlanD and HD), relevant requirements in HKPSG, and prevailing education policies. EDB will make suitable adjustments in reserving sites for construction of schools for districts with persistent shortfall or surplus of school places.</p>
<p>E2. GIC facilities in Tuen Mun East/ So Kwun Wat Village are insufficient. There are no clinics and insufficient secondary and primary school places. Besides, several sites in Tuen Mun East were rezoned for residential developments in the past few years. However, no additional G/IC facilities and open space are proposed to cater for the new population. The Government should provide</p>	<p>(i) The GIC facilities in the Tuen Mun District are also for meeting the GIC demand of Tuen Mun East and So Kwun Wat population. Based on the planned population of about 619,600 for the Tuen Mun District, including the planned population of the Tuen Mun OZP, the Lam Tei and Yick Yuen OZP, and the So Kwun Wat OZP, the provision of major GIC facilities in the</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
indoor sports centre, swimming pool and clinic in Tuen Mun East.	<p>district is generally sufficient (<b>Annex XI</b>) except primary school (-16 classrooms), clinic/ health centre (-1.2) and sports centre (-1.2). As for open space provision, there are surplus of local and district open space by 60.06ha and 33.84ha within Tuen Mun District (<b>Annex XI</b>).</p> <p>(ii) For the deficiency on clinic/health centre, hospital beds and primary school, the responses to Ground E1 are relevant.</p> <p>(iii) For sports centre, there are a total of eight existing and planned Indoor Recreation Centre in Tuen Mun. PlanD will continue to liaise with relevant bureaux/departments to reserve a site for sports centre development in Tuen Mun in future.</p>
E3. There are insufficient GIC, open space, greenery, retail and supporting facilities in the neighbourhood of the representation sites. The proposed housing developments will impose pressure on the existing facilities.	Response (i) to Ground E1 is relevant. Besides, HD will work with the concerned Government departments to provide suitable facilities for residents, including recreation, open space, community, social welfare, educational and retail facilities. In accordance with the established administrative procedure, HD will prepare planning brief for the proposed public housing developments to specify the detailed development parameters, GIC facilities and the amount of open space to be provided.
E4. The Government should expedite provision of some community and GIC facilities such as parks, public market, hospital and sports ground etc. It is anticipated that the waiting time for medical services, hospital beds and elderly services will be extended for local residents. There is also shortage of kindergarten.	Response (i) to Ground E1 is relevant.
E5. The new population brought by the proposed public housing developments, will bring different social groups and mostly low-income groups, and may compromise the harmony of the existing community.	There are public and private housing developments in Tuen Mun at present. Similar to other new towns and most of other districts in Hong Kong, public and private housing developments locate side by side with each other in the same community.

Major Grounds and Proposals of Representations	Responses of Government Departments
E6. It is proposed to use the representation sites for provision of GIC or recreational facilities, such as elderly facilities, children playground, public markets and library etc.	Response (i) to Ground E1 is relevant.
E7. Specific comments on GIC facilities provision  (i) to reserve the representation sites originally zoned “G/IC” for provision of elderly care facilities.  (ii) to provide GIC facilities to facilitate integration of minority groups, such as cricket field.	Response (i) to Ground E1 is relevant.
<i>F. Environmental, Air Ventilation and Ecological Aspects</i>	
F1. Air and noise pollution will be aggravated due to the increase in population and traffic in the area. Besides, the proposed housing developments will be vulnerable to adverse environmental impacts arising from the existing uses (such as the operation within Tuen Mun Typhoon Shelter) in the vicinity.	Response (ii) to Grounds A1 and A2 is relevant.
F2. Capacity of the existing infrastructure, such as drainage and sewerage system, cannot cope with the additional population.	Response (ii) to Grounds A1 and A2 is relevant.
F3. Concerned about the environmental impact on the surrounding developments during construction and operation of the proposed developments.	Response (ii) to Grounds A1 and A2 is relevant.
F4. Ecological Impact Assessment and Environmental Impact Assessment covering direct and indirect impacts should be conducted and relevant departments should be consulted.	The Study has assessed the potential ecological and environmental impacts arising from the proposed public housing developments. Relevant departments, including EPD and AFCD, have been consulted and had no adverse comments on the assessments.
F5. The proposed developments will create a wall-like feature.	(i) The likely impacts of the five public housing sites on the

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>Coupled with the narrow separation from the adjacent developments, it will block air ventilation in the area, consequently affect air flow, increase concentration of pollutants, and create heat island effect. Living quality in the area and health of the existing residents will be adversely affected. Air ventilation impact on adjacent residential developments should be assessed.</p>	<p>pedestrian wind environment were assessed under the Study and ‘Air Ventilation Assessment (Expert Evaluation) (AVA(EE) for Tuen Mun New Town (2014)’. An AVA(EE) is also conducted for the proposed private housing development at the site under Item B.</p> <p>(ii) Various design measures have been incorporated in the conceptual housing layouts of the five public housing sites, such as building separation, building setback and site coverage of greenery to enhance the environmental sustainability of the living space and mitigate the heat island effect, which generally follow the recommendations in Practice Notes for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers (PNAP) APP-152 (Sustainable Building Design Guidelines). The current analysis and mitigation measures proposed are based on the current conceptual layout, thus representing a basic feature of the housing sites. Further measures together with other variations in design can be explored and evaluated in the detailed design stage. HD advises that quantitative air ventilation assessments will be carried out at the detailed design stage to demonstrate that the wind performance of the future schemes is no worse off than the current scheme for scheme optimisation.</p> <p>(iii) As for the private housing site (Item B) in Tuen Mun East, the AVA(EE) has recommended mitigation measures including provisions of setback area, non-building areas (NBAs) as well as adoption of design principles in accordance with the PNAP APP-152. Subject to the incorporation of the recommended mitigation measures, the proposed development is unlikely to impose significant air ventilation impact on the surrounding areas.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
F6. Queried whether the Government will provide an AVA with wind model testing.	Responses to Ground F5 are relevant.
F7. Referring to paragraph 9.3.14 in the Explanatory Statement of the draft OZP, the assessment of air ventilation impact for two public housing sites zoned “R(A)24” to the west of Kei Lun Wai and “R(A)25” to the north of Hing Fu Street have not yet been completed.	<p>(i) The concern is not related to the amendment items under the OZP.</p> <p>(ii) According to the Explanatory Statement of the draft OZP, the air ventilation impact arising from the public housing developments at the concerned “R(A)24” and “R(A)25” sites have already been assessed. These two sites were covered by the AVA(EA) conducted in 2014.</p>
<i>G. Landscape and Visual Aspects</i>	
G1. Lots of trees will be felled due to the proposed developments. It is against the principle of environmental conservation.	<p>(i) Clearance of trees is inevitable for development of the representation sites. According to the Study, about 1,072 trees would be potentially affected by the public housing developments, school, and their associated infrastructure. There are no Old and Valuable Trees (OVTs) identified within the proposed public housing sites and all potentially affected trees are of common species in Hong Kong with no specific conservation interests.</p> <p>(ii) While details of the proposed tree treatment (i.e. no. of trees to be felled, retained or transplanted) is subject to detailed design of the proposed housing developments, landscape mitigation measures such as transplanting trees of high amenity value, compensatory planting in a ratio of not less than 1:1 in terms of number in accordance with Development Bureau Technical Circular (Works) (DEVB TCW) No. 7/2015 – Tree Preservation, and provision of 20% to 30% greening areas within the development sites are recommended by the Study.</p> <p>(iii) For Item B site, the landscape assessment conducted for</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>rezoning of the site has acknowledged that site clearance and removal of the existing trees (about 396 nos.) within the development site area would be extensive and unavoidable for the proposed housing development. On the other hand, new landscape resources (such as landscape amenity space with tree planting, and slope greening treatment) would be required for holistic incorporation into the future design of the development. If tree felling is considered necessary, the developer will be required to carry out tree survey and shall take and implement appropriate mitigation measures and compensatory proposal in accordance with the prevailing guidelines and tree preservation mechanism.</p>
<p>G2. The visual amenity of the representation sites will be changed from a soft landscape feature to concrete structures. The natural character of the area will be destroyed.</p>	<p>(i) Visual Impact Assessment (VIA) has been conducted in the Study. The VIA has assessed the visual impact on the viewing points frequently visited by the public, including MacLehose Trail, Castle Peak Beach, promenade of Tuen Mun River Channel and Tuen Mun Town Centre. The VIA concluded that the proposed developments would inevitably impose significant visual changes to the townscape due to blockage of open distance views from some viewpoints, loss of visual openness and degree of visual obstruction. Nonetheless, the visual composition of the proposed developments is not incompatible with the existing and planned urban context of Tuen Mun Central, which is predominately medium-to high-rise residential developments mixed with GIC uses. With implementation of proposed mitigation measures (such as creation of building separations, variations of building heights, etc), it is predicted that the overall visual impact of these housing sites would be moderately adverse. As such, further mitigation measures will be explored at the detailed design stage to effectively reduce the potential visual impact of the proposed developments (<b>Plans H-10a to H-10e</b>).</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>(ii) For Item B site, the proposed development will inevitably lead to a reduction of visual openness to the immediate vicinity of proposed development. Two strips of NBAs (15m) are proposed from southwest to northeast to serve as air paths which can also serve as visual corridors. The NBAs can help to increase the visual permeability of the proposed development. While the overall townscape at the locality has been transformed to a medium density residential area, the proposed housing development would not be visually incompatible in the transformed context, and significant visual impact due to the proposed rezoning is not anticipated (<b>Plan H-10f</b>).</p>
<p>G3. Concerned about tree treatment proposal and whether compensatory planting will be provided.</p>	<p>Responses to Ground G1 are relevant.</p>
<p>G4. The proposed development at the representation sites will create a wall-like building which will block the views of adjacent developments.</p>	<p>Responses to Ground G2 are relevant.</p>
<p>G5. The Visual Impact Assessment did not assess the visual impact on the adjacent developments, in particular the views from the adjacent developments on the representation sites.</p>	<p>(i) The VIA was conducted in accordance with the methodology set out in the Town Planning Board Guidelines No. 41 for Submission of VIA for Planning Applications to the Board (TPB-PG No. 41). As set out in the guidelines, in the highly developed context of Hong Kong, it is not practical to protect private views without stifling development opportunity and balancing other relevant consideration. In the interests of the public, it is far more important to protect public views, particularly those easily accessible and popular to the public or tourists.</p> <p>(ii) The VIA under the Study has assessed the visual impact on the</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	viewing points frequently visited by the public, including MacLehose Trail, Castle Peak Beach, promenade of Tuen Mun River Channel and Tuen Mun Town Centre.
<i>H. Consultation Procedures</i>	
<p>H1. The Government neglected the objections from Tuen Mun District Council (TMDC) on the amendments items raised at the meetings on 5.9.2017 and 7.11.2017.</p>	<p>(i) In the TMDC meeting on 5.9.2017, the DC raised strong objections to the proposed amendments and passed two amended motions which objected to three of the housing sites namely Wu Shan (Item A1), Kau Hui (Item A2) and Hang Fu (Item A4); and all of the six housing sites. The views and concerns raised by TMDC members as well as draft minutes of the meeting together with a letter submitted by the DC Chairman dated 12.9.2017 informing that 2 amended motions were passed in the TMDC meeting on 5.9.2017 and requesting the Board to consider TMDC's comments on the proposed amendments were incorporated into the RNTPC Paper No. 9/17 for the proposed amendments to the approved Tuen Mun OZP No. S/TM/33 for consideration of the Board Members.</p> <p>(ii) In the RNTPC meeting on 13.10.2017, Members noted that TMDC had raised strong objection to the proposed amendments. On the consideration that TMDC would be consulted again after gazettal of the draft OZP and the Board could take into account TMDC's further views, if any, before making a decision on the OZP prior to its submission to the Chief Executive in Council for approval, Members in general considered it appropriate to publish the OZP for public inspection so as to collect views from the public on the proposed amendments (<b>Annex VI</b>).</p> <p>(iii) Upon gazettal of the draft Tuen Mun OZP No. S/TM/34, PlanD made a presentation to TMDC on the proposed amendments to the TMOZP at TMDC meeting on 7.11.2017. TMDC</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	maintained their opposing stances on grounds of insufficient transport / infrastructure and GIC facilities. Their views, relevant extract of minutes of meetings of TMDC, and the representation made by TMDC have been incorporated into this Paper ( <b>Annexes IV and VII</b> ).
H2. The Government did not follow the established procedure of TMDC.	The established public consultation procedures for OZP amendments had been followed for the present case.
H3. Local residents and stakeholders were not consulted on the rezoning. Consultation with local residents and stakeholders should be conducted when the Technical Assessment Report was being conducted so as to incorporate local's views in the Report.	<p>(i) The established public consultation procedures for OZP amendments had been followed for the present case. TMDC and Tuen Mun Rural Committee (TMRC) were consulted before RNTPC's consideration of the proposed amendments. On the consultation with villagers and local residents, PlanD, CEDD and HD had attended meetings with TMRC on 9.12.2017 and five local forums/meetings with residents organised by TMDC members after gazettal of the draft OZP on 28.11.2017, 5.12.2017, 15.12.2017, 7.1.2018 and 27.1.2018.</p> <p>(ii) The proposed amendments were incorporated into the draft OZP and published for exhibition for two months according to the provisions of the Town Planning Ordinance. Members of the public had been given the opportunity to provide views on the amendments. All valid representers and commenters had been invited to the Board to present their views.</p>
H4. Objections and opinion of local residents were ignored. Further consultation should be conducted for the rezoning.	Responses to Ground H3 are relevant.
H5. The rezoning of the representation sites was not properly carried out. Residents may resort to judicial review.	Responses to Ground H3 are relevant.
<i>1. Others</i>	

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
I1. The government should look into the source of population growth and formulate population policy in order to achieve sustainable development.	Responses to Grounds A4 and A5 are relevant.
I2. Property price of the developments adjacent to the amendment sites will drop due to the proposed development. The interest of the private flat owners is ignored. It is unfair to the owners.	The matter is not related to the OZP which is to show the broad land use proposal and is not a material planning consideration in the rezoning process.
I3. Concerned whether there is sufficient electricity power supply for supporting the high-density developments.	(i) The matter is not related to the OZP which is to show the broad land use proposal and is not a material planning consideration in the rezoning process.  (ii) CLP Power Hong Kong Limited advised that their power supply networks are capable to cope with the demand arising from the proposed housing developments. The detailed power supply arrangement will be further confirmed with CLP in the detailed design stage.
I4. It is suspected that the Government is using public housing as an excuse to rezone the representation sites and will change the use of the sites for private housing developments later.	Government's intention is to rezone the 5 sites in Tuen Mun Central to provide public housing to meet the acute demand. The intention of public housing development at these sites is also clearly indicated in the relevant public documents including Tuen Mun District Council Paper, RNTPC Paper and the Notes and Explanatory Statement of the OZP.
<b>Adverse Representations and Representations Providing Views on Specific Sites</b>	
<i>Wu Shan Site (Item A1)</i>	
SA1(a) There are too many public housing estates in the neighbourhood of the site. GIC and other supporting facilities are in deficit. The proposed development will aggravate the deficiency.	Responses to Grounds E1 and E3 are relevant.
SA1(b) Wu Shan Recreation Playground is an important open space and "GB" zone in the area providing various recreational facilities for	(i) The existing recreational facilities within Wu Shan Recreation Playground will not be affected by the proposed public housing

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>residents to enjoy. It serves as a buffer to the pollution arising from obnoxious facilities in Tuen Mun. Lots of trees will be felled and consequently affect the air quality in the area. The Playground should be retained.</p>	<p>development. According to the Study, about 372 existing trees within the site will be potentially affected by the proposed development. They are of common species in Hong Kong and there is no OVT or tree of specific conservation interests.</p> <p>(ii) The technical assessment on environmental aspect under the Study concludes that there is no adverse air quality impact arising from the proposed public housing development. Compensatory tree planting at a 1:1 ratio will be adopted as far as practicable in accordance with Development Bureau Technical Circular (Works) no. 7/2015.</p>
<p>SA1(c) The West Rail extension to Tuen Mun Ferry Pier is yet to be implemented. Besides, the proposed station may be located at Tuen Mun Swimming Pool and the rail extension will not benefit the residents in the neighbourhood of Wu Shan site.</p>	<p>Response (iii) to Grounds D7 and D8 are also relevant. In particular, THB aims to consult the public on the detailed alignment, station location, mode of implementation, cost estimate, mode of financing and actual implementation timetable of the Tuen Mun South Extension within 2018.</p>
<p>SA1(d) The neighbourhood of the site is vulnerable to air pollution arising from the traffic to and from the River Trade Terminal. Air pollution problem will worsen as a result of more traffic generated by the housing development.</p>	<p>(i) The TIA concludes that the traffic generation arising from Wu Shan site is insignificant. Hence the traffic emission impact arising from the proposed development to the surrounding area is considered not significant.</p> <p>(ii) Response (ii) to Grounds A1 and A2 is relevant.</p>
<p>SA1(e) The site is located adjacent to LRT and noise from rail operations could be of concern to the future occupants. It is suggested that HD should assess and evaluate the potential noise impacts from LRT. It is also suggested that the noise assessment requirement should be imposed through Planning Brief, statutory plans and/or land administration documents and should be conducted to the satisfaction of the Director of Environmental Protection.</p>	<p>(i) The horizontal distance between Wu Shan site and the LRT along Lung Mun Road is larger than 25m as required under HKPSG. In addition, there is a non-domestic block in between the housing blocks and the LRT track, which could serve as a buffer. Hence, adverse railway noise from the LRT is not anticipated.</p> <p>(ii) Besides, noise arisen from LRT is subject to control under the</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	Noise Control Ordinance (Cap 400), and could be controlled through proper management and good practice.
SA1(f) Concerned about law and order due to increase in pedestrian flow generated by the proposed housing development. There is only one police station in the neighbourhood. The situation will be getting worse without additional resources/ support.	The Tuen Mun OZP is to show the broad land use proposal. Besides, the existing and planned provision of police station in Tuen Mun is generally sufficient.
SA1(g) Private land is involved in the site. It is queried why the site has been selected for public housing development.	The site does not comprise any private land.
<i>Kau Hui Site (Item A2)</i>	
SA2(a) The site was originally proposed for open space and recreational facilities, comprising a football pitch, a basketball court, a skateboard play area, a tai chi square and a garden. TMDC had discussed and endorsed the proposal. However, it turned out that the authority planned to build housing there and retain the football pitch only. The approach taken by the authority is unacceptable.	The Government intends to provide a football pitch and related supporting facilities in the “O” site to the immediate north of the site. The proposed facility is one of the 25 sports and recreation facilities to be provided in Hong Kong announced in the Policy Address 2017. The Government will further explore opportunities to provide other recreational facilities in the vicinity.
<i>TTST Site (Item A3)</i>	
SA3(a) The proposed housing development is of high density, which is not in line with the planning intention of the area along Castle Peak Road, which was originally planned for low-density developments. Queried the justification for increasing the plot ratio of the site from 3 to 6.	<p>(i) To increase and expedite housing land supply in the short to medium term, the Government is taking a multi-pronged approach including rezoning of appropriate “GB” sites to increase supply of flats. The review of “GB” sites includes those sites in the fringe of developed area or in close proximity to existing urban areas or new development areas; and close to roads to make use of the existing available infrastructure and community facilities.</p> <p>(ii) The site is located near Tuen Mun new town and is close to existing road and infrastructure. Besides, it is not located within an area with high ecological value. Therefore, it is considered suitable for housing development. The Study has</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	ascertained that domestic PR of 6 is technically feasible for the Site.
SA3(b) The maximum building height of 145mPD is unreasonable, which is more than double of the building height for the adjacent “R(B)10” zone (70mPD).	(i) As mentioned in the responses to Ground A4, there is acute demand for public housing. The proposed development intensity is required to meet the demand.  (ii) Response (i) to Ground G2 is also relevant.
SA3(c) There are a lot of trees, vegetation and animals within the “GB” zone where the representation site is located. It is indispensable to the community and cannot be replaced.	The Study conducted for the housing development indicates that mammals like Short-nosed Fruit Bat (短吻果蝠) and Pallas’s Squirrel (赤腹松鼠) were found at the site. While these mammals are protected under Wild Animals Protection Ordinance (Cap.170), they are common and widely distributed in Hong Kong. In addition, the Study also indicates that no flora species of conservation importance were recorded in woodland of the Site. As such, TTST site is unlikely to be of particularly high ecological value. AFCD has been consulted and has no adverse comments on the Study.
SA3(d) The biodiversity of the site is considered one of the best in HK. It is the habitat for many species of plants, insects, birds (both local and migratory), and wild animals. The proposed development will adversely affect the habitat. The path of migratory birds will be permanently altered.	
SA3(e) Concerned about extensive site formation works and tree felling will be involved for construction of the proposed housing development at the representation site:  (i) High construction cost and long construction period will be involved. It is not cost effective to develop public housing at the Site. Queried why the site had been selected for housing development;  (ii) it would cause adverse environmental impact, such as noise and air pollution, and contamination of underground water, which may affect the ecology of the adjacent area, and users of Tai Lam Country Park.	<u>Construction Cost</u> (i) In response to the pressing demand for public housing, and with planning, infrastructure and environmental factors permitting, the Government will optimise the development potential of the land to increase the supply of public housing, taking into account the needs of existing and future residents.  <u>Environmental Impact</u> (ii) Air, noise and water quality impact associated with construction and operation phases of the development have been assessed. With proper mitigation measures, such as following the dust suppression measures stipulated in the Air

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>(iii) it will also affect slope stability and consequently pose safety risk to nearby residents and the adjacent Tuen Mun Fresh Water Service Reservoir. It is suggested that slope stability works should be carried out for Villa Tiara.</p>	<p>Pollution Control (Construction Dust) Regulation, and following the noise control requirements set out in the EPD's Environmental Protection Department's 'Recommended Pollution Control Clause for Construction Contract, no environmental impacts would be anticipated.</p> <p><i>Ecological Impact and Impact on Tai Lam Country Park</i></p> <p>(iii) According to the Study, no flora species of conservation value are identified in the site. Fauna species recorded are all common species. The Study concludes that with proper implementation of the recommended mitigation measures, such as buffer planting along the boundary of the site to minimise the indirect impacts (such as noise and glare/lighting), residual ecological impact arising from the proposed development is anticipated to be minor and acceptable. Besides, Tai Lam Country Park is about 57m from the boundary of the site (<b>Plan H-2c</b>). The proposed development will not encroach onto the Tai Lam Country Park or obstruct the entrance to MacLehose Trail. Hence, it would unlikely affect the use of nearby MacLehose Trail. AFCD has been consulted and has no adverse comments on the Study.</p> <p><i>Slope Stability</i></p> <p>(iv) A preliminary geotechnical appraisal had been carried out to identify the man-made slopes and retaining walls which could affect or be affected by the proposed development with TTST site. The preliminary geotechnical appraisal also examined the potential natural terrain hazards for the proposed development. Further geotechnical assessment will be carried out at the detailed design stage to define the scope of necessary slope works and natural terrain hazard mitigation measures to be carried out under the project.</p>

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
SA3(f) There is concern about the structural impact on Villa Tiara due to the construction of housing development at the Site.	Construction of the housing development at TTST site shall follow PNAP APP-137 (Ground-borne Vibrations and Ground Settlements Arising from Pile Driving and Similar Operations) to control vibrations and ground settlements generated from pile driving or similar operations with a view to minimising possible damage to adjacent developments and streets.
SA3(g) It is suggested the Government to take over the maintenance of retaining wall near Blocks 1 and 2 of Villa Tiara after construction of the proposed development at the site and include the requirement into the lease of the Site.	The issue on maintenance of retaining wall is a matter of implementation and not related to the land use proposals on OZP. The maintenance responsibility of any retaining structures will be considered at the implementation stage and relevant departments will be consulted.
SA3(h) There is concern about the feasibility of providing buffer area on both sides of the proposed road for mitigating the adverse impact arising from traffic emission and noise as stated in the Technical Assessment Report (Paragraph 3.10) as both sides of the road has been fully developed.	The proposed housing development at TTST site will be bounded by existing Tuen Hing Road to the west and a new site access road in the east. Both are classified as local distributor. A minimum 5m buffer distance will be provided according to HKPSG.
SA3(i) Details of the mitigation measures for minimising noise nuisance and dust emission to the nearby school and elderly centre during construction of the development should be provided.	(i) The potential noise impacts from the construction works would mainly relate to the use of powered mechanical equipment. General construction works during restricted hours (i.e. from 19:00 to 07:00 on next day during normal days and whole day of general holidays) and percussive piling are controlled under Noise Control Ordinance (Cap 400). The Authorized Person (AP) and the contractors are also expected to take full account of environmental matters in the exercise of their professional duties and follow ProPECC PN 2/93 in controlling construction noise during non-restricted hours (i.e. from 07:00 to 19:00) on normal days. Besides, quantitative construction noise impact assessment based on the Technical Memoranda under the Noise Control Ordinance (Cap 400) is recommended to be conducted in the design phase to check the compliance of noise criteria.

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>With the implementation of noise control measures (e.g. following the noise control requirements in the Environmental Protection Department's 'Recommended Pollution Control Clauses for Construction Contract'), the construction of the proposed housing development would not cause unacceptable noise impacts on nearby noise sensitive uses.</p> <p>(ii) The potential air quality impacts from the construction works of the proposed public housing development would mainly relate to construction dust. Given that the scale of the development and infrastructure works are limited, adverse impacts from the site are not expected provided that mitigation measures required under relevant regulation(s) are taken. Besides, dust suppression measures stipulated in the Air Pollution Control (Construction Dust) Regulation will be incorporated to control dust emission from the Site, such as water spraying on dusty materials before loading and unloading, erection of hoarding of not less than 2.4m in height, provision of dust screens on scaffolding, and compacting/hydro-seeding on exposed earth after the last construction activity, etc.</p>
<p>SA3(j) Objection to the proposed school and ball courts as they would cause noise nuisance. Objection to the proposed retail facilities as they would cause noise and air pollution.</p>	<p>(i) School and its ball courts are not considered as noise emitters under HKPSG. However, operation noise emanated from the school shall be controlled under the Noise Control Ordinance and its compliance could be realized through proper noise mitigation measures, proper management or good practice.</p> <p>(ii) Retail facilities will be provided to serve local and nearby residents. Operation of the retail facilities is subject to the control under Noise Control Ordinance and Air Pollution Control Ordinance.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
SA3(k) It is unnecessary to provide the primary school at the site as many schools have been closed down in Tuen Mun.	<p>(i) In general, EDB makes projection on the supply and demand of different types of school places having regard to the forecast growth and movement of population provided by relevant Government departments, relevant provisions in HKPSG and prevailing policies. EDB will make suitable adjustments in reserving sites for construction of schools for districts with persistent shortfall or surplus of school places.</p> <p>(ii) Response (iii) to Ground C3 is relevant.</p>
SA3(l) The site is close to Tai Lam Country Park. The development will affect the existing habitat at the site and Tai Lam Country Park. Furthermore, the wild animals in Tai Lam Country Park may threaten the safety of future residents.	Regarding the impact on the existing habitat at the site and Tai Lam Country Park, response (iii) to Ground SA3(e) is relevant. As for the concern about wild animals may threaten the safety of future residents, the matter is not related to the OZP which is to show the broad land use proposal.
SA3(m) Although it is stated in the Study that the project proponent of the site will be requested to preserve/ transplant the existing trees at the Site, feasibility of transplanting the existing trees on sloping area, and other areas is in doubt. It is suggested to develop the tree receptor sites instead.	<p>(i) Response (ii) to Ground G1 is relevant.</p> <p>(ii) In general, sites with development potential will not be selected as recipient sites for transplanting existing trees.</p>
SA3(n) Development at the site will block the view from MacLehose Trail. EPD, AFCD and the Country and Marine Parks Board have never been consulted on the rezoning. It will also block the view of the adjacent developments (i.e. Villa Tiara).	The VIA under the Study has examined the potential visual impact on hikers at MacLehose Trail in Tai Lam Country Park arising from the proposed development at TTST site. When viewed from VPs at MacLehose Trail, the proposed development would be seen as part of the existing townscape and is considered not incompatible with the existing urban context ( <b>Plan H-10c</b> ). Chief Town Planner/ Urban Design and Landscape has been consulted and has no adverse comment.
SA3(o) There is an existing 132kV Overhead Lines (OHL) running from Tuen Mun Substation to Kwai Chung. A section of the OHL	The power lines and pylons have been taken into account in the Study. The proposed housing blocks are located 36m outside the

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>would be oversailing the Site. According to HKPSG, a working corridor of 36m shall be maintained between the overhead transmission lines and building structure and 6.7m of minimum vertical ground clearance is also required. It is suggested to amend the draft Plan such that there is no conflict between the OHL working corridor and the proposed development at the Site, or to incorporate non-building area restriction into the Notes of the OZP.</p>	<p>working corridor (<b>Plan H-5c</b>). The development shall be designed such that cables will provide a minimum 6.7m vertical ground clearance as required. EMSD has no adverse comment on the proposed housing development.</p>
<p>SA3(p) The site is close to high voltage pylon/power substation which will cause health hazard to the future residents in the Site. No assessment has been conducted in this regard. CLP has not been consulted.</p>	
<p>SA3(q) It is suggested to conduct a risk assessment to evaluate the potential risk and determine the necessary mitigation measures as the site is in the close vicinity of an intermediate pressure B gas pipe running along Castle Peak Road and Castle Peak Bay.</p>	<p>EMSD advises that intermediate pressure B gas pipe is not a notifiable gas installation. It is considered that a risk assessment is not a compulsory requirement in this case. Besides, the proposed development and work site do not encroach onto the gas pipe alignment. In view of the above, the potential risk to the development is relatively low and acceptable.</p>
<p>SA3(r) Against removal of the existing village at the site. A lot of villagers have been living in the village for many years and some for several generations. The proposed development will destroy the traditional way of living. Residents including elderlies will lose their home and agricultural livelihood.</p>	<p>(i) The site is entirely on government land (GL). It is estimated under the Study that there are about 89 structures within the site (exact number affected subject to detailed survey). Given the location, avoiding such structures or acceding to the request of ‘no removal and no clearance’ will substantially affect the public housing production. If clearance of existing structures is unavoidable, the Government will offer ex-gratia allowances and/or rehousing arrangements to the eligible affected parties in accordance with prevailing policies.</p> <p>(ii) AFCD advises that the farmers affected by clearance are eligible to receive crop ex-gratia allowance as compensation</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	for the loss of crops and other assistances offered by the Government through the existing mechanism.
SA3(s) Details regarding relocation and compensation of the existing villagers residing in the site are yet to be provided.	Response (i) to Ground SA3(r) is relevant.
SA3(t) It is suggested that village representatives and villagers should be consulted direct.	In accordance with established procedures, TMDC and TMRC were consulted prior to submission to the RNTPC, via TMDC meeting on 5.9.2017 and letter sent to TMRC dated 30.8.2017. PlanD, CEDD, and HD had attended meetings of TMRC and villagers of TTST after the gazettal of the draft Tuen Mun OZP No. S/TM/34 on 9.12.2017 and 7.1.2018 respectively.
SA3(u) TTST has been established for more than one hundred years. It is concerned whether there are any proposals for conservation of the history of the village.	Antiquities and Monuments Office advises that there is no graded / proposed to be graded historic building, new item pending heritage assessment by the Antiquities Advisory Board or site of Archaeological Interest situated within or in the vicinity of TTST.
<i>Hang Fu Site (Item A4)</i>	
SA4(a) The distance between the site and the adjacent development, i.e. Nerine Cove, is only 24m. There would be loss of privacy due to overlooking from future housing residents.	Given the compact environment in Hong Kong, overlooking problem is inevitable. HD will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity.
SA4(b) The proposed development will block the sunlight to the adjacent developments, especially Nerine Cove, which is not in line with the requirements of number of hours of sunshine set out in HKPSG and the World Health Organisation. It would affect the physical and/or mental health of residents living in the adjacent developments, particularly elderly and residents with chronic illness.	(i) HD will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity. In any event, the development proposal has to comply with the Building (Planning) Regulations (B(P)R) which comprise regulatory requirements in ensuring provision of natural lighting and ventilation. Building separation and penetration of sunlight would be

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>governed by the Buildings Ordinance.</p> <p>(ii) There are no requirements for number of hours of sunshine set out in the HKPSG.</p>
<p>SA4(c) It is not cost-efficient to develop public housing at the site as the developable area will be small with inclusion of the set back from LRT track, noise mitigation measures and ancillary facilities (such as management office and carparks). The number of flats produced will be small which cannot help to address the shortage of public housing. Besides, the flat size will be small and may not comply with the design standards for public housing.</p>	<p>In response to the pressing demand for public housing, and with planning, infrastructure and environmental factors permitting, the Government will optimise the development potential of the land to increase the supply of public housing, taking into account the needs of existing and future residents.</p>
<p>SA4(d) The Government back tracked from implementing the planned GIC facilities at the representation site. It is suggested that the site could be used for provision of GIC and supporting facilities, such as library, markets, shopping mall, community garden, sports grounds and transport facilities etc.</p>	<p>The site is a vacant GL and is not designated for any GIC use. With regard to the facilities to be provided at the site, HD will work with the concerned Government departments to provide suitable facilities for residents, including recreation, open space, community, social welfare, educational or retail facilities in the proposed housing developments. In accordance with the established administrative procedure, HD will prepare planning brief for the proposed public housing developments to specify the detailed development parameters, GIC facilities and the amount of open space to be provided.</p>
<p>SA4(e) The housing development at the representation site is located 10m from the LRT track, which is not in line with HKPSG that no development within 25m from railway track is allowed. No assessment has been provided to demonstrate the site is suitable for housing development and not vulnerable to environmental impact and potential risk from the adjacent LRT.</p>	<p>(i) With regard to the potential railway noise impact, single aspect building design has been incorporated in the conceptual housing layout where no sensitive receiver will be facing the LRT track. Therefore, adverse railway noise impact to the proposed development at the site is not anticipated. Consideration could also be given to provide screening by means of building integrated noise barrier in the detailed design stage to further mitigate the potential noise impact.</p>
<p>SA4(f) The representation site is located adjacent to LRT and noise from rail operations could be of concern to the future residents. In</p>	

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>particular, the flats facing the LRT could be sensitive to the noise emitted from the nearby curved rail track. It is suggested that HD should assess and evaluate the potential noise impacts from the LRT as the site is located adjacent to LRT and noise from rail operations could be of concern to the future occupants. It is also suggested the noise assessment requirement should be imposed through Planning Brief, statutory plans and/or land administration documents and should be conducted to the satisfaction of the Director of Environmental Protection.</p>	<p>(ii) Besides, noise arisen from LRT is subject to control under the Noise Control Ordinance (Cap.400), and could be controlled through proper management and good practice.</p>
<p>SA4(g) The design of the noise barriers along Wong Chu Road is outdated. There are sound ‘leaks’ from the Road. The increase in traffic flow due to the additional population will aggravate the traffic noise impact on the adjacent housing developments, such as Siu Lun Court, Tsui Ning Garden, On Ting Estate and Yau Oi Estate.</p>	<p>The current enclosure design along Wong Chu Road is to satisfy requirements on practical fire-fighting with respect to unrestricted Dangerous Goods Vehicle passage. Apart from the enclosure, a number of mitigation measures such as vertical and cantilever noise barrier, as well as low noise surfacing on Wong Chu Road have been implemented to alleviate the traffic noise impact to Siu Lun Court, Tsui Ning Garden, On Ting Estate, and Yau Oi Estate. In view of various constraints such as firefighting and ventilation, it has been concluded that the implemented measures were the most effective and practicable options to alleviate the noise impact.</p>
<p>SA4(h) The proposed development will block the view from Tuen Mun River Channel. It is noted that rezoning application for Shatin Assembly of God Church was rejected by the Board as the proposed rezoning would block the view of Shing Mun River and the proposed 390 residential flats was insignificant and could not help much to address the housing demand. The current rezoning should be rejected based on the same reasons.</p>	<p>(i) The Study has examined the potential visual impact on Wu Shan Riverside Park and Tuen Mun River Channel arising from the proposed development at Hang Fu site. The proposed development would be seen as an extension of the existing high-rise residential developments, and is considered not incompatible with the existing and planned urban context. The provision of the two NBAs in the central and southern portions of the site would break up the elongated building mass and allow some visual relief and visual permeability (<b>Plan H-10d</b>).</p> <p>(ii) The rezoning application site for Shatin Assembly of God</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>Church is adjacent to Shing Mun River Channel. The case was rejected based on consideration of various factors and unique site circumstances. The two cases are different and should be considered on their individual merits.</p>
<p>SA4(i) Nerine Cove and Oceania Heights are equipped with full-height glasses. It is concerned about whether the proposed development at the site will have any impact on the two developments during extreme weather.</p>	<p>(i) The matter is not related to the Tuen Mun OZP which is to show the broad land use proposal.</p> <p>(ii) Design measures, such as setbacks and building separations, have been incorporated into the current conceptual housing layout with a view to alleviating the possible wind influence. Detailed building layout and design of the proposed housing developments will be worked out at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity.</p>
<p>SA4(j) The site does not comply with the requirements set out in HKPSG, including provision of a high quality built environment commensurate with the natural setting, lowering the building height to allow views to ridgelines, avoiding linear site disposition, protection of privacy and minimising visual, noise and air quality impact.</p>	<p>(i) On the concerns about blockage of natural ridgeline and visual impact caused by the proposed housing developments, according to the VIA, BH of the proposed developments would generally not affect the natural ridgelines when viewed from some long ranged viewpoints and sensitive design of all above ground structures in terms of scale, height and bulk and appropriate building materials and colour in built structures would be used to minimise the visual impact. Also, NBAs will be incorporated in the central portion and at the southern boundary of the site to serve as air paths/ visual corridors.</p> <p>(ii) The requirement of site disposition in HKPSG recommends that sites should be divided into parcels to avoid long and linear site geometry which could likely result in single-aspect and wall development not conducive to wind movements. As mentioned in response (ii) above, non-building areas will be incorporated in the site to serve as air paths and visual</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
	<p>corridors. It would break up the elongated building mass and allow visual relief and visual permeability. HD also advises that they will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity. Building separations will be provided as far as possible in accordance with the requirements set out in the B(P)R at detailed design stage by HD to minimise potential adverse air ventilation impact on the pedestrian wind environment and blockage of sunlight to adjacent development.</p> <p>(iii) With regard to the concerns about noise and air quality impact, response (ii) to Grounds A1 and A2 are relevant.</p>
<p>SA4(k) The representation site is close to the LRT track. Accidents, such as current leakage, fire and explosion may happen. Operation of LRT may be affected. Besides, maintenance of the façade and windows of the proposed development may affect maintenance of the LRT track, posing safety risk to LRT passengers.</p>	<p>To alleviate the potential impact to and from the LRT, single aspect building design was proposed in the latest conceptual layout plan to avoid windows facing the LRT tracks. Besides, according to HD, low maintenance and durable materials could be explored for use on the building façade as far as possible. The buildings will be designed in compliance with statutory requirements in terms of fire safety and rescue. With the provision of the above measures, safety operation of LRT could be enhanced.</p>
<p>SA4(l) There is concern about firefighting and rescue operation for the representation site and the adjacent development (i.e. Nerine Cove), given that the site is bounded by Hang Fu Street, which is a one-way internal road, and LRT track. It is also queried whether the rescue operation will affect the operation of LRT.</p>	<p>Fire Services Department advises that the emergency vehicular access provision in the subject site shall comply with the standard as stipulated in Section 6, Part D of the Code of Practice for Fire Safety in Buildings 2011 under the B(P)R 41D which is administered by the Buildings Department.</p>
<p>SA4(m) The proposed housing development will affect signal reception of adjacent developments. If antennae are installed at the proposed</p>	<p>The matter is not related to the Tuen Mun OZP which is to show the broad land use proposal.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
development, the health of residents will be affected.	
SA4(n) Usage of lift and footbridge between Nerine Cove and Oceania Heights will be increased and security of the two residential developments has to be enhanced due to the additional pedestrian flow generated by the proposed development. Management and maintenance fee of the two residential developments will be increased. It is unfair to the residents of these two developments.	The matter is not related to the Tuen Mun OZP which is to show the broad land use proposal. Besides, future residents of Hang Fu site can use the concerned facilities, and the pedestrian crossing near Goodview Garden LRT Station to cross the road. The said footbridge and pedestrian crossing are indicated on <b>Plan H-2d</b> .
SA4(o) It is the only site available in Castle Peak Bay area for holding local events, such as celebrate the birthday of Tin Hau. Rezoning of the site will destroy the local culture. The site should be reserved for local cultural activities.	To optimise utilisation of land resources, LandsD will consider applications from non-government organisations for temporary uses of vacant government land on short term basis for community, institutional or non-profit making purposes. Such applications will be considered based on prevailing land policy and their individual merits, and in any event shall not in any prejudice the long term use of the government land concerned.
<i>Pui Oi Site (Item A5)</i>	
SA5(a) It is suggested to conduct a risk assessment to evaluate the potential risk and determine the necessary mitigation measures as the representation site is in the close vicinity of an intermediate pressure B gas pipe running along Castle Peak Road and Castle Peak Bay.	Response to Ground SA3(q) is relevant.
<i>Item B Site</i>	
SB(a) Rezoning of the representation site from “GB” to “R(B)20” is considered not in line with the policy directive of “GB” Review as the site is neither devegetated, deserted nor formed, but of green buffer value that is acknowledged by the PlanD in the Landscape Assessment attached to the RNTPC Paper No. 9/17. The site is situated at a densely wooded slope with a total of 396 trees recorded therein according to the Landscape Assessment. Besides,	<p>(i) Responses (ii) and (iii) to Ground A9 is relevant.</p> <p>(ii) The Landscape Appraisal conducted for rezoning of the site has acknowledged the landscape character of the site will be changed from rural fringe character to urban residential landscape due to the proposed development. According to the Landscape Appraisal, the site is dominated by common tree</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
<p>although the site is located at the urban fringe amidst various existing or planned residential developments, it is of a good buffer value amongst all the adjacent built-up areas.</p>	<p>species and there are no OVTs within the Site. On the other hand, new landscape resources (such as landscape amenity space with tree planting, and slope greening treatment) would be required for holistic incorporation into the future design of the development.</p>
<p>SB(b) The proposed development at the representation site will involve substantial modification of existing topography. All the existing trees within the site will be affected. With a total of 396 no. of trees, its amenity and landscape value is very precious which deserves proper protection under the statutory planning framework by restoring its zoning as “GB”. Although possible landscape mitigation measures are proposed, such as 20m setback along the northern boundary and provision of a minimum of 30% green coverage as stipulated under PNAP APP 152, the landscape value of the site will be significantly diminished on a permanent basis.</p>	<p>(iii) If tree felling is considered necessary, the developer will be required to carry out tree survey and shall take and implement appropriate mitigation measures and compensatory proposal in accordance with the prevailing guidelines and tree preservation mechanism.</p>
<p>SB(c) The proposed development scale of the representation site is incompatible with the surrounding. The proposed plot ratio of 4 at the site is the highest amongst the residential sites in Tuen Mun East area. The proposed plot ratio lacks sound justifications in that the site is irregular in shape and small in size and is not located in close proximity to railway station. Besides, the proposed building height restriction of 90mPD abruptly disturbs the stepped building height profile increasing from the waterfront to the inland.</p>	<p>(i) The proposed PR of 4 for the site is in line with the development intensity for the adjoining “R(B)14” and “R(B)15” zones. While the development restrictions are specified in terms of maximum GFA, the PR for these two zones is in effect 4.</p> <p>(ii) According to the visual appraisal for the Proposed Amendments to the Approved Tuen Mun OZP No. S/TM/33 (Attachment VIII of RNTPC Paper No. 9/17), the proposed BH generally aligns with overall urban design principle in the area within profile stepping up from 54mPD near the coast (Spring Seaview Terrace) towards 85mPD in the inland (the “R(B)14”), and part of the development will be screened by existing buildings and vegetation. As such, the proposed development is not considered incompatible with the surrounding environment.</p>

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>SB(d) The representation site was rezoned from “R(B)” and “G/IC” to “GB” in 2009 under the draft Tuen Mun OZP No. S/TM/26 as the sites was considered not suitable for development due to presence of mature vegetation. The amendments were agreed by the Board in 2010. It clearly shows the determination of the Board to safeguard the mature vegetation at the site and to control further urban sprawl.</p>	<p>Responses (ii) and (iii) to Ground A9 are relevant.</p>
<p>SB(e) The proposed development, with a maximum PR of 4, will lead to additional traffic flow to the junction of So Kwun Wat Road and Castle Peak Road and aggravate the traffic congestion at the junction of Castle Peak Road/ Tsing Ying Road. The future proponent(s) of the site must be required to conduct the TIA and to implement the mitigation measures as identified in the assessment. It is requested that the requirement on submission of a traffic impact assessment should be incorporated into the lease of the site.</p>	<p>According to the Technical Review for the Proposed Amendments to the Approved Tuen Mun OZP No. S/TM/33 (Attachment VI of RNTPC Paper No. 9/17), the proposed junction improvement and road widening for the CPR-CPB could accommodate the traffic from the proposed private housing development under the current OZP amendments in Tuen Mun East, other potential housing developments and natural growth of traffic demand in Tuen Mun East. Detailed design will be carried out to affirm the proposed junction improvement arrangement and to make any necessary minor adjustment if necessary at later stage. TD advises that the overall development situation in Tuen Mun is monitored, and the traffic issues will be considered where appropriate.</p>
<p>SB(f) It is suggested to conduct a risk assessment to evaluate the potential risk and determine the necessary mitigation measures as the representation site is in the close vicinity of an intermediate pressure B gas pipe running along Castle Peak Road - Castle Peak Bay.</p>	<p>EMSD advises that intermediate pressure B gas pipe is not a notifiable gas installation. It is considered that a risk assessment is not a compulsory requirement in this case.</p>
<i>Item D1 Site</i>	
<p>SD(a) The proposed development will destroy the tranquil environment of So Kwun Wat village.</p>	<p>The proposed amendment is a technical amendment to reflect decision of the Board in September 2015 to approve a s.12A application to increase the development intensity of a comprehensive residential development.</p>

Major Grounds and Proposals of Representations	Responses of Government Departments
<i>Items F1 to F4 Sites</i>	
SF(a) Although the sites have been rezoned to “R(B)14” and “R(B)15” under the draft Tuen Mun OZP No. S/TM/32, they should be reserved for Crossroad Foundation. Besides, there are buildings with historic value and large trees within the “R(B)” zones.	The sites are intended for residential development. Crossroad Foundation is occupying the “R(B)14” site on a temporary basis. The Gurkha Temple is zoned “G/IC” and is proposed to be preserved and revitalised for community use. The Kesarbahadur Hall is of heritage value and will be preserved and revitalized as part of the residential development.
<b>Proposals</b>	
P(a) To retain the representation sites as “GB”, “G/IC” and “O”	Responses to Grounds A1, A2, A4 and A5 are relevant.
P(b) To rezone the GIC sites on both sides of Tuen Mun River Channel mouth for public housing development.	The “G/IC” sites on both sides of Tuen Mun River Channel mouth ( <b>Plan H-6b</b> ) have been reserved for open space and other uses. They are not available for public housing development.
<i>Proposals for Specific Sites</i>	
P(c) To rezone the Wu Shan site to “G/IC” use for provision of Integrated Government Services Building comprising elderly services, library, swimming pool, sports centre, performance centre and government offices. The site could also be used for a park and for supporting youth’s creative activities.	Response (iii) to Grounds A1 and A2 is relevant.
P(d) To rezone the Wu Shan site for commercial use to support the development strategy of Guangdong-Hong Kong-Macao Greater Bay Area.	Response (ii) to Grounds A4 and A5 is relevant.
P(e) To rezone TTST site to “R(B)” or for low density residential development.	Response (ii) to Grounds A4 and A5 is relevant.
P(f) The maximum building height of TTST site should be reduced from 145mPD to 100mPD.	Response (ii) to Grounds A4 and A5 and response (i) to Ground G2 are relevant.

<b>Major Grounds and Proposals of Representations</b>	<b>Responses of Government Departments</b>
<p>P(g) To rezone Hang Fu site to “GB” to match with the proposed sports grounds in Area 16.</p>	<p>The planning intention of “GB” is primarily for defining the limits of urban and sub-urban development areas by natural features and to contain urban sprawl as well as provide passive recreational outlets. Hang Fu site is located at the developed area within Tuen Mun new town, which does not have the character of “GB” zone.</p>

**Summary of Comments and Government Departments' Responses**

The major grounds and proposals of comments C1 to C1636 and C1638 to C2860 as well as responses of Government departments are summarised below:

Major Grounds of Comments	Responses of Government Departments
<i>A. Comprehensive Planning and Housing Supply/ Mix</i>	
<p>A1. There is no comprehensive planning for Tuen Mun. Population density is too high in the area. Capacity of road network, infrastructure, Government, Institution or Community (GIC) facilities, open space and other supporting facilities etc. has been already overloaded. Quality of life of local residents will worsen as a result of the infill housing developments. The deficient facilities should be addressed first. Government's proposal is against the principle of sustainable development and the rezoning is ad hoc and unjust in nature.</p>	<p>(i) Housing is one of the most important livelihood issues to be addressed by the Government. It was stated in the Policy Address that the Government would adopted a multi-pronged approach to identify suitable land to meet housing and other needs. To optimise the use of land, the Government has continued reviewing various land uses and rezoning sites as appropriate and, where the original intended use is no longer required, converting the land for housing development. The Government's land use reviews cover all districts in Hong Kong and not limited to Tuen Mun District. Amongst the total 210 sites identified for rezoning in the short to medium term, about <del>30</del> 20 sites (including the six housing sites under Items A1 to A5 and B) are in Tuen Mun District while the remaining distribute amongst the other 17 districts in Hong Kong.</p> <p>(ii) For the public housing sites (Item A1 to Item A5) under the draft Tuen Mun OZP No. S/TM/34, the Civil Engineering and Development Department (CEDD) has undertaken 'Preliminary Development Review for Housing Sites at Tuen Mun Central – Feasibility Study' ('the Study') to assess the impact on Tuen Mun arising from the proposed public housing on aspects like transport, environment, infrastructure, ecological, visual, air ventilation and landscape. The Study has taken into account the existing and planned developments and infrastructures in the district and concludes that there is no insurmountable technical problem for the proposed public</p>
<p>A2. The document and assessments for supporting the rezoning did not comprehensively examine the overall impact on Tuen Mun with the addition of population arising from the rezoning and other planned developments in the area. The information contained in the document and assessments are biased/ misleading.</p>	

Major Grounds of Comments	Responses of Government Departments
	<p>housing developments in the Tuen Mun Central sites. As for the housing site in Tuen Mun East (Item B), the Government has also assessed the proposed development on traffic, sewerage, drainage and water supply, air ventilation, visual and lanscape aspects. Relevant Government departments had been consulted and confirmed that there is no insurmountable technical problem for the proposed housing development in Tuen Mun East.</p> <p>(iii) The existing and planned provision of GIC facilities and open space are generally adequate to meet the demand of the overall planned population of Tuen Mun in accordance with the requirements of Hong Kong Planning Standards and Guidelines (HKPSG) (<b>Annex X</b>). Planning Department (PlanD) will liaise with relevant bureaux/departments to review the GIC facilities and open space provision in the area from time to time. Follow-up action will be taken by PlanD if relevant bureaux/ departments request for sites for provision of GIC facilities. Housing Department (HD) will work with the concerned Government departments to provide suitable supporting facilities for residents, including recreation, open space, community, social welfare, education and retail facilities in the proposed housing developments. HD will also consult Tuen Mun District Council (TMDC) on the latest position of the development schemes during the design stage.</p>
<p>A3. Increase in housing land supply is not effective to alleviate housing shortage. In the past years, the Government had focused on increase in land supply by rezoning. However, the property price is still going up and the shortage has not been resolved. Housing shortage cannot be addressed only by building more flats.</p>	<p>(i) As committed in the Policy Address announced in October 2017, to increase land supply is a must, be it about people's home ownership problems or improving their living conditions. Over the years, the Government has proposed many strategies for increasing land supply including reclamation outside the Victoria Harbour, and is actively pursuing New Development Area (NDA) projects, which cover brownfield sites such as</p>

Major Grounds of Comments	Responses of Government Departments
	<p>Hung Shui Kiu NDA.</p> <p>(ii) For the current rezoning exercises, five of the six housing sites under the current rezoning are for public housing development. As advised by HD, the public housing demand is acute. As at end-March 2018, there were about 153,300 general applications for public rental housing, and about 119,000 non-elderly one-person applications under the Quota and Points System. The average waiting time for general applicant is 5.1 years. Based on the latest projection under the Long Term Housing Strategy Annual Progress Report 2017, the Government's public housing target is 280,000 units for the ten-year period from 2018-19 to 2027-28, and the split between public rental housing and subsidised sale flat is 200,000 and 80,000 units respectively. As of December 2017, assuming that all sites identified can be smoothly delivered on time for housing developments, the Government has identified land for construction of about 247,000 public housing units for then ten-year period from 2018-19 to 2027-28. This lags behind the ten year supply target of 280,000 units. For this reason, HD is in dire need of sufficient land for public housing development to meet the LTHS's public housing supply target and there is a genuine need to use the five public housing sites for public housing purpose.</p>
<p>A4. The Government should consider other land resources/ alternatives for housing developments, such as brownfield sites, golf course in Fanling, idle military camp, sites being used as private club, sites in Hong Kong Island, sites at the periphery of country parks, vacant school sites, agricultural land owned by private developers, the sites at Kai Tak and reclamation etc. Besides, there are plenty of sites within Tuen Mun for development, including vacant Government land available for rent of about 321,724m<sup>2</sup>, "Village Type</p>	<p>(i) Over the years, the Government has adopted multi-pronged approach for increasing land supply, including reclamation outside the Victoria Harbour, intensification of the development potential of sites in urban area and is actively pursuing New Development Area (NDA) projects which cover brownfield sites such as Hung Shui Kiu NDA. Notwithstanding these efforts, the Government still needs to continue taking forward other land supply measures for</p>

Major Grounds of Comments	Responses of Government Departments
<p>Development” zone, Government sites and “Comprehensive Development Area” zone of about 66,835m<sup>2</sup>, as well as reserved sites for HD of about 11,140m<sup>2</sup>. The Government is wasting land resource.</p>	<p>meeting the housing and other development needs. The most immediate and effective way to augment housing land supply in the short to medium term is to make more optimal use of the developed areas in the existing urban areas and new towns, as well as nearby land in the vicinity of existing infrastructure.</p> <p>(ii) Regarding the other land resources/ alternative sites suggested by some representers, most of them are not available for development in the near future because they are either private land, currently occupied by existing government facilities under operation, pending comprehensive land use review, or already committed for other uses.</p> <p>(iii) Notwithstanding the above, it has always been Housing Authority’s intention to consider any suitable sites across the territory for public housing development. If suitable land is identified, the Government will need to complete all procedures, which include conducting technical feasibility studies, carrying out public consultation, rezoning, seeking funding approval from Legislative Council (LegCo) and executing relevant works etc.</p>
<p>A5. There are alternative sites in Tuen Mun that can be used for housing developments, including the bus depot in Area 16, the site opposite to Waldorf Garden across Castle Peak Road, Tuen Mun Golf Course and Archery Range, the site opposite to Goodview Garden, the empty market near Primeview Garden, Liu Yuen (柳園), the knoll near Tin Hau Temple and various government land currently under short term tenancy (STT) and temporary vacant government sites available for greening/ community uses etc.</p>	<p>The alternative sites suggested by commenters (<b>Plans H-6a, H-6b and H-7</b>) are not suitable/available for development because they are either currently occupied by existing government facilities, already committed for other uses, subject to development constraints or privately owned.</p>
<p>A6. The Government should stop land sale to address the acute shortage of public housing flats.</p>	<p>There is an imminent need for both public and private housing. The sites on the land sale programme are to meet the demand for private</p>

Major Grounds of Comments	Responses of Government Departments
	housing.
<p>A7. The rezoning of “Green Belt” (“GB”) sites for housing developments will set an undesirable precedent. The Government has rezoned many “GB” sites for housing developments since 2014 without any Environmental Assessment for assessing the overall impact on Hong Kong. Ecological impact is uncertain.</p>	<p>(i) Response (i) to Ground A4 is relevant.</p> <p>(ii) Under Government’s multi-pronged approach to increase land supply with a view to meeting housing and other development needs, “GB” sites close to developed areas or public roads, which have relatively less buffering effect and lower conservation value, and close to supporting infrastructure facilities, such as transport, water supply and sewerage, would be reviewed for housing purpose.</p> <p>(iii) In considering if the “GB” sites are suitable for development, concerned Government departments will examine if the development would bring about significant adverse impacts on the surroundings and if necessary, technical assessments would be carried out to ascertain these impacts and devise mitigating measures to minimize the potential impacts. Relevant considerations including transport and infrastructure capacity, provision of community facilities and open space, appropriate development restrictions, local character and existing development intensity, potential environmental, visual and air ventilation impacts etc. have been taken into account in the “GB” review. Based on the above and in consideration of the assessments conducted, the sites involving “GB” under the proposed amendments are identified as suitable for housing development.</p> <p>(iv) Since 2014, the area zoned “GB” on the Tuen Mun OZP has been reduced by about 1.7% from about 745 ha to 732 ha. The amendments will not affect the overall integrity of the “GB” zone or jeopardize its function to contain urban sprawl.</p>

Major Grounds of Comments	Responses of Government Departments
<p>A8. The “GB”, “G/IC” and “Open Space” (“O”) sites proposed for rezoning for housing development are lost without compensation in the current rezoning exercise. The Government should not rezone GIC land for other uses. The Board should evaluate the impacts on the community but not only concerned on the provision of housing.</p>	<p>(i) On the concerns about “GB” zone, responses (ii), (iii) and (iv) to Ground A7 are relevant.</p> <p>(ii) As for the concern about “G/IC” and “O” zone, response (iii) to Grounds A1 and A2 is relevant.</p>
<p>A9. There are about 130,000 residents in Tuen Mun with place of work in other districts. There are insufficient job opportunities in Tuen Mun. Land should be reserved for commercial use in order to create job opportunities in the area.</p>	<p>The supporting commercial and community facilities associated with the proposed public housing developments would generate new job opportunities. No commercial or industrial sites are affected by the rezoning. Besides, the Hung Shui Kiu NDA to the north of Tuen Mun would also generate about 150,000 job opportunities.</p>
<i>B. Suitability of the Sites for Public Housing Development</i>	
<p>B1. It is too costly for public housing residents to live in Tuen Mun. The Government should change the public housing sites for private housing development.</p>	<p>Response (ii) to Ground A3 above is relevant.</p>
<p>B2. No information is provided to justify why the representation sites are suitable for public housing developments. The proposed public housing developments at Hang Fu site is incompatible with the surrounding private housing neighbourhood.</p>	<p>(i) Responses (i), (ii) and (iii) to Grounds A1 and A2 are relevant.</p> <p>(ii) Response (ii) to Ground A3 is also relevant.</p>
<p>B3. The planning intention of Tuen Mun town centre is for private development. This is also the reason of redevelopment of San Fat Estate. The proposed public housing development at TTST site (Item A3) is in conflict with the planning intention of Tuen Mun town centre.</p>	<p>(i) Response (ii) to Ground A3 is also relevant.</p> <p>(ii) Tuen Mun town centre consists of a mixture of high-density public and private residential, commercial/ retail developments with open space (Tuen Mun Park) and GIC facilities. This serves as a major focal area for economic, social and civic activities in Tuen Mun New Town.</p>

Major Grounds of Comments	Responses of Government Departments
	(iii) The proposed public housing development will not be incompatible with the mix of uses.
<i>C. Traffic and Transport</i>	
<p>C1. The road network of Tuen Mun is overloaded. Traffic congestion at major roads, including Wong Chu Road, Lung Mun Road, Tuen Mun Road and Castle Peak Road is severe. Besides, the traffic at the junction between Castle Peak Road- Castle Peak Bay and Tuen Hing Road (Tsuen Wan bound) is always busy. The situation would be aggravated by the proposed housing developments and after the opening of Hong Kong-Zhuhai-Macao Bridge. The traffic congestion will also affect the timely provision of emergency services.</p>	<p>(i) Traffic impact assessment (TIA) has been conducted as part of the Study. The TIA has taken into account the changes of the traffic pattern due to the commissioning of Tuen Mun - Chek Lap Kok Link and Hong Kong-Zhuhai-Macao Bridge Hong Kong Link Road. It concludes that even taking into account the said road infrastructure and Hung Shui Kiu NDA, the impact on major road network, including Tuen Mun Road, and Wong Chu Road, is manageable.</p> <p>(ii) With the implementation of the proposed traffic arrangement and junction improvement works (<b>Plans H-9a to H-9g</b>), there is no insurmountable technical problem arising from the proposed public housing developments.</p> <p>(iii) For the longer future, there would be a number of major transport infrastructure projects in Tuen Mun, which included the proposed Tuen Mun Western Bypass ('TMWB') and Route 11 (<b>Plan H-8</b>). On TMWB, the Government had started the investigation study and preliminary design for the implementation of the plan. For Route 11, Highways Department (HyD) commenced the Feasibility Study in May 2018.</p>
<p>C2. Public transport services are insufficient. The LRT and West Rail are overcrowded. Residents found it difficult to get onto the trains. Even if West Rail trains have increased from 7 to 8 compartments, the trains are still very congested. The Technical Assessment Report did not provide any assessment on carrying capacity of West Rail with the additional population nor the</p>	<p>(i) Starting from 2016, trains of the WRL have been progressively changing from 7-car to 8-car, representing an increase in at least 14% capacity comparing with the capacity in 2015. After mid-2019, subject to the actual patronage, the fleet size of the West Rail can be further increased until reaching its ultimate capacity by operating with 8-car trains with an hourly</p>

Major Grounds of Comments	Responses of Government Departments
<p>timeline for implementation of the proposed improvement measures be implemented.</p>	<p>frequency of 28 at each direction. On this basis, the carrying capacity of the West Rail will increase by 60% comparing with the capacity in 2015.</p> <p>(ii) As for LRT, the Public Transport Strategy Study released by Transport and Housing Bureau (THB) in June 2017 suggested a number of measures to improve the capacity of the LRT in short, medium and long run, in order to satisfy the public transport need of Northwest New Territories. The Government is following up relevant measures, together with the MTR Corporation.</p> <p>(iii) According to the TIA under the Study, the existing bus services should have spare capacity to cater for the public transport demand generated by additional population. Bus layby has been planned in some representation sites to cater for the demand of public transport arising from the proposed housing developments (<b>Plans H-9a, H-9b and H-9c</b>).</p> <p>(iv) TD will closely monitor the construction progress and completion dates of the five proposed public housing developments, and consider increasing appropriate public transport services having regard to population change, local development, prevailing condition of public transport services, passenger volume and passengers' needs, etc. Coupled with the proposed public transport infrastructures, such as provision/extension of bus lay-by and taxi stands, as well as improvement works to enhance the pedestrian accessibility to nearby public transport facilities, the public transport demand could be met.</p>
<p>C3. There are concerns about traffic safety during construction and operation of the proposed developments.</p>	<p>(i) CEDD/HD will consider necessary temporary traffic arrangement at specific major junctions and roads according to the actual situation during construction so as to ensure that they</p>

Major Grounds of Comments	Responses of Government Departments
	<p>could operate with spare capacity.</p> <p>(ii) The design and construction of the roads, traffic signs and road markings in Hong Kong are designed and constructed in accordance with international standards. Besides, TD improves traffic facilities and traffic management on an on-going basis to further enhance road safety.</p>
<p>C4. Specific comments/ views on traffic/ transport related issues:</p> <p>(i) It is proposed to provide railway connections between Tuen Mun and Tsuen Wan and extension of West Rail to Tuen Mun Ferry Pier.</p>	<p>(i) Having regard to the indicative implementation window recommended in the Railway Development Strategy, THB had invited the MTR Corporation Limited (MTRCL) to submit a proposal for the implementation of the Tuen Mun South Extension (<b>Plan H-8</b>). The MTRCL submitted a proposal for this project in end December 2016. THB, HyD and relevant bureaux/ departments are evaluating the proposal and have requested the MTRCL to provide additional information and supplement details of the proposal in order to ensure that its proposal will be practically feasible can bring maximum benefit to the community. THB aims to consult the public on the detailed alignment, station location, mode of implementation, cost estimate, mode of financing and actual implementation timetable of the Tuen Mun South Extension within 2018.</p> <p>(ii) Feasibility of constructing a railway along the coastline between Tuen Mun and Tsuen Wan was evaluated during formulation of the RDS-2014. The findings are that the local population is mainly concentrated at the eastern and western ends of the coastline between Tuen Mun and Tsuen Wan; whilst the development density of the remaining areas is relatively low and no basis for new source of passengers is anticipated. Meanwhile, due to the technical difficulties involved, the</p>

Major Grounds of Comments	Responses of Government Departments
	<p>construction cost of a railway along the coastline between Tuen Mun and Tsuen Wan is expected to be very high. The cost-effectiveness can hardly be established. Furthermore, after the completion of the improvement works for Tuen Mun Road in 2014, the road network between Tuen Mun and the urban areas has been further improved. This helped shorten the journey time for the bus services between Tuen Mun and the urban areas. Insofar as time savings were concerned, more passengers may prefer to travel to and from Tuen Mun by buses, making the railway scheme relatively less attractive. Besides, implementation of this scheme will create negative visual and landscape impacts along the scenic coastal areas. In longer term, THB would consider revisiting the railway proposal if there are further changes in the planning circumstances and population as well as an increase in transport demand in the coastal areas between Tuen Mun and Tsuen Wan, or other relevant new considerations in the planning for development in the region.</p>
<i>D. Open Space, GIC, Commercial and Supporting Facilities</i>	
<p>D1. GIC facilities, including hospital beds, clinics, sport facilities and open space etc., are in deficit in Tuen Mun. The deficiency will be aggravated by addition of population. The proposed housing developments would undermine the interests and affect the livelihood of the existing residents as the additional population will impose pressure on the existing facilities. There is insufficient pet garden facility in Tuen Mun. No proposals are provided in the current rezoning to alleviate the deficiency. Sufficient GIC facilities should be provided in accordance with HKPSG before putting forward any housing development proposals.</p>	<p>(i) The provision of GIC facilities within the planning scheme area of Tuen Mun OZP has been assessed. Based on HKPSG requirements and a planned population of about 572,500, including the population of the six housing sites, the GIC facilities and open space provision are generally sufficient except clinic/ health centre (<b>Annex X</b>). PlanD will liaise with relevant bureaux/departments to review the GIC facilities and open space provision in the area from time to time. Follow-up action will be taken by PlanD if relevant bureaux/ departments request for sites for provision of GIC facilities.</p>
<p>D2. It is proposed to use the representation sites for provision of GIC or recreational facilities, such as elderly facilities, children</p>	<p>(ii) On provision of clinic/ health centre, Food and Health Bureau (FHB) and the Hospital Authority (HA) are planning to</p>

Major Grounds of Comments	Responses of Government Departments
playground, public markets and library etc.	
<p>D3. Specific comments on GIC facilities provision</p> <p>(i) to build a new hospital in Tuen Mun.</p> <p>(ii) to build a sports ground near Tuen Mun Ferry Pier.</p>	<p>develop a sizeable Community Health Centre in the public housing development project in Tuen Mun Area 29 West led by HD. Meanwhile, the concerned Government department is exploring the proposal of redevelopment of the Tuen Mun Clinic site (where the HA's Tuen Mun Clinic is located) and undergoing initial assessment on the land use. To cater for the long-term medical needs of the district, a site in Tuen Mun Area 3 has been reserved for clinic development in the long run. Taking into account the population growth and the five existing/planned clinics, there will be a deficit of about 0.7 clinic. HA will continue to increase the service capacity of General Out-Patient Clinics subject to resources and manpower availability.</p> <p>(iii) With regard to the concerns about hospital services, HA plans its services on cluster basis. The New Territories West (NTW) cluster covers the service requirement from residents in Tuen Mun and Yuen Long Districts. In service planning, HA takes into account a number of factors, including the increase of service demand as a result of population growth and demographic changes, advancement of medical technology, manpower availability as well as organisation of services of the clusters and hospitals. Population is only one of the factors for consideration. HA monitors the service utilisation and updates the service demand projection regularly according to the latest population projection parameters and development plan of the Government.</p> <p>(iv) As stated in the Clinical Services Plan for NTW Cluster published in 2017, Tin Shui Wai Hospital has commenced operation in the first quarter of 2017 by phases. It will provide 300 hospital beds when it comes into full operation. In the long run, the HA would consider making use of the</p>

Major Grounds of Comments	Responses of Government Departments
	<p>adjoining site of TSWH for future expansion of the hospital to further increase service capacity. The construction of an extension to the Operating Theatre Block of Tuen Mun Hospital, which is the major acute hospital in the cluster, is underway. At the same time, in the light of an increasing demand for healthcare services, the Government has invited HA to start planning the second 10-year hospital development plan. The Government has also reserved a site at Hung Shui Kiu NDA for the construction of a new hospital to meet the growing healthcare demand of the population in NTW.</p> <p>(v) On the concern about insufficient primary school, generally speaking, EDB makes projections on the supply and demand of different types of school places having regard to the forecast growth and movement of population provided by relevant Government departments (including the Census and Statistics Department, PlanD and HD), relevant requirements in HKPSG, and prevailing education policies. EDB will make suitable adjustments in reserving sites for construction of schools for districts with persistent shortfall or surplus of school places.</p>
<i>E. Environmental, Air Ventilation and Ecological Aspects</i>	
E1. Air and noise pollution will be aggravated due to the increase in population and traffic in the area.	Response (ii) to Grounds A1 and A2 is relevant.
E2. Concerned about the environmental impact on the surrounding developments during construction and operation of the proposed developments.	
E3. Ecological Impact Assessment and Environmental Impact Assessment covering direct and indirect impacts should be conducted and relevant departments should be consulted.	The Study has assessed the potential ecological and environmental impacts arising from the proposed public housing developments. Relevant departments, including EPD and AFCD, have been consulted and had no comment on the assessments.

Major Grounds of Comments	Responses of Government Departments
<p>E4. Conclusion of the Ecological Impact Assessment undertaken by the Government is questionable as the assessment is only conducted in day time and during particular seasons. Many rare animal species only appear at night and may only appear during particular seasons.</p>	<p>Although the housing projects are not designated projects under Environmental Impact Assessment Ordinance, the approach and methodology of the ecological assessment under the Study have followed that for normal Environmental Impact Assessment (EIA) studies. Literature review and ecological surveys for major wildlife groups were conducted similar to other EIA studies. No major inadequacies were observed. According to the Study, call of an owl species was recorded in shrubland habitat within Tai Lam Country Park during night survey. Night survey has been conducted for assessing the ecological impact of the associated residential development. AFCDD has been consulted and has no adverse comments on the assessment.</p>
<p>E5. The proposed developments will create a wall-like feature. Coupled with the narrow separation from the adjacent developments, it will block air ventilation in the area, consequently affect air flow, increase concentration of pollutants, and create heat island effect. Living quality in the area and health of the existing residents will be adversely affected. Air ventilation impact on adjacent residential developments should be assessed.</p>	<p>(i) The likely impacts of the five public housing sites on the pedestrian wind environment were assessed under the Study and ‘Air Ventilation Assessment (Expert Evaluation) (AVA(EE) for Tuen Mun New Town (2014)’. An AVA(EE) is also conducted for the proposed private housing development at the site under Item B.</p> <p>(ii) Various design measures have been incorporated in the conceptual housing layouts of the five public housing sites, such as building separation, building setback and site coverage of greenery to enhance the environmental sustainability of the living space and mitigate the heat island effect, which generally follow the recommendations in Practice Notes for Authorized Persons, Registered Structural Engineers and Registered Geotechnical Engineers (PNAP) APP-152 (Sustainable Building Design Guidelines). The current analysis and mitigation measures proposed are based on the current conceptual layout, thus representing a basic feature of the housing sites. Further measures together with other variations</p>

Major Grounds of Comments	Responses of Government Departments
	<p>in design can be explored and evaluated in the detailed design stage. HD advises that quantitative air ventilation assessments will be carried out at the detailed design stage to demonstrate that the wind performance of the future schemes is no worse off than the current scheme for scheme optimisation.</p> <p>(iii) As for the private housing site (Item B) in Tuen Mun East, the AVA(E) has recommended mitigation measures including provisions of setback area, non-building areas (NBAs) (15m) as well as adoption of design principles in accordance with the PNAP APP-152. Subject to the incorporation of the recommended mitigation measures, the proposed development is unlikely to impose significant air ventilation impact on the surrounding areas.</p>
<p>E6. Capacity of the existing infrastructure, such as drainage and sewerage system, cannot cope with the additional population. Detailed assessment regarding water reserve and water pumping shall be conducted.</p>	<p>Response (ii) to Grounds A1 and A2 is relevant.</p>
<i>F. Landscape and Visual Aspects</i>	
<p>F1. Lots of trees will be felled due to the proposed developments. It is against the principle of environmental conservation.</p>	<p>(i) Clearance of trees is inevitable for development of the representation sites. According to the Study, about 1,072 trees would be potentially affected by the public housing developments and their associated infrastructure. There are no Old and Valuable Trees (OVTs) identified within the proposed public housing sites and all potentially affected trees are of common species in Hong Kong with no specific conservation interests.</p> <p>(ii) While details of the proposed tree treatment (i.e. no. of trees to be felled, retained or transplanted) is subject to detailed design of the proposed housing developments, landscape mitigation</p>

Major Grounds of Comments	Responses of Government Departments
	<p>measures such as transplanting trees of high amenity value, compensatory planting in a ratio of not less than 1:1 in terms of number in accordance with Development Bureau Technical Circular (Works) (DEVB TCW) No. 7/2015 – Tree Preservation, and provision of 20% to 30% greening areas within the development sites are recommended by the Study.</p> <p>(iii) For Item B site, the landscape assessment conducted for rezoning of the site has acknowledged that site clearance and removal of the existing trees (about 396 nos.) within the development site area would be extensive and unavoidable for the proposed housing development. If tree felling is considered necessary, the developer will be required to carry out tree survey and shall take and implement appropriate mitigation measures and compensatory proposal in accordance with the prevailing guidelines and tree preservation mechanism.</p>
<p>F2. The proposed developments will generate adverse visual impact to the surrounding areas. The visual amenity of the representation sites will be changed from a soft landscape feature to concrete structures. The natural character of the area will be destroyed.</p>	<p>(i) The proposed housing development would inevitably impose significant visual changes to the sites.</p> <p>(ii) Visual Impact Assessment (VIA) has been conducted in the Study. The VIA has assessed the visual impact on the viewing points frequently visited by the public, including MacLehose Trail, Castle Peak Beach, promenade of Tuen Mun River Channel and Tuen Mun Town Centre. The VIA concluded that the proposed developments would inevitably impose significant visual changes to the townscape due to blockage of open distance views from some viewpoints, loss of visual openness and degree of visual obstruction. Nonetheless, the visual composition of the proposed developments is not incompatible with the existing and planned urban context of Tuen Mun Central, which is predominately medium-to</p>
<p>F3. The proposed development at the representation sites will create a wall-like building which will block the views of adjacent developments.</p>	

Major Grounds of Comments	Responses of Government Departments
	<p>high-rise residential developments mixed with GIC uses. With implementation of proposed mitigation measures (such as creation of building separations, variations of building heights, etc), it is predicted that the overall visual impact of these housing sites would be moderately adverse. As such, further mitigation measures will be explored at the detailed design stage to effectively reduce the potential visual impact of the proposed developments. <b>(Plans H-10a to H-10e)</b></p> <p>(iii) For Item B site, the proposed development will inevitably lead to a reduction of visual openness to the immediate vicinity of proposed development. Two strips of NBAs (15m) are proposed from southwest to northeast to serve as air paths which can also serve as visual corridors. The NBAs can help to increase the visual permeability of the proposed development. While the overall townscape at the locality has been transformed to a medium density residential area, the proposed housing development would not be visually incompatible in the transformed context, and significant visual impact due to the proposed rezoning is not anticipated. <b>(Plan H-10f)</b></p>
<p>F4. The Visual Impact Assessment did not assess the visual impact on the adjacent developments, in particular the views from the adjacent developments on the representation sites.</p>	<p>(i) The VIA was conducted in accordance with the methodology set out in the Town Planning Board Guidelines No. 41 for Submission of VIA for Planning Applications to the Board (TPB-PG No. 41). As set out in the guidelines, in the highly developed context of Hong Kong, it is not practical to protect private views without stifling development opportunity and balancing other relevant consideration. In the interests of the public, it is far more important to protect public views, particularly those easily accessible and popular to the public or tourists.</p>

Major Grounds of Comments	Responses of Government Departments
	(ii) The VIA under the Study has assessed the visual impact on the viewing points frequently visited by the public, including MacLehose Trail, Castle Peak Beach, promenade of Tuen Mun River Channel and Tuen Mun Town Centre.
<i>G. Consultation Procedures</i>	
<p>G1. The Government neglected the objections from Tuen Mun District Council (TMDC) on the amendments items raised at the meetings on 5.9.2017 and 7.11.2017.</p>	<p>(i) In the TMDC meeting on 5.9.2017, the DC raised strong objections to the proposed amendments and passed two amended motions which objected to three of the housing sites namely Wu Shan (Item A1), Kau Hui (Item A2) and Hang Fu (Item A4); and all of the six housing sites. The views and concerns raised by TMDC members as well as draft minutes of the meeting together with a letter submitted by the DC Chairman dated 12.9.2017 informing that two amended motions were passed in the TMDC meeting on 5.9.2017 and requesting the Board to consider TMDC's comments on the proposed amendments were incorporated into the RNTPC Paper No. 9/17 for the proposed amendments to the approved Tuen Mun OZP No. S/TM/33 for consideration of the Board Members.</p> <p>(ii) In the RNTPC meeting on 13.10.2017, Members noted that TMDC had raised strong objection to the proposed amendments. On the consideration that TMDC would be consulted again after gazettal of the draft OZP and the Board could take into account TMDC's further views, if any, before making a decision on the OZP prior to its submission to the Chief Executive in Council for approval, Members in general considered it appropriate to publish the OZP for public inspection so as to collect views from the public on the proposed amendments (<b>Annex VI</b>).</p> <p>(iii) Upon gazettal of the draft Tuen Mun OZP No. S/TM/34, PlanD</p>

Major Grounds of Comments	Responses of Government Departments
	made a presentation to TMDC on the proposed amendments to the TMOZP at TMDC meeting on 7.11.2017. TMDC maintained their opposing stances on grounds of insufficient transport / infrastructure and GIC facilities. Their views, relevant extract of minutes of meetings of TMDC, and the representation made by TMDC have been incorporated into this Paper ( <b>Annexes IV and VII</b> ).
G2. Stakeholders, especially the users of Yau Chong Home (a welfare facility in Pui Oi site (Item A5) were not consulted before the rezoning.	<p>(i) The established public consultation procedures for OZP amendments had been followed for the present case. TMDC and Tuen Mun Rural Committee (TMRC) were consulted before RNTPC's consideration of the proposed amendments. On the consultation with villagers and local residents, PlanD, CEDD and HD had attended meetings with TMRC on 9.12.2017 and five local forums/meetings with residents organised by TMDC members after gazettal of the draft OZP on 28.11.2017, 5.12.2017, 15.12.2017, 7.1.2018 and 27.1.2018.</p> <p>(ii) The proposed amendments were incorporated into the draft OZP and published for exhibition for two months according to the provisions of the Town Planning Ordinance. Members of the public had been given the opportunity to provide views on the amendments. All valid representers and commenters had been invited to the Board to present their views.</p>
G3. The rezoning of the representation sites was not properly carried out. Residents may resort to judicial review.	Responses to Ground G2 above are relevant.
<i>H. Others</i>	
H1. The government should look into the source of population growth and formulate population policy in order to achieve sustainable development.	Responses to Ground A3 above are relevant.

Major Grounds of Comments	Responses of Government Departments
<p>H2. The Gist of Representation published by the Town Planning Board (the Board) has grouped 11 supporting representations on Item A4 in one group but also put thousands of adverse representations on Item A4 in one group. It will affect the public perception and it may mislead the Board.</p>	<p>The Gist of Representations is to provide a quick reference for the general public on the main points/proposals of the representations to facilitate public inspection and to provide comments. Moreover, the gist is not meant to be an exhaustive list of representation grounds/proposals. Full set of representations and comments received had been made available for public inspection at the Planning Enquiry Counters of PlanD as well as deposited at the Secretariat for Board Members' inspection.</p>
<p>H3. The Gist of Representation also fails to reflect a representer's viewpoints on Item A4. It is misleading to count all signatures against Item A4 submitted by the same representer as one representation.</p>	
<p>H4. There are many vacant residential flats in Hong Kong. The Government should propose measures to increase the occupancy rate of existing residential units.</p>	<p>Response (i) to Grounds A1 and A2 is relevant. Besides, the issue is not related to the land use proposals on OZP.</p>
<b>Adverse Comments on Specific Sites</b>	
<i>TTST Site (Item A3)</i>	
<p>SA3(a) There are a lot of trees, vegetation and animals within the "GB" zone where the representation site is located. It is indispensable to the community and cannot be replaced.</p>	<p>The Study conducted for the housing development indicates that mammals like Short-nosed Fruit Bat (短吻果蝠) and Pallas's Squirrel (赤腹松鼠) were found at the site. While these mammals are protected under Wild Animals Protection Ordinance (Cap.170), they are common and widely distributed in Hong Kong. In addition, the Study also indicates that no flora species of conservation importance were recorded in woodland of the site. As such, TTST site is unlikely to be of particularly high ecological value. AFCD has been consulted and has no adverse comments on the Study.</p>
<p>SA3(b) Concerned about extensive site formation works and tree felling will be involved for construction of the proposed housing development at the representation site:</p> <p>(i) High construction cost and long construction period will be</p>	<p><u>Construction Cost</u></p> <p>(i) In response to the pressing demand for public housing, and with planning, infrastructure and environmental factors permitting, the Government will optimise the development</p>

Major Grounds of Comments	Responses of Government Departments
<p>involved. It is not cost effective to develop public housing at the site. Queried why the site had been selected for housing development;</p> <p>(ii) it would cause adverse environmental impact, such as noise and air pollution, and contamination of underground water, which may affect the ecology of the adjacent area, and users of Tai Lam Country Park.</p> <p>(iii) it will also affect slope stability and consequently pose safety risk to nearby residents and the adjacent Tuen Mun Fresh Water Service Reservoir. It is suggested that slope stability works should be carried out for Villa Tiara.</p>	<p>potential of the land to increase the supply of public housing, taking into account the needs of existing and future residents.</p> <p><u>Environmental Impact</u></p> <p>(ii) Air, noise and water quality impact associated with construction and operation phases of the development have been assessed. With proper mitigation measures, such as following the dust suppression measures stipulated in the Air Pollution Control (Construction Dust) Regulation, and following the noise control requirements set out in the EPD's Environmental Protection Department's 'Recommended Pollution Control Clause for Construction Contract, no environmental impacts would be anticipated.</p> <p><u>Ecological Impact and Impact on Tai Lam Country Park</u></p> <p>(iii) According to the Study, no flora species of conservation value are identified in the site. Fauna species recorded are all common species. The Study concludes that with proper implementation of the recommended mitigation measures, such as buffer planting along the boundary of the site to minimise the indirect impacts (such as noise and glare/lighting), residual ecological impact arising from the proposed development is anticipated to be minor and acceptable. Besides, Tai Lam Country Park is about 57m from the boundary of the site (<b>Plan H-2c</b>). The proposed development will not encroach onto the Tai Lam Country Park or obstruct the entrance to MacLehose Trail. Hence, it would unlikely affect the use of nearby MacLehose Trail. AFCD has been consulted and have no adverse comments on the Study.</p> <p><u>Slope Stability</u></p> <p>(iv) A preliminary geotechnical appraisal had been carried out to</p>

Major Grounds of Comments	Responses of Government Departments
	<p>identify the man-made slopes and retaining walls which could affect or be affected by the proposed development with TTST site. The preliminary geotechnical appraisal also examined the potential natural terrain hazards for the proposed development. Further geotechnical assessment will be carried out at the detailed design stage to define the scope of necessary slope works and natural terrain hazard mitigation measures to be carried out under the project.</p>
<p>SA3(c) The maximum building height of 145mPD is unreasonable, which is more than double that of the adjacent “R(B)10” zone (70mPD).</p>	<p>(i) As mentioned in the responses to Ground A3, there is acute demand for public housing. The proposed development intensity is required to meet the demand.</p> <p>(ii) Responses (ii) to Grounds F2 and F3 above are also relevant.</p>
<p>SA3(d) It is unnecessary to provide the primary school at the site as many schools have been closed down in Tuen Mun. Demand for primary school will decline starting from 2019-2020. Geographical conditions of the site are unfavourable for school development as the altitude and gradient of the slope are too high.</p>	<p>(i) In general, EDB makes projection on the supply and demand of different types of school places having regard to the forecast growth and movement of population provided by relevant Government departments, relevant provisions in HKPSG and prevailing policies. EDB will make suitable adjustments in reserving sites for construction of schools for districts with persistent shortfall or surplus of school places.</p> <p>(ii) Response (v) to Grounds D1 to D3 and response (iv) to Ground SA3(b) above are also relevant.</p>
<p>SA3(e) The site is close to Tai Lam Country Park. The development will affect the existing habitat at the site and Tai Lam Country Park. Furthermore, the wild animals in Tai Lam Country Park may threaten the safety of future residents.</p>	<p>The matter is not related to the OZP which is to show the broad land use proposal. HD will work out detailed building layout and design of the proposed housing developments at detailed design stage taking into account relevant factors.</p>
<p>SA3(f) The development at site will block the view from MacLehose Trail. It will also block the view of the adjacent developments (i.e.</p>	<p>The VIA under the Study has examined the potential visual impact on hikers at MacLehose Trail in Tai Lam Country Park arising from</p>

Major Grounds of Comments	Responses of Government Departments
Villa Tiara).	the proposed development at TTST site. When viewed from VPs at MacLehose Trail, the proposed development would be seen as part of the existing townscape and is considered not incompatible with the existing urban context ( <b>Plan H-10c</b> ). Chief Town Planner/ Urban Design and Landscape has been consulted and has no adverse comment.
SA3(g) The site is close to high voltage pylon/power substation which will cause health hazard to the future residents in the site. No assessment has been conducted in this regard. CLP has not been consulted.	The power lines and pylons have been taken into account in the Study. The proposed housing blocks are located 36m outside the working corridor ( <b>Plan H-5c</b> ). The development shall be designed such that cables have a minimum 6.7m vertical ground clearance as required. EMSD has no adverse comment on the proposed housing development.
SA3(h) Against removal of the existing village at the site. A lot of villagers have been living in the village for many years. The proposed development will destroy the traditional way of living. Residents including elderlies will lose their home and agricultural livelihood.	<p>(i) The site is entirely on government land (GL). It is estimated under the Study that there are about 89 structures within the site (exact number affected subject to detailed survey). Given the location, avoiding such structures or acceding to the request of ‘no removal and no clearance’ will substantially affect the public housing production. If clearance of existing structures is unavoidable, the Government will offer ex-gratia allowances and/or rehousing arrangements to the eligible affected parties in accordance with prevailing policies.</p> <p>(ii) AFCD advises that the farmers affected by land resumption/ clearance are eligible to receive crop ex-gratia allowance as compensation for the loss of crops and other assistances offered by the Government through the existing mechanism.</p>
SA3(i) Details regarding relocation and compensation of the existing villagers residing in the site are yet to be provided. High administrative cost and complicated administrative procedures will be involved in handling registration of affected villagers,	Response (i) to Ground SA3(h) is relevant.

Major Grounds of Comments	Responses of Government Departments
rehousing and compensation.	
<i>Hang Fu Site (Item A4)</i>	
SA4(a) The distance between the site and the adjacent development, i.e. Nerine Cove, is only 24m. There would be loss of privacy due to overlooking from future housing residents.	Given the compact environment in Hong Kong, overlooking problem is inevitable. HD will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity.
SA4(b) The proposed development will block the sunlight to the adjacent developments, especially Nerine Cove, which does not comply with the requirements of number of hours of sunshine set out in HKPSG and the World Health Organisation. It would affect the physical and/or mental health of residents living in the adjacent developments, particularly elderly and residents with chronic illness.	<p>(i) HD will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity. In any event, the development proposal has to comply with the B(P)R which comprise regulatory requirements in ensuring provision of natural lighting and ventilation. Building separation and penetration of sunlight would be governed by the Buildings Ordinance.</p> <p>(ii) There are no requirements for number of hours of sunshine set out in the HKPSG.</p>
SA4(c) It is not cost-efficient to develop public housing at the site as the developable area will be small with inclusion of the set back from LRT track, noise mitigation measures and ancillary facilities (such as management office and carparks). The number of flats produced will be small which cannot help to address the shortage of public housing. Besides, the flat size will be small and may not comply with the design standards for public housing.	In response to the pressing demand for public housing, and with planning, infrastructure and environmental factors permitting, the Government will optimise the development potential of the land to increase the supply of public housing, taking into account the needs of existing and future residents.
SA4(d) The Government back tracked from implementing the planned GIC facilities at the representation site. It is suggested that the site could be used for provision of GIC and supporting facilities, such as library, markets, shopping mall, multi-storey community	The site is a vacant GL and is not designated for any GIC use. With regard to the facilities to be provided at the site, HD will work with the concerned Government departments to provide suitable facilities for residents, including recreation, open space, community,

Major Grounds of Comments	Responses of Government Departments
garden, sports grounds and transport facilities etc.	social welfare, educational or retail facilities in the proposed housing developments. In accordance with the established administrative procedure, HD will prepare planning brief for the proposed public housing developments to specify the detailed development parameters, GIC facilities and the amount of open space to be provided.
SA4(e) The housing development at the representation site is located 10m from the LRT track, which is not in line with HKPSG that no development within 25m from railway track is allowed. No assessment was provided to demonstrate the site is suitable for housing development and not vulnerable to environmental impact and potential risk from the adjacent LRT.	<p>(i) With regard to the potential railway noise impact, single aspect building design has been incorporated in the conceptual housing layout where no sensitive receiver will be facing the LRT track. Therefore, adverse railway noise impact to the proposed development at the site is not anticipated. Consideration could also be given to provide screening by means of building integrated noise barrier in the detailed design stage to further mitigate the potential noise impact.</p> <p>(ii) Besides, noise arisen from LRT is subject to control under the Noise Control Ordinance (Cap.400), and could be controlled through proper management and good practice.</p>
SA4(f) The proposed development will block the view from Tuen Mun River Channel. It is noted that rezoning application for Shatin Assembly of God Church was rejected by the Board as the proposed rezoning would block the view of Shing Mun River and the proposed 390 residential flats was insignificant and could not help much to address the housing demand. The current rezoning should be rejected based on the same reasons.	<p>(i) The Study has examined the potential visual impact on Wu Shan Riverside Park and Tuen Mun River Channel arising from the proposed development at Hang Fu site. The proposed development would be seen as an extension of the existing high-rise residential developments, and is considered not incompatible with the existing and planned urban context. The provision of the two NBAs in the central and southern portions of the site would break up the elongated building mass and allow some visual relief and visual permeability (<b>Plan H-10d</b>).</p> <p>(ii) The rezoning application site for Shatin Assembly of God Church is adjacent to Shing Mun River Channel. The case</p>

Major Grounds of Comments	Responses of Government Departments
	<p>was rejected based on consideration of various factors and unique site circumstances. The two cases are different and should be considered on their individual merits.</p>
<p>SA4(g) The site does not comply with the requirements set out in HKPSG, including provision of a high quality built environment commensurate with the natural setting, lowering the building height to allow views to ridgelines, avoiding linear site disposition, protection of privacy and minimising visual, noise and air quality impact.</p>	<p>(i) On the concerns about blockage of natural ridgeline and visual impact caused by the proposed housing developments, according to the VIA, BH of the proposed developments would generally not affect the natural ridgelines when viewed from some long ranged viewpoints and sensitive design of all above ground structures in terms of scale, height and bulk and appropriate building materials and colour in built structures would be used to minimise the visual impact. Also, NBAs will be incorporated in the central portion and at the southern boundary of the site to serve as air paths/ visual corridors.</p> <p>(ii) The requirement of site disposition in HKPSG recommends that sites should be divided into parcels to avoid long and linear site geometry which could likely result in single-aspect and wall development not conducive to wind movements. As mentioned in response (i) to Ground SA4(f) above, NBAs will be incorporated in the site to serve as air paths and visual corridors. It would break up the elongated building mass and allow visual relief and visual permeability. HD also advises that they will work out detailed building layout and design of the proposed housing developments at detailed design stage with a view to minimising potential impacts on the existing residential developments in the vicinity. Building separations will be provided as far as possible in accordance with the requirements set out in the B(P)R at detailed design stage by HD to minimise potential adverse air ventilation impact on the pedestrian wind environment and blockage of sunlight to adjacent development.</p>

Major Grounds of Comments	Responses of Government Departments
	(iii) With regard to the concerns about noise and air quality impact, response (ii) to Grounds A1 and A2 is relevant.
SA4(h) The proposed housing development will affect signal reception of adjacent developments. If antennae are installed at the proposed development, the health of residents will be affected.	The matter is not related to the Tuen Mun OZP which is to show the broad land use proposal.
SA4(i) Usage of lift and footbridge between Nerine Cove and Oceania Heights will be increased and security of the two residential developments has to be enhanced due to the additional pedestrian flow generated by the proposed development. Management and maintenance fee of the two residential developments will be increased. It is unfair to the residents of these two developments.	The matter is not related to the Tuen Mun OZP which is to show the broad land use proposal. Besides, future residents of Hang Fu site can use the concerned facilities, and the pedestrian crossing near Goodview Garden LRT Station to cross the road. The said footbridge and pedestrian crossing are indicated on <b>Plan H-2d</b> .
<i>Pui Oi Site (Item A5)</i>	
SA5(a) Oppose high density residential development at the site.	(i) Responses (i), (ii) and (iii) for Grounds A1 and A2 are relevant.  (ii) Response (ii) to Ground A3 is also relevant.
SA5(b) The Study conducted by CEDD fails to address the impact to the Dragon Kiln arising from the proposed housing development at Pui Oi site, which include the potential impacts from the future piling works of the proposed development, though the Kiln is 30m away from the housing boundary, and the impacts to the trees and natural landscape surrounding the Kiln. Whilst the assessment recommended a detailed geotechnical assessment and a condition survey of the Kiln before the works began, this apparently implies the Government's stance that the proposed development would have impact on the Kiln. No heritage impact assessment was conducted and the Antiquities and Monuments Office (AMO) was not consulted.	(i) The public housing site under the rezoning exercise is outside the grading boundary of the Kiln (a Grade 3 historic building). The area where the Kiln situated is zoned "Government, Institution or Community". There is no proposed amendment to the zoning of the Kiln under the current rezoning exercise.  (ii) The boundary of Pui Oi site was formulated based on the finding of the Study. With reference to the Study, preserving the Kiln in-situ retains the historic fabric of the Kiln so as to reflect the history of local ceramic industry from the 1950s to the 1970s. The proposed housing site boundary has taken into account the setting of the Kiln, including the quiet and

Major Grounds of Comments	Responses of Government Departments
SA5(c) The Antiquities Advisory Board in 2014 acknowledged that the Kiln was the only complete Dragon Kiln remaining in Hong Kong. Members raised the need for maintenance and recommended revitalisation of the kiln to connect it to the community. The proposed rezoning of about one-fifth of the surrounding GIC site for proposed high density development will significantly reduce the room for future conservation and revitalisation of the Kiln.	<p>landscaped environment presently around the Kiln. Local trees and the natural landscape surrounding the Kiln will be preserved to act as a buffer to the Kiln.</p> <p>(iii) The Government will follow Development Bureau Technical Circular (Works) No. 6 / 2009 ‘Heritage Impact Assessment (‘HIA’) Mechanism for Capital Works Projects’, established procedures and requirements for assessing heritage impact arising from the implementation of the proposed housing development. According to paragraph 9 of the Circular, the project proponent will consult AMO on whether a HIA will be required during the preparation of Technical Feasibility Statement.</p>
SA5(d) The area within the Pui Oi site near the Kiln has not been designated any use. It is obvious that it is not necessary to include the concerned area in the development site.	
SA5(e) The Government has avoided mentioning the issue on heritage preservation during public consultation. There should be more public involvement during the rezoning process. The current consultation is too late.	
SA5(f) The Government should conduct detailed geotechnical assessment and a condition survey of the Kiln before construction of public housing at the site. A conservation plan for the Kiln should be prepared based on updated existing condition and reassessed historic value. The Kiln should be revitalised for education and tourism purposes with various facilities such as museum, art centre or exhibition centre to promote ceramics, heritage, arts and culture, involving the concern groups. The Government can make reference to other countries’ experience for revitalising historic kilns.	
SA5(g) The Kiln should be retained on site and declared a monument. The Government should communicate with the concern group and formulate an ideal way to preserve the kiln.	

Major Grounds of Comments	Responses of Government Departments
SA5(h) The Government should preserve the historic Kiln and promote pottery making.	
SA5(i) The Government is investing on creative industry on one hand but reduces the resources and space for culture, art and creativity developments on the other hand.	
SA5(j) Residential development is not an excuse for destroying historic buildings. The Kiln with significant historic value should be left to our future generations.	
SA5(k) An existing welfare facility (i.e. Yau Chong Home (YCH)) within the site will have to be relocated because of the proposed housing development. It should be allowed to continue to operate continuously and the rezoning should not sacrifice the social welfare services provided to the society. Users of YCH (who are persons with intellectual disabilities) with special needs should be protected and should not be sacrificed for development or so-called public interest. The Government should not relocate YCH just for the sake of using the site for plot ratio calculation.	(i) To address the concerns as raised by the users of YCH and their family members, and the commenters on representations, various options in respect of the proposed development scheme for Pui Oi site had been explored. Having considered that the YCH is still in good condition as well as the potential impact on users and their families resulting from the relocation, YCH will be retained in-situ and excluded from the development boundary of the proposed public housing development.
SA5(l) The users of YCH took many years to establish pattern of living and close relationship with local residents. The proposed relocation site in San Po Kong is unacceptable. If relocated outside the district, connection with families, some Tuen Mun based, will also be disrupted and the users of YCH will face tremendous difficulties in adapting the new environment. The relocation proposal will affect the users psychologically. The relocation of YCH is unfair, unjust and has departed from the principle of United Nation's 'Convention on the Rights of Persons with Disabilities' and is unacceptable.	(ii) The proposed housing development may generate some nuisances and inconvenience to YCH during construction. Relevant departments will continue the dialogues with Fu Hong Society and YCH users with a view to minimizing the impacts to the YCH at the construction stage as far as possible.

Major Grounds of Comments	Responses of Government Departments
<p>SA5(m) YCH should be redeveloped or retained to continue to serve the users. It should be carved out from the housing site boundary. Since the site area of YCH is relatively small and located at the fringe of the housing site, carving out the site will not significantly affect the flat production number. In fact, the conceptual housing layout indicates that the main residential block will be at the ex-Pui Oi School.</p>	
<p>SA5(n) The Government should not relocate YCH to make way for new GIC facilities at the site.</p>	
<i>Item D2 Site</i>	
<p>SD(a) There is no need for church development. Support to rezone the site to “G/IC” but the restriction for church development only is too restrictive.</p>	<p>The proposed amendment is a technical amendment to reflect the decision of the Rural and New Town Planning Committee of the Board partially agreed a s.12A application (No. Y/TM/14) in May 2014. According to the decision of RNTPC, the site should be rezoned to an appropriate “G/IC” subzone restricting the site to allow only for church use, and including the building height, PR/GFA, SC and the amount of public open space to be provided. The proposed development restrictions for “G/IC(1)” zone are appropriate.</p>
<p>SD(b) There is surplus in open space in Tuen Mun. There is no need to reserve the site for open space use. Those open spaces should be rezoned and utilized for provision of social welfare facilities such as elderly homes. Church and elderly homes are common for joint development. The plot ratio control for the site is too low for a joint development.</p>	
<b>Proposals</b>	
<p>P(a) To retain the representation sites as “GB”, “G/IC” and “O”, or to withdraw the proposed rezoning.</p>	<p>Responses to Grounds A1, A2 and A3 are relevant.</p>

二零一七年十月十三日城市規劃委員會鄉郊及新市鎮規劃小組委員會會議記錄的摘錄

~~deferment of the application. Since the last deferment, the applicant had submitted further~~  
information including various technical assessments and photomontages/ plans to address  
departmental comments.

30. After deliberation, the Committee decided to defer a decision on the application as requested by the applicant pending the submission of further information from the applicant. The Committee agreed that the application should be submitted for its consideration within three months from the date of receipt of further information from the applicant. If the further information submitted by the applicant was not substantial and could be processed within a shorter time, the application could be submitted to an earlier meeting for the Committee's consideration. The Committee also agreed to advise the applicant that one month was allowed for preparation of the submission of the further information. Since it was the second deferment and a total of three months had been allowed for preparation of submission of further information, no further deferment would be ~~granted unless under very special circumstances.~~

### **Agenda Item 6**

[Open Meeting]

Proposed Amendments to the Approved

Tuen Mun Outline Zoning Plan No. S/TM/33

(RNTPC Paper No. 9/17)

31. The Secretary reported that the proposed amendments involved, inter alia, rezoning of five pieces of government land for public housing developments by the Housing Department (HD), which was the executive arm of the Hong Kong Housing Authority (HKHA) and rezoning of a site to take forward the decision of the Committee on a s.12A application (No. Y/TM/16) submitted by Fill Year Limited, a subsidiary of Sun Hung Kai Properties Limited (SHK). The following Members had declared interests on the item:

- Mr Raymond K.W. Lee  
*as the Director of Planning*
- being a member of the Strategic Planning Committee (SPC) and the Building Committee of the HKHA;
- Mr Martin W.C. Kwan  
*as the Chief Engineer (Works),  
Home Affairs Department*
- being an alternate member for the Director of Home Affairs who was a member of the SPC and Subsidised Housing Committee of HKHA;
- Miss Winnie W.M. Ng
- being a Director of the Kowloon Motor Bus Co. (1933) Ltd. and SHK was one of the shareholders;
- Mr Ivan C.S. Fu
- having current business dealings with SHK and AECOM and past business dealings with HKHA;
- Ms Janice W.M. Lai
- having current business dealings with HKHA, SHK and AECOM;
- Dr. C.H. Hau
- having current business dealings with HKHA and AECOM;
- Mr Alex T.H. Lai
- his firm having current business dealings with HKHA, SHK and AECOM;
- Ms Christina M. Lee
- being the Secretary-General of the Hong Kong Metropolitan Sports Events Association which had obtained sponsorship from SHK before;
- Mr H.F. Leung
- being a member of the Tender Committee of HKHA; and
- Mr Stephen L. H. Liu
- having past business dealings with HKHA and SHK.

32. The Secretary reported that according to the procedure and practice adopted by

the Town Planning Board (the Board), as the proposed amendments for public housing developments and the rezoning of a site to take forward the decision of the Committee on an approved s.12A application were the subject of amendments to the OZP by the Planning Department (PlanD), the interests of the Chairman and Members in relation to HKHA and SHK mentioned above on the item only needed to be recorded and they could stay in the meeting. The Committee agreed to this arrangement.

Presentation and Question Session

33. The following representatives from PlanD, the Civil Engineering and Development Department (CEDD) and the consultants were invited to the meeting at this point:

Planning Department

Mr David Y.M. Ng - District Planning Officer/Tuen Mun and Yuen Long West (DPO/TMYLW), PlanD

Ms Jessica Y.C. Ho  
Ms Bonnie K.C. Lee } Senior Town Planners/Tuen Mun and Yuen Long West (STPs/TMYLW), PlanD

Civil Engineering and Development Department

Mr Tony K.L. Cheung - Chief Engineer/New Territories West 3 (New Territories West) (CE/NTW3(NTW)), CEDD

Mr T.F. Lau - Senior Engineer/1 (NTW) (SE/1(NTW)), CEDD

Ms Cheryl S.Y. Cham - Engineer/15 (NTW) (E/15(NTW)), CEDD

The Consultants

Mr Tim Lee  
Mr T.L. Wan

} AECOM Asia Company Limited

34. The Chairman extended a welcome and invited the government representatives to brief Members on the Paper. With the aid of a PowerPoint presentation, Ms Jessica Y.C. Ho, STP/TMYLW, and Mr Tony K.L. Cheung, CE/NTW3 (NTW), presented the proposed amendments as detailed in the Paper and covered the following main points:

*Background of the Proposed Amendments*

- (a) to meet and expedite housing land supply in the short and medium terms, the Government had been carrying out various land use reviews on an on-going basis with a view to identifying more suitable sites for residential use;
- (b) the current proposed amendments to the Tuen Mun OZP were mainly related to the zoning amendments of six sites (all on Government land) for housing purposes, including five in Tuen Mun Central for public housing developments (Amendment Items A1 to A5) and one in Tuen Mun East for private housing development (Amendment Item B). It was estimated that the proposed housing developments in those six sites would provide a total of about 11,670 flats to accommodate about 32,100 people;
- (c) other proposed amendments included rezoning a site in Tuen Mun Area 48 from “GB” to “Government, Institution or Community” (“G/IC”) to cater for post-secondary education use; rezoning a site in Wu Shan Recreation Playground from “GB” to “Open Space” (“O”) to reflect its main use; rezoning three sites respectively in Tuen Mun Area 39, 23 and 48 to rationalise the zoning boundary; amending the OZP to reflect two s.12A applications agreed/partially agreed by the Committee; and revising the proposed road alignment between two private housing sites in Tuen Mun Area 48 and the consequential adjustments to the zoning boundary and development restrictions;

Proposed Amendments to Matters shown on the Plan

(d) Amendment Item A involved amendments to facilitate five public housing development in Tuen Mun Central and rationalisation of a zoning boundary. The amendment items were as follows:

- (i) Amendment Item A1 (about 2.33 ha) – rezoning of the Wu Shan Site from “GB” and “G/IC” to “Residential (Group A)26” (“R(A)26”) with a maximum building height (BH) of 125mPD;
- (ii) Amendment Item A2 (about 2.56 ha) – rezoning of the Kau Hui Site from “O”, “G/IC”, “Other Specified Uses” annotated “Comprehensive Industrial Development with Ancillary Commercial and Community Facilities” (“OU (Comprehensive industrial development with ancillary commercial and community facilities)”) and area shown as road to “R(A)26” with a maximum BH of 140mPD on the eastern portion and 150mPD on the western portion;
- (iii) Amendment Item A3 (about 4.24 ha) – rezoning of the Tseng Tau Sheung Tsuen South (TTST) Site from “Residential (Group B)10” (“R(B)10”) and “GB” to “R(A)26” with a maximum BH of 145mPD;
- (iv) Amendment Item A4 (about 0.67 ha) – rezoning of the Hang Fu Site from “G/IC” to “R(A)26” with a maximum BH of 100mPD;
- (v) Amendment Item A5 (about 0.67 ha) – rezoning of the Pui Oi Site from “R(A)22”, “G/IC” and “GB” to “R(A)26” with a maximum BH of 125mPD;
- (vi) Amendment Item A6 (about 240m<sup>2</sup>) – rezoning of a site to the north of Handsome Court from “G/IC” to “GB”;

- (e) Amendment Item B (about 2.46 ha) – rezoning of a site to the south of Harrow International School Hong Kong in Tuen Mun Area 48 from “GB” and “R(B)” to “R(B)20” with a maximum BH of 90mPD for private housing development;
- (f) Amendment Item C (about 0.58 ha) – rezoning of a site to the southeast of Chu Hai College of Higher Education in Tuen Mun Area 48 from “GB” to “G/IC” with maximum BH of 8 storeys;
- (g) Amendment Item D1 (about 2.75 ha) – rezoning of a site south of So Kwun Wat Road near Tuen Mun Road in Tuen Mun Area 56 from “Comprehensive Development Area” (“CDA”) to “CDA(3)” with a maximum BH of 79mPD;
- (h) Amendment Item D2 (about 1,093m<sup>2</sup>) – rezoning of a site to the east of So Kwun Wat Road near Tuen Mun Road in Tuen Mun Area 55 from “O” to “G/IC(1)” with a maximum BH of 35mPD.
- (i) Amendment Item E1 (about 2.76 ha) – rezoning of an area in the western part of Wu Shan Recreation Playground and an existing road to the south of Sun Tuen Mun Centre in Tuen Mun Area 28 from “GB” to “O”;
- (j) Amendment Item E2 (about 574m<sup>2</sup>) – rezoning of a site to the south of Tuen Hing Road in Tuen Mun Area 23 from “GB” to “OU(Electricity Substation)” with a maximum BH of 2 storeys;
- (k) Amendment Item F involved realignment of a proposed road to the south of Harrow International School Hong Kong across Tuen Mun Road in Tuen Mun Area 48 and the consequential adjustments to the zoning boundaries:
  - (i) Amendment Item F1 – rezoning of a strip of land from an area shown as ‘Road’ to “R(B)15” with a maximum BH of 70mPD;
  - (ii) Amendment Item F2 – rezoning of a strip of land from “R(B)15” to

an area shown as 'Road';

- (iii) Amendment Item F3 – rezoning of a strip of land from an area shown as 'Road' to "R(B)14" with a maximum BH of 70mPD in the south portion and 85mPD in the northern portion;
- (iv) Amendment Item F4 – rezoning of a strip of land from "R(B)14" to an area shown as 'Road'; and
- (v) Amendment Item F5 – rezoning of a site from "GB" to "R(B)" with a maximum BH of 10 storeys.

Technical Assessments

Amendment Item A

- (l) to ascertain the technical feasibility of the proposed housing sites in Tuen Mun Central, CEDD had undertaken the 'Preliminary Development Review for Housing Sites at Tuen Mun Central – Feasibility Study' (the Study) which concluded that with suitable improvement and mitigation measures, there was no insurmountable technical problem for the proposed public housing developments from air ventilation, visual and other technical aspects;
- (m) about 1,072 trees would be potentially affected by the housing developments. All of them were common tree species and no Old and Valuable Trees (OVTs) were identified within the proposed housing sites. Details of the tree compensation and preservation as well as provision of greening areas within the site would be subject to detailed design which would be in accordance with the Development Bureau Technical Circular (Works) (DEVB TC(W)) No. 7/2015;
- (n) a traffic impact assessment (TIA) had been carried out to assess the cumulative impact resulting from the five housing sites, which concluded

that with the proposed improvement works at the junctions of Hoi Wong Road/Hoi Chu Road, Castle Peak Road – Castle Peak Bay/Hin Fat Lane and Castle Peak Road – Castle Peak Bay/Tuen Hing Road, all assessed junctions would operate within capacity. In addition, improvement works to enhance pedestrian accessibility were also proposed. As for the assessed road links, the ‘volume to capacity’ ratio (V/C ratio) would be generally below 1, except those for Wong Chu Road, Tuen Mun Road and Wong Chu Road slip roads which would be between 1.0 and 1.2 indicating that the traffic condition would be manageable;

- (o) Furthermore, with the service improvement of the West Rail Line (WRL), including the increase in train frequency and the increase in number of train compartments from seven to eight, the carrying passenger capacity of WRL would be increased and capable to meet the demand arising from the proposed housing developments;
- (p) with regard to environmental and ecological impacts, a preliminary environmental review was conducted. The five housing sites would be subject to traffic noise from nearby roads. With appropriate mitigation measures, full compliance with the noise standard of the Hong Kong Planning Standards and Guidelines could be achieved;
- (q) as for ecological aspects, short-nosed fruit bat and Pallas’ Squirrel were recorded in the TTST site, while Greater Coucal was recorded in the Wu Shan site. As they were common species of Hong Kong and were highly mobile, no significant ecological impact would be anticipated;

Amendment Item B

- (r) an Air Ventilation Assessment (Expert Evaluation) commissioned by PlanD had been conducted and it was concluded that with the incorporation of mitigation measures such as setbacks, non-building areas and adoption of design principles in accordance with the Sustainable Building Design Guidelines, the rezoning was unlikely to impose significant air ventilation

impact on the surroundings;

- (s) according to the Visual Appraisal (VA) undertaken by PlanD, the proposed development was considered not incompatible with the surrounding environment and significant visual impact was not anticipated;
- (t) according to the tree survey conducted by the Lands Department (LandsD), there were about 400 trees within the site with no OVTs. As the site was located on steep slopes, clearance of existing vegetation would be required. Provision of tree preservation and landscaping requirements would be considered for incorporation in the land lease;
- (u) concerned government departments had no objection to or no adverse comment on the proposal from traffic, environmental, drainage and sewerage perspectives;

Amendment Item C

- (v) based on the VA undertaken by PlanD, the proposed 8-storey development was considered not incompatible with the locality;
- (w) according to the tree survey conducted by LandsD, there were about 120 trees within the site with no OVTs. Since the site was located on steep slopes, clearance of existing vegetation would be required. Tree preservation and compensatory planting proposals would be formulated in future development in accordance with DEVB TC(W) No. 7/2015;

Proposed Amendments to the Notes of the OZP

- (x) revision to the Remarks for “R(A)” zone to incorporate development restrictions for the “R(A)26” sub-area;
- (y) revision to the Remarks for “R(B)” zone to incorporate updated development restrictions for the “R(B)14” and “R(B)15” sub-areas, and

new development restrictions for the “R(B)20” sub-area;

- (z) revision to the Remarks for the “CDA” zone to incorporate development restrictions for the “CDA(3)” sub-area;
- (aa) incorporation of a set of new Notes specifically for the “G/IC(1)” zone in accordance with the approval of s.12A application;
- (bb) incorporation of ‘Art Studio (excluding those involving direct provision of services or goods’ as a Column 1 use in Schedule II of “Other Specified Uses” annotated “Business” and “Industrial” zones;

Departmental Consultation

- (cc) relevant government bureaux and departments consulted had no objection or no adverse comments on the proposed amendments; and

Public Consultation

- (dd) on 5.9.2017, PlanD and CEDD jointly consulted the Tuen Mun District Council (TMDC) on the proposed amendments to the OZP. TMDC raised strong objections to the proposed amendments and passed two amended motions which objected to the public housing developments at Wu Shan Site, Kau Hui Site and Hang Fu Site and all public housing sites respectively. The major concerns raised by TMDC members included insufficient existing transport infrastructures/facilities and community facilities to support additional housing developments, insufficient medical/health facilities to support additional housing developments, and the Government back tracking from implementing the planned government, institution and community (GIC) and open space at Wu Shan, Kau Hui and Hang Fu sites and proposing housing developments without sufficient consultation. The Government’s responses were detailed in paragraphs 7.1 to 7.8, 12.3 and 12.4 of the Paper. Attachment XII of the RNTPC Paper, enclosing the draft minutes of TMDC Meeting on 5.9.2017, was

tabled at the meeting for Members' reference.

35. Some Members raised the following questions:

Visual and Design Aspects

- (a) with reference to Drawing 1a of the Paper related to the Wu Shan Site, whether the grey area was hard paved or a podium and what the pink area abutting the road was;
- (b) with reference to Drawing 1d of the Paper related to the Hang Fu Site, whether the building layout could be improved to prevent a wall-like design;
- (c) the zoning and use of the land south of Hang Fu Site;
- (d) elaboration on why the visual impact arising from the five housing sites was considered not incompatible with the existing and planned urban context of Tuen Mun Central;

Traffic Aspects

- (e) what measures would be adopted to mitigate the traffic impact brought about by the proposed housing sites and the increase in population;

GIC Facilities

- (f) noting that TMDC had raised concerns on insufficient medical and health facilities to support additional housing developments, whether details on the provision of such facilities could be provided; and
- (g) the provision of sports facilities within the Tuen Mun OZP.

36. In response, Ms Jessica Y.C. Ho and Mr Tony K.L. Cheung made the following

points:

Visual and Design Aspect

- (a) the layout of the public housing sites was only preliminary at this stage subject to detailed design. The pink area within the Wu Shan Site on Drawing 1a of the Paper was a welfare cum retail block. As for the grey area, it was the ground level as the development would not have podium. Details on the landscape design would be formulated at the detailed design stage in accordance with DEVB TC(W) No. 7/2015 and with the provision of 20% to 30% greening areas within the site;
- (b) due to the narrow configuration of the site (only 30m wide x 150m in length), there were a number of site constraints for the Hang Fu Site. The conceptual layout of the Hang Fu Site was formulated taken into account the two proposed non-building areas within the site and to maximise the building separation between the site and Nerine Cove to the east. The layout of the proposed housing development at the site would be subject to detailed design;
- (c) the site south of the Hang Fu Site was zoned “R(A)22” which was for private residential use. The site had already been disposed of through land sale and detailed design was underway;
- (d) a visual impact assessment (VIA) had been conducted under the Study. While the proposed public housing development would inevitably imposed significant visual changes to the townscape, the VIA concluded that the visual composition of the proposed developments was not incompatible with the existing and planned urban context of Tuen Mun Central, which was predominantly medium- to high-rise residential developments mixed with GIC uses. With the implementation of the proposed mitigation measures, such as creation of building separations, variation of BHs, etc., it was predicted that there would be moderate visual impact;

Traffic Aspect

- (e) at present, West Rail was one of the main connections between the urban area, Tuen Mun and Northwest New Territories (NWNT). With the completion of the Shatin to Central Link to form the 'East-West Corridor' (from Tai Wai via Hung Hom connecting to the WRL) in 2019, there would be capacity for upgrading of the signal system and the hourly frequency of the WRL would be increased from 20 to 28 at each direction. Coupled with the increase in the number of train compartments from seven to eight on the WRL, the carrying capacity of the WRL would be increased by 60%. The assessment had already taken into account the planned developments, including those in Yuen Long South and Wang Chau, etc. However, with the continuous rise of population in NWNT, both WRL and the Light Rail would inevitably be more crowded. According to the 'Public Transport Strategy Study' promulgated by the Transport and Housing Bureau in June 2017, the Government would, in the longer run, study whether it would be necessary to construct a new heavy rail line connecting NWNT to urban areas;
- (f) the current population of the Tuen Mun area was about 454,000 persons. Taking account of the new population of the six housing sites (about 32,100 persons), the planned population of Tuen Mun OZP would be increased from about 543,000 to about 572,000 persons. The TIA conducted was based on the latest population estimates and concluded that, even without the proposed Tuen Mun Western Bypass in 2026, the traffic condition would still be manageable;
- (g) with regard to TMDC's concern on insufficient existing transport provision, the Study had conducted detailed survey on the public transport facilities in the Tuen Mun area, including the ridership during peak hours and explored options for new bus routes. The Transport Department would also conduct annual review on bus routes provision in the Tuen Mun district to monitor the situation. The TIA had proposed a number of bus lay-bys and transport infrastructures to cater for future public transport needs and new

and improved public transport facilities would be provided according to the implementation time frame of housing developments and the nearby transport network at the time to meet the new demand arising from the increase in population;

GIC Provision

- (h) as regards the provision of health and clinic facilities, according to the Hong Kong Planning Standards and Guidelines (HKPSG), the standard for provision of hospital beds was 5.5 beds per 1,000 persons, including all types of hospital beds (general, infirmary, psychiatric and mentally handicapped beds). Based on the planned population of the Tuen Mun OZP, a total of 3,149 hospital beds were required. Although the existing provision of hospital beds was 3,611 beds, amongst them, 1,156 beds and 520 beds were from Castle Peak Hospital and Siu Lam Hospital, which were for psychiatric and mentally handicapped. If those hospital beds were excluded, there would be a shortfall of around 1,214 beds to meet the planned population. The Hospital Authority would provide its service on cluster basis (the New Territories West (NTW) Cluster). With the provision of 300 hospital beds at the newly constructed Tin Shui Wai Hospital and its future expansion, and the reserved hospital site at Hung Shui Kiu New Development Area, it would help meet the growing healthcare demand of the population in NTW; and
- (i) at present, there were five existing sports centres, two swimming pools and three planned sports centres within the Tuen Mun OZP. While there would be a slight shortfall on the provision of sports ground/sports complex and sports centre based on the standards set out in the HKPSG to meet the planned population, LCSD would continue to monitor the situation and to identify suitable sites as appropriate. There were many small-scale sports facilities such as football pitches within the Tuen Mun area.

Rezoning Proposals Related to Five Public Housing Sites in Tuen Mun Central

37. Noting that some of the building blocks for the proposed public housing sites, such as the welfare and retail block at the Wu Shan Site, were abutting roads, a Member suggested that setbacks of building block should be considered at the detailed design stage to improve the living quality.

Proposed Amendment Items south of Harrow International School Hong Kong

38. Noting that Amendment Items B and C involved rezoning from “GB” to “R(B)20” and “G/IC” respectively, a Member enquired whether the two sides of Tuen Mun Road were urbanised. In response, Ms Jessica Y.C. Ho said that while areas south of Tuen Mun Road were largely developed, there were still undeveloped areas north of Tuen Mun Road with some areas zoned “GB” and the Tai Lam Country Park located further north.

Overall Aspects

39. Noting that a large number of trees would be affected by the proposed amendments and significant landscape impact would be induced by the rezoning of “GB” sites, a Member asked whether there was any information on the total greenery area lost due to the proposed amendments and measures to compensate for the loss. In response, Ms Jessica Y.C. Ho said that the proposed tree treatment of each site would be subject to detailed design in accordance with the DEVB TC(W) No. 7/2015 and 20% to 30% greening areas would be provided within the sites. Moreover, as there were ample surplus in district and local open spaces in the Tuen Mun area, the overall greenery in the Tuen Mun area would not be compromised.

40. The same Member was of view that the Government was promoting urban forestry and more consideration should be given to compensate for the loss of greenery area e.g. through more tree planting in district open space. This Member suggested that an account of the green area affected by the proposed amendment items should be included in future OZP amendments for Members’ reference.

41. Member then had a discussion on the suitability of the OZP for exhibition under section 5 of the Town Planning Ordinance. Members noted the densely built up environment in Tuen Mun and that TMDC had raised objection to the proposed amendments

due to concerns on insufficient transport infrastructures/facilities, community facilities, medical and health facilities to support additional housing developments as well as insufficient consultation. TMDC's views were also reflected in the minutes of the TMDC meeting held on 5.9.2017, which was tabled at the meeting. On the consideration that TMDC would be consulted again upon gazetting of the draft OZP and the Board could take into account TMDC's further views, if any, along with the representations and comments on representations received during the statutory exhibition period, before making a decision on the OZP prior to its submission to the Chief Executive in Council for approval, Members in general considered it appropriate to publish the OZP for public inspection so as to collect views from the public on the proposed amendments.

42. In response to a Member's enquiry on the consultation of the draft OZP, Ms Jessica Y.C. Ho said that in addition to consulting TMDC after exhibition of the draft OZP, PlanD's representatives would also attend local consultation forum /meeting upon request by the local community/ residents.

43. After deliberation, the Committee decided to:

- “(a) agree that the proposed amendments to the approved Tuen Mun Outline Zoning Plan (OZP) No. S/TM/33 as shown on the draft Tuen Mun OZP No. S/TM/33A at Attachment II of the Paper (to be renumbered as S/TM/34 upon exhibition) and the draft Notes at Attachment III of the Paper are suitable for exhibition for public inspection under section 5 of the Town Planning Ordinance; and
- (b) adopt the revised Explanatory Statement (ES) at Attachment IV of the Paper for the draft Tuen Mun OZP No. S/TM/33A (to be renumbered as S/TM/34) as an expression of the planning intention and objectives of the Board for various land use zones on the Plan and agree that the revised ES is suitable for exhibition together with the draft OZP.”

~~The Chairman thanked Mr David Y.M. Ng, DPO/TMYLW, Ms Jessica Y.C. Ho and Ms Bonnie K.C. Lee, STPs/TMYLW, Mr Tony K.L. Cheung, CE/NTW3(NTW), CEDD, Mr T.F. Lau, SE/1(NTW), CEDD, Ms Cheryl S.Y. Cham, E/15(NTW), CEDD and Messrs Tim Lee~~

**Extract of the Minutes of Meeting of  
Tuen Mun District Council held on 7.11.2017**

**Minutes of the 13<sup>th</sup> Meeting of  
the Tuen Mun District Council**

Date: 7 November 2017 (Tuesday)

Time: 9:30 a.m.

Venue: Tuen Mun District Council (TMDC) Conference Room

<u>Present:</u>	<u>Time of Arrival</u>	<u>Time of Departure</u>
Mr LEUNG Kin-man, BBS, MH, JP (Chairman)	9:30 a.m.	End of meeting
Mr LEE Hung-sham, Lothar, BBS, MH (Vice-chairman)	9:30 a.m.	End of meeting
Mr SO Shiu-shing	9:30 a.m.	End of meeting
Mr KWU Hon-keung	9:30 a.m.	1:47 p.m.
Mr CHU Yiu-wah	9:30 a.m.	End of meeting
Mr NG Koon-hung	9:30 a.m.	12:56 p.m.
Mr CHAN Yau-hoi, BBS, MH, JP	9:30 a.m.	End of meeting
Ms WONG Lai-sheung, Catherine	9:30 a.m.	End of meeting
Mr AU Chi-yuen	9:30 a.m.	End of meeting
Ms HO Hang-mui	9:30 a.m.	End of meeting
Mr LAM Chung-hoi	9:33 a.m.	12:33 p.m.
Mr TSUI Fan, MH	9:30 a.m.	End of meeting
Ms CHING Chi-hung	9:30 a.m.	End of meeting
Ms LUNG Shui-hing, MH	9:30 a.m.	End of meeting
Mr CHAN Man-wah, MH	9:30 a.m.	End of meeting
Mr CHAN Manwell, Leo	9:30 a.m.	End of meeting
Mr CHEUNG Hang-fai	9:30 a.m.	End of meeting
The Hon HO Kwan-yiu, JP	9:30 a.m.	12:39 p.m.
Ms CHU Shun-nga, Beatrice	9:30 a.m.	End of meeting
Mr TSANG Hin-hong	9:30 a.m.	1:25 p.m.
Ms SO Ka-man	9:30 a.m.	End of meeting
Mr KAM Man-fung	10:30 a.m.	End of meeting
Mr MO Shing-fung	9:30 a.m.	End of meeting
Mr YIP Man-pan	9:30 a.m.	End of meeting
Mr YEUNG Chi-hang	9:30 a.m.	End of meeting
Mr YAN Siu-nam	9:30 a.m.	End of meeting
Mr TAM Chun-yin	9:30 a.m.	End of meeting
Mr LAU Chun-fai, Lawrence (Secretary)	Senior Executive Officer (District Council), Tuen Mun District Office, Home Affairs Department	

Absent with Apologies:

Mr TO Shek-yuen, MH

Ms KONG Fung-yi

The Hon LAU Ip-keung, Kenneth, BBS, MH, JP

By Invitation:

Ms Carol YIP	Director of Social Welfare, Social Welfare Department
Ms CHIU Lai-chun, Kitty	Assistant District Social Welfare Officer (Tuen Mun)1, Social Welfare Department
Ms NG NG Lai-chun, Quinnie	Assistant District Social Welfare Officer (Tuen Mun)2, Social Welfare Department
Ms Avis LIU	Senior Social Security Officer (Tsuen Wan/Kwai Tsing & Tuen Mun), Social Welfare Department
Ms HO Yuen-ching, Jessica	Senior Town Planner/Tuen Mun 1, Planning Department
Ms CHAM Suet-ying, Cheryl	Senior Engineer/1 (New Territories West) (Acting), Civil Engineering and Development Department
Mr LAM Tak-keung, Barry	Senior Planning Officer (4), Housing Department
Mr KONG Tung-ming	Director, Nolan Consultants Limited
Mr YU Mong-kit	Associate, Nolan Consultants Limited

In Attendance :

Ms FUNG Ngar-wai, Aubrey	District Officer (Tuen Mun), Home Affairs Department
Ms TSUI Man-ye, Joanna	Assistant District Officer (Tuen Mun)1, Home Affairs Department
Ms CHAN Hoi-ting, Gillian	Assistant District Officer (Tuen Mun)2, Home Affairs Department
Ms YAN Yuet-han, Fion	Senior Liaison Officer (1), Tuen Mun District Office, Home Affairs Department
Mr CHAU Ka-nin, Eric	Senior Liaison Officer (2), Tuen Mun District Office, Home Affairs Department
Mr CHEUNG Ka-leung, Tony	Chief Engineer/New Territories West 3 (New Territories West), Civil Engineering and Development Department
Mr CHENG Kwok-yan, Brian	Chief School Development Officer (Tuen Mun), Education Bureau
Mr LEE Kam-ho, Edwin	District Environmental Hygiene Superintendent (Tuen Mun), Food and Environmental Hygiene Department
Ms MAK Wai-man, Tammy	District Commander (Tuen Mun), Hong Kong Police Force
Ms CHOI Sau-kuen	Police Community Relations Officer (Tuen Mun District), Hong Kong Police Force
Ms JIM Yuk-kuen	Senior Housing Manager, Tuen Mun & Yuen Long, Housing Department

Ms LEUNG Ping-chun, Joanna	District Lands Officer, Tuen Mun (Acting), Lands Department
Mr MOK Hing-cheung	Administrative Assistant, Lands (District Lands Office, Tuen Mun), Lands Department
Mr WONG Shu-yan, Francis	Chief Leisure Manager (New Territories North), Leisure and Cultural Services Department
Mr WONG Ying-ming	District Leisure Manager (Tuen Mun), Leisure and Cultural Services Department
Mr LAM Chi-man, David	District Planning Officer, Tuen Mun & Yuen Long West, Planning Department
Mr TAN Tick-yee	District Social Welfare Officer (Tuen Mun), Social Welfare Department
Mr HUE Ka-yiu, Daniel	Chief Transport Officer/New Territories North West, Transport Department
Ms YU Tsz-yan, Blanche (Assistant Secretary)	Executive Officer I (District Council)1, Tuen Mun District Office, Home Affairs Department

V. Discussion Items

(A) Consultation for Amendments in Draft Tuen Mun Outline Zoning Plan No. S/TM/34

(TMDC Paper No. 39/2017)

28. The Chairman welcomed Mr David LAM, District Planning Officer, Tuen Mun & Yuen Long West (DPO/TM&YLW), and Ms Jessica HO, Senior Town Planner/Tuen Mun 1, of the Planning Department (“PlanD”); Mr Tony CHEUNG, Chief Engineer/New Territories West 3, and Ms Cheryl CHAM, Senior Engineer/1 (New Territories West) (Acting) of the Civil Engineering and Development Department (“CEDD”); and Mr Barry LAM, Senior Planning Officer (4) of the HD, to the meeting.

29. The Chairman said it was noted that the Rural and New Town Planning Committee (“RNTPC”) of the Town Planning Board (“TPB”) had considered the proposed amendments at its meeting on 13 October 2017, and the PlanD was required to consult with the relevant stakeholders after gazetting the amendments. The TMDC had discussed in depth the amendments to the draft outline zoning plan (“OZP”) and clearly expressed its stance at the previous meeting, and the TMDC’s comments had also been forwarded to the TPB. Therefore, he would like the PlanD to keep its introduction to the current paper as brief as possible.

30. DPO/TM&YLW said the views collected at the previous meeting had been relayed truthfully to the TPB and the authority had gazetted the amendments for statutory consultation. A total of 10 700 public housing units could be provided by virtue of the amendments to address the demand for public housing in society. Understanding that housing development in existing communities might spark public concern and worry, he said the public might submit representations to the TPB within the statutory public consultation period, so that the TPB could hear comprehensive comments before making decisions on the OZP amendments.

31. Ms Jessica HO of the PlanD gave a PowerPoint presentation to introduce the amendments to the Draft Tuen Mun OZP No. S/TM/34.

32. The Chairman said the TMDC had clearly expressed its stance at the previous meeting and the relevant minutes had been sent to the TPB for reference, so he would like Members to keep their speeches as brief as possible and avoid repeating the comments they had made at the previous discussion. Moreover, he

suggested the TMDC write the TPB another letter, using the new comments made at the current meeting and the minutes of the previous meeting as the TMDC's representations about the current proposed amendments. In addition, as the current statutory public consultation period ran until 3 January 2018, other stakeholders might write to the TPB themselves during the public consultation period to express their opinions.

33. A Member said it had been suggested at the previous meeting that the PlanD consult with residents (including rural committees, Heung Yee Kuk, the relevant village representatives and so forth) thoroughly, but the department had not followed up on this and, as a result, the relevant village representatives had to submit representations to the TPB themselves without being consulted. He noted that the department had not mentioned the TMDC's opposing views when making a report to the RNTPC of the TPB. Therefore, he considered that writing again to the TPB was not much help. He reiterated that the department should consult with the relevant village representatives and villagers directly.

34. While expressing support for housing development, a Member pointed out that in previous times, new towns had been built mainly by cutting into hillsides and reclaiming land from the sea, rather than by infill development in existing communities. In his view, the department should invite members of the 18 district councils ("DC") to recommend land suitable for development for its consideration instead of consulting with the public only after working out all proposals on its own. He said this time the department had merely provided the TPB with the outcome of the TMDC motion, the draft minutes and the letter that the Chairman sent to the TPB. He suspected that the department would follow its practice even if the TMDC opposed the amendments again at the current meeting. Moreover, he reckoned that as shown in the photomontage of the area of Villa Tiara, Tuen Mun for Amendment A3, the standards in terms of, for example, building wall effect, cross ventilation, countryside landscape, noise concentration and dispersal, transport facilities, drainage arrangements and greening and conservation were not met. He hoped that the department would reconsider the TMDC's comments carefully, and that the Chairman would firmly oppose the amendments.

35. A Member said the TMDC had expressed objection to the amendments concerned at the previous meeting, but the department had gone its own way and the applications had already been gazetted, so he considered that the Government showed no respect for the TMDC's voice. He added that procedurally, as said by

the department, decisions on the amendments concerned should be made by the TPB, but he believed that the TPB would not oppose the department's proposals, so the department should withdraw the applications if it respected the TMDC's voice. He pointed out that various facilities had already been put up in such places as Villa Tiara and Area 39, or the environment of these places was actually not suitable for housing development. In his opinion, brownfield sites in Tuen Mun could be used for development, but the department chose to build housing in the above places. In addition, he doubted whether issues such as the environment, traffic and leisure space in the district had really been taken into account in the feasibility studies concerned.

36. A Member said that despite the fact that the TMDC had expressed objection to the amendments concerned at the previous meeting, the department had still proceeded to submit the rezoning proposals to the TPB and formally consulted with the TMDC again. She opined that the department had ignored the TMDC's opposing views. She stressed her support for housing development to address the needs of the existing 290 000 people who were waiting for public housing and to redress the problems caused by soaring property prices. But she suspected that the department had neither addressed the transport needs of the existing residents, nor considered how to provide community support, whether compensation would be provided after the rezoning of green belts and so forth. Moreover, 6 490 units would be built in Areas 17 and 28, but the department had given no account of what impacts this would have on existing communities, making it difficult for Members to explain to the residents concerned. As the department disregarded the impacts that the zoning would have on the existing and future new residents, the TMDC opposed this amendment again. She would like the Chairman to write to the TPB expressing clearly the TMDC's opposition to the rezoning proposals concerned.

37. A Member questioned why, after consulting with the TMDC earlier, the PlanD had not listened to the TMDC's views but still put forward the rezoning proposals to the TPB. He pointed out that the current rezoning proposals would add more than 10 000 residential units (representing about 50 000 residents) to the district, and this, together with the development plans for Area 54, San Hing Road and Hung Shui Kiu, would result in a significant increase in the population of Tuen Mun. He reckoned that confronted with the population increase in the district, the Government still had no medium-to-short term plans to tackle the problems of congestion on Tuen Mun Road, the fully-loaded Light Rail ("LR") and West Rail ("WR") systems in the district and the shortage of parking spaces. Therefore, he

hoped the department would withdraw the proposals before the TPB's endorsement.

38. A Member who had attended the above RNTPC meeting as an observer opined that the PlanD had failed to relay the TMDC's views in full to the RNTPC at the meeting, especially the views about traffic problems (e.g. the public's difficulty in taking transport at the bus stop near Goodview Garden; the mere 10-metre distance specified in the current plan despite the stipulation of the Hong Kong Planning Standards and Guidelines ("HKPSG") that housing development was not allowed in places within 25 metres of LR lines; and overcrowding on LR) and the shortage of hospital beds in the district. Besides, he noted that requirements relating to, for example, the quality of the environment around housing estates, the impacts of man-made environment, impacts on vision, noise and air, and the discouragement of construction of long, single line-shaped buildings, were set out in the guidelines on town design in the HKPSG, but the PlanD had done nothing about them at all. Besides, he noted that four buildings (including other buildings to be constructed by private developers) would be put up around Nerine Cove in Area 16, so he did not agree with the department's argument that there would be no problem.

39. A Member said the contents of the current paper provided by the PlanD were no different from what had been discussed at the previous meeting, so he wondered what purposes the discussion at the previous meeting had served. He pointed out that after the housing proposed in the amendments was built, the road traffic and flow ratio in the district would rise from 1 to 1.2, which exceeded the maximum loading capacity in terms of planning; however, the Transport Department ("TD") claimed that such congestion would be manageable, which was actually double-speak. He said many Members were dissatisfied as the PlanD consulted with the TMDC again after consulting with the TPB, and according to Order 13 of the Standing Order, unless with the consent of more than half of the Members, any issue on which a decision had been made by the TMDC should not be raised again for discussion at any meetings of the TMDC or the relevant committees within six months from the date of the decision, and any matter discussed in the previous six months should not be raised again for discussion if the TMDC had already made a clear decision on it and the proposals put forward in the new paper submitted were not much different from those in the previous paper. In view of this, he reckoned that as the contents of the current paper were not much different from those in the previous discussion paper, it should not come up again for discussion at the current meeting and could only be raised again after six months (i.e. next March) and, accordingly, that the authority should extend the public consultation on the

applications for rezoning until March next year. He requested the Secretariat to explain the arrangements concerned.

40. The Secretary responded that Order 13 of the Standing Order governed the arrangements for papers submitted by Members, whereas papers submitted by public officers were handled in accordance with Order 14 and not governed by Order 13; but when raising matters for discussion by the TMDC, they were still required to comply with the procedure set out in Order 13, i.e. giving a notification and the paper concerned to the Secretary 10 clear working days before a meeting.

41. A Member expressed disagreement with the Secretary's explanation, saying that under Order 14 of the Standing Order, with the Chairman's consent, public officers might raise matters verbally or submit papers for discussion at a TMDC meeting in accordance with the procedure set out in Order 13. It followed that public officers should also submit papers in accordance with the relevant requirement in Order 13(4).

42. A Member said that while Members had commented at the previous meeting on whether the ancillary transport and community facilities met the planning standards, the department had still submitted the rezoning proposals to the TPB and said the TPB would launch a public consultation. He pointed out that TPB members were appointed by Chief Executive and were not Tuen Mun residents, so they were not familiar with situations in the district. In his opinion, it was unreasonable if the views of the elected DC members were overridden by decisions made by appointed persons. He further said that even residents who did not live at the affected locations had expressed views on traffic and medical problems in the district to him. Therefore, he reiterated that he, while not objecting to public housing development, was against the current amendments to the draft OZP.

43. A Member opined that the Government showed no respect for the TMDC as evidenced by the fact that the comments made by Members at the previous meeting had not been accepted. She noted that 10 700 units needed to be built in the less than 11 hectares of land involved in the current proposed amendments, but disappointedly, the existing shortage of transport and medical facilities in the district had not been taken into account in the department's studies. She reiterated her firm opposition to the current paper.

44. A Member opined that despite the need for housing development, infill

development should be avoided. In her view, the five sites in question were not suitable for construction of such a large number of units. She suggested using brownfield sites in Tuen Mun and Yuen Long for housing development. She further said a site to the west of Nerine Cove had originally been designated for the provision of community facilities, but it was currently rezoned as a residential site, which would not only deprive residents of the community facilities they should have, but affect residents in Nerine Cove directly. Furthermore, she said villagers might not be offered compensation if land in Tseng Tau Tsuen was resumed for housing development. She therefore asked how the authority would rehouse these villagers at that time. On the transport front, while the department said bus stops would be built or works would be carried out to connect roads, no solutions were proposed on how to improve the external traffic (including LR, WR and Tuen Mun Road) after several tens of thousands of people were added to the population in the future. She said the comments made by Members at the previous meeting were not reflected in the current paper submitted by the department, so she believed that even if residents wrote to the TPB to voice their opinions, the amendments to the draft OZP would still be endorsed. Therefore, she reckoned that the TMDC should unanimously oppose the paper.

45. A Member pointed out that shortly after the former Chief Executive had assumed office, the authority had proposed using more than 20 sites in Tuen Mun, but eventually, the department had submitted no proposal to the TPB because the TMDC had expressed objection and informed the PlanD about the outcome of a relevant motion. She did not understand why the department still presented the paper at the current meeting despite the fact that the TMDC had expressed objection to the planning concerned at the previous meeting. She believed that even if the TMDC expressed objection to the TPB again within two months, it was not possible to change their decisions. Besides, she pointed out that 960 units in buildings would be provided on a "Green Belt" site in Area 48, and they would closely surround 39 residential houses in Palm Beach. Therefore, she did not agree that there would be no ventilation problems. She also opined that the department disregarded the TMDC's voice and the overall shortage of community facilities in the district. She said the TMDC should state clearly in writing that the PlanD should withdraw the rezoning proposals for the six sites.

46. A Member believed that after housing was completed, it would be difficult to ameliorate the building wall effect and traffic problems. Moreover, she noted that between 2008 and 2010, the TMDC had discussed and endorsed the construction of

a football pitch, a basketball court, a skateboard play area, a tai chi square and a garden in Area 17, but it turned out that the authority planned to build housing there and retain the football pitch only. She was dissatisfied with the approach taken by the authority.

47. As regards the proposed amendment on Hang Fu Street in Area 16, a Member remarked that the department should not calculate the distances from nearby buildings on the basis of the site area of 150 metres by 35 metres, and it should also take into account a nearby site of a private developer, which covered an area of 270 metres by 30 metres. He pointed out that a privacy concern could be recognised if the relevant photomontage was taken from the perspective of Nerine Cove, which was merely 24 metres away from a proposed site nearby. Besides, there would be a new population of 13 000 in Yan Tin Estate, but the traffic problems on Wong Chu Road mentioned at the previous TMDC meeting remained unsolved. He enquired how the department would solve the traffic problems.

48. A Member said it had been suggested that part of Tuen Mun River be covered or part of the typhoon shelter be filled to create land, and that temporary car parks be used for housing development. Moreover, he found it strange that the bus depot in the industrial zone was currently leased by logistics companies for storage of goods, whereas buses were kept on a piece of land at Nerine Cove.

49. The Chairman said the TMDC maintained the stance it had taken at the previous meeting, opposing the amendments currently proposed by the Government. He hoped the PlanD would relay the TMDC's views to the TPB.

50. A Member noted that three sites were rezoned from "Green Belt" to "Residential" in Amendments A1 to A5, and sites were rezoned from "Green Belt" or "Government, Institution or Community" to "Residential" in Amendments B and C. He said that currently Tuen Mun had a large population of 480 000, which would even grow to 550 000 after the population was increased, so more space was actually needed in the community. He therefore considered that the above arrangements were not ideal. Besides, he remarked that it was not unreasonable for the Chairman to give consent to the discussion on this item pursuant to Order 14 of the Standing Order; otherwise, as a consultative body, the TMDC would have had no chance to express its views. Therefore, he felt fortunate to have the chance to express strong opposition at the current meeting. Furthermore, as the statutory public consultation period for the current amendments would end on 3 January next

year, the TPB would approve the rezoning concerned if the TMDC did not express its views, so it was a good opportunity for the TMDC to make its voice heard and the TMDC should take this opportunity to express its strong opposing views to the TPB. In addition, he encouraged each resident to write a letter to the TPB to make objections, especially to Amendments A2 and A3.

51. A Member opined that the conclusion made by the Chairman was not strong enough, failing to express accurately the viewpoints of the TMDC. The Chairman had asked the PlanD to relay the TMDC's opposing views to the TPB, but as an independent body, the TMDC had already written to the TPB after the previous meeting. Therefore, it should reiterate its opposition in writing and strong wording, including the strong protest against the PlanD's disrespect for the TMDC's voice, disappointment at the department's repeated disregard for Tuen Mun residents' need for community facilities, the request for the PlanD's withdrawal of the current rezoning proposals.

52. The Chairman said he had indicated at the beginning of the discussion that another letter would be issued to the TPB to serve as the TMDC's representations about the current proposed amendments. He would also like the Secretariat to put on record the TMDC's dissatisfaction with the PlanD's disregard for its voice, its disappointment about the department's failure to respond to the views expressed by the TMDC, and the request for the department's withdrawal of the land rezoning proposals concerned.

53. A Member pointed out that according to the HKPSG, the maximum domestic plot ratio for new towns was 6, but the ratio for items A4 and A5 was 6.5. He enquired why the ratio could exceed the above cap. Moreover, he said congestion already occurred on Tuen Mun Road and asked how the authority could divert traffic if the population of the district was increased in the future. He stressed that he did not object to housing development, but worried that the existing residents and those who moved to the district in the future would suffer as the PlanD had not properly planned the relevant ancillary facilities.

54. DPO/TM&YLW gave a consolidated response to Members' comments and enquiries as follows:

- (i) The TMDC's opposition to the rezoning concerned was well noted and the TMDC's views had been truthfully relayed to the TPB. The statutory consultation launched by the TPB at the current stage served to collect

opinions for decision, so members of the public were encouraged to submit representations to the TPB before 3 January next year;

- (ii) The Government took a multi-pronged approach to land development, which involved not only the development of brownfield sites but the effective use of existing land in new towns to build more housing;
- (iii) There was an urgent need for public housing supply, and there were timetables for public housing development, so the department had to initiate statutory planning procedures to meet the timetables;
- (iv) The department had carried out assessments on transport support and earmarked space for the construction of ancillary transport facilities;
- (v) The department had raised the problem of inadequate medical facilities with the TPB. It would also follow up on the related matters with the relevant bureaux and departments and, where necessary, earmark land for the provision of the facilities concerned;
- (vi) The TPB was an independent body and the vast majority of its members were not officers of government departments. There had been cases in which the TPB disagreed with the Government's proposals;
- (vii) Discussion with the Leisure and Cultural Services Department was underway to see if facilities other than a football pitch (e.g. a basketball court, a skateboard play area and a tai chi square) could be built in Area 17; and
- (viii) The maximum domestic plot ratio was 6 according to the HKPSG. The domestic plot ratio for development sites had been set at 6 in the relevant feasibility studies, and it was assumed that the remaining 0.5 was used for the provision of commercial and welfare facilities.

55. Mr Tony CHEUNG of the CEDD gave a response to Members' comments and enquiries through a PowerPoint presentation:

- (i) For the longer future, there would be a number of major transport infrastructure projects in Tuen Mun, which included the development projects for Tuen Mun Western Bypass ("TMWB"), Route 11 and WR Tuen Mun South Extension. The Government had considered the arrangements for ancillary transport facilities in the overall development projects (including Hung Shui Kiu, Yuen Long South, Wang Chau and so forth) in Northwest New Territories. On TMWB, the authority had started the investigation study and preliminary design for the implementation of the plan. On the study project for Route 11, the authority had initiated the application for funding from the Legislative Council ("LegCo"). On WR development, it was expected that after the opening of the East-West

Corridor, the operation frequency on WR could reach 28 trains per hour in the long run, and the conversion of seven-car trains to eight-car ones could boost the carrying capacity of WR by 60%;

- (ii) For the medium-to-short future, the department had carried out an in-depth traffic impact assessment (“TIA”) and the assessment report had already been uploaded onto the TPB’s website. The future traffic conditions on the relevant major road sections in Tuen Mun (including Wong Chu Road and Tuen Mun Road) had been assessed in the study, and the conclusion was that the conditions of all the assessed road sections remained at acceptable levels;
- (iii) Traffic on a road section was relatively smooth if the vehicle/capacity ratio was 1.0; the road section was relatively busy but its traffic conditions remained at an acceptable level if the ratio was 1.2; and the department would consider taking improvement measures if the ratio exceeded 1.2;
- (iv) Even if TMWB was not yet opened in 2026, the vehicle/capacity ratio of Wong Chu Road would be close to 1.2 at that time, so its traffic conditions would remain at an acceptable level;
- (v) Besides, during the consideration of ancillary facilities for buses, the consultant had conducted statistical surveys on the volume of bus passengers. It was therefore proposed in the study that bus routes and service frequency be increased to improve traffic and transport conditions, and close contact would be made with the TD for follow-up; and
- (vi) As far as environmental impact assessment was concerned, it would be most ideal if there was no need to build residential housing within 25 metres from LR, but given the constraints imposed by the special circumstances of Hong Kong, it was proposed in the study that the problem of LR noise be mitigated and overcome through the disposition of residential housing.

56. Mr Barry Lam of the HD said the five public housing sites were still under rezoning and, when designing the public housing, the department would study the related community facilities with the relevant departments.

57. A Member said the department often claimed in its response that the conditions would be “acceptable”, but he considered the situation in Nerine Cove totally unacceptable. Furthermore, he said that the authority had no comprehensive measures for traffic improvement, as evidenced by the fact that TMWB and Route 11 (the former Route 10), which had been raised for discussion in 2007 and the 1990s respectively, were still under study.

58. A Member said that while supporting housing development, Members were much concerned about traffic problems. He suggested that only after the authority completed the planning for ancillary transport facilities in the district should the TMDC consider new rezoning proposals for sites. He believed that no Member would support housing development if the authority failed to provide ancillary transport facilities. He hoped the Chairman would clearly express the above views to the PlanD.

59. A Member pointed out that TMWB was built to link up Tuen Mun - Chek Lap Kok Link ("TM-CLKL") and Hong Kong-Shenzhen Western Corridor and, in turn, divert traffic from the future Hong Kong-Zhuhai-Macao Bridge ("HZMB"); however, Tuen Mun residents would not travel to urban districts via TMWB and TM-CLKL. For this reason, the Member considered that the CEDD's response was a straw man argument. Moreover, as the population of Hung Shui Kiu and Wang Chau would be increased significantly in the future, if the population of Tuen Mun was further increased, even further increase in WR trains could hardly be a solution. Therefore, the Member believed that the construction of a new railway was the only way to solve problems with the external transport in Tuen Mun.

60. Mr Tony CHEUNG of the CEDD said that currently in Tuen Mun, traffic was relatively busy on Wong Chu Road and its link roads. According to a TIA report, most vehicles travelling from Tuen Mun Southwest to North had to take Wong Chu Road to Tuen Mun Road, and traffic on Wong Chu Road could be reduced in the future because vehicles could be diverted after the completion of TMWB. Moreover, the Government was planning to launch the Strategic Studies on Railways and Major Roads beyond 2030 to explore whether there was a need to build a heavy railway to connect Northwest New Territories and urban districts.

61. A Member reckoned it was unfair that while both Members and government department representatives held public positions, only Members were not allowed to raise the same discussion items within six months. He opined that the Chairman should make a decision on this. Besides, he opined that the current paper submitted by the PlanD was not worthy of discussion, as there were merely more pictures in the paper but no changes in its contents. He did not understand why the department had not adopted the views offered by the TMDC at the previous meeting. Therefore, he suggested the department withdraw the paper and make amendments based on the TMDC's comments before further discussion.

62. The Chairman said DPO/TM&YLW had also sought his views through the Tuen Mun District Office (“TMDO”). As the PlanD had consulted with the TPB, the department would like to introduce the paper concerned to the TMDC again. As Members might wish to express views again, he gave consent to the discussion of this item. He reiterated that the TMDC would write the TPB another letter, which would contain the new comments made at the current meeting and the minutes of the previous meeting.

63. Regarding the procedure concerned, DPO/TM&YLW responded that for general amendments to drawings, the department would consult with the relevant DCs before submitting the rezoning proposals concerned to the TPB, so that the TPB could grasp the viewpoints of the DCs when considering the amendments to the OZPs. After the TPB agreed to formally gazette the amendments (i.e. formally launch the statutory public consultation), the department would introduce the papers concerned to the DCs again and inform them about the dates of the statutory consultation periods, so that members of the public and the DCs could submit representations to the TPB directly.

64. The Chairman asked the Secretariat to truthfully relay to the TPB the TMDC’s views on the current discussion item, including the details of the various complaints. Besides, he would like the PlanD to consider the views of the TMDC.

[Post-meeting note: The letter was issued on 28 December.]

~~65. As the next discussion item was about the 2017 Hong Kong (Tuen Mun) International Half Marathon, the Chairman declared an interest as the chairman of the organising committee for the marathon, and thus handed the chairmanship of the discussion over to the Vice-chairman.~~

[From this point, the meeting was chaired by the Vice-chairman.]

**(B) Issues Relating to Hong Kong (Tuen Mun) International Half Marathon to be Held on 17 December**  
**(TMDC Paper No. 40/2017)**

66. The Vice-chairman said the TMDC Chairman, who was also the chairman of the organising committee for the marathon in question, might remain and speak at ~~the meeting.~~

### 有關扶康會轄下柔莊之家事宜

屯門區議會於本年3月6日會議前，收到由柔莊之家遷拆關注組遞交的請願信，表示反對《屯門分區計劃大綱草圖編號S/TM/34》內有關搬遷重置扶康會轄下柔莊之家(下稱「柔莊之家」)的建議。會議上，多位議員於討論其他事項時就相關事宜發表意見，當中包括：(i)表示柔莊之家的宿友為智障人士，搬遷重置柔莊之家會令他們難以適應新的生活；(ii)指出區內僅有柔莊之家一間智障人士輔助宿舍提供20個宿位，若將之遷離屯門區會使區內缺乏相關服務；(iii)建議當局將柔莊之家從有關發展項目中剔除；以及(iv)表示屯門區議會早前亦已反對《屯門分區計劃大綱草圖編號S/TM/34》的整項擬議修訂，不單止是搬遷重置柔莊之家的建議。

經討論後，屯門區議會議決去信貴署轉達上述意見，並冀貴署向城市規劃委員會如實反映。懇請認真考慮本區議會的意見。隨函亦夾附柔莊之家遷拆關注組的信件，以供參閱。如有查詢，請與屯門區議會秘書劉振輝先生(電話：2451 3034)或屯門區議會助理秘書余芷茵女士(電話：2451 3036)聯絡。

屯門區議會主席梁健文

新界屯門屯喜路 1 號屯門政府合署 2 樓  
屯門區議會  
主席梁健文先生

梁先生：

關注：屯門扶康會轄下柔莊之家搬遷事件

我們是來自扶康會轄下屯門智障人士輔助家舍柔莊之家的舍友家人。一直以來得到香港特別行政區政府對我們家人的支援，使這社會上弱勢的一群能生活在柔莊之家，並在扶康會及社區人士適切的支持和協助下持續健康的身心發展，為社區服務，建設互相關懷的社會。

惟於 2018 年 1 月 22 日，我們收到扶康會的通知，柔莊之家的土地已被列入發展項目中，需要被政府收回和進行建屋發展計劃。據了解，城規會的鄉郊及新市鎮規劃小組委員會不理會屯門區議會的反對，於 2017 年 10 月 13 日通過同意《屯門分區計劃大綱核准圖編號 S/TM/33》的修訂項目，並且完成刊憲。根據規劃署於 2017 年 11 月 7 日提供予屯門區議會討論的文件(2017 年第 39 號)，最新的《屯門分區計劃大綱草圖編號 S/TM/34》所載的修訂中，建議前段所述的土地改劃為「住宅(甲類)26」土地，並建議將原來地段中的扶康會柔莊之家搬遷重置，連同旁邊的前基督教服務處培愛學校土地發展為住宅用途。

對於政府在完全未有諮詢土地使用者就通過相關修訂項目，我們一方面為這社會上弱少社群感無奈及徬徨，同時亦極度反對有關計劃的安排。雖知柔莊之家各舍友是一群智障人士，受著家舍和家人不同層面、不同程度的援助；同時各人都已紮根於屯門社區數十載，他們每天的生活就是在區內返工、放工、返柔莊之家繼續家舍的生活；週末也經常於家舍一帶活動，包括購買日常用品、用膳、參與社區活動等等；另外亦有部分舍友基於健康問題，長期於區內醫療中心作覆檢；而且大部分的舍友家人也居住於屯門區一帶，家舍與舍友家人有著定期的會面並保持緊密聯繫之餘，舍友也學懂如何來

第 1/2 頁

回家舍和探望家人。若然要舍友們搬離此居住的位置，他們根本無法適應，同時亦會帶給這弱勢社群人士莫大的心靈影響及創傷。

因此，我們成立柔莊之家遷拆關注組(下稱：關注組)，並特函貴會，強烈要求貴會繼續關懷屯門社區的弱勢社群，維護屯門區僅有的一間智障人士輔助家舍，以區議會名義要求政府重新修訂有關用地的規劃，將柔莊之家由有關的發展項目中剔除，以保障殘疾人士在社區內生活的權利和整體的公眾利益。

**【救救香港唯一龍窯】**

**反對屯門分區規劃大綱草圖（編號：S/TM/34）土地用途改劃**

政府早前提出於屯門區 5 幅土地改劃成高密度住宅，其中第 39 區的土地，毗鄰青山陶窯，該處為三級歷史建築（編號：N147），按古物諮詢委員會 2014 年第 166 次會議中提及：「青山陶窯是香港現存唯一完整的龍窯，於一九四〇年代仿照石灣陶窯興建，長約三十米至四十米。由於面對其他地區競爭而於八〇年代停止生產。該陶窯以往生產細小的碟、中國傳統錢罌和各款炊具等，獲建議維修，並建議將之活化」，改劃將對上述歷史建築造成深遠及不可逆轉的影響。

城規會開放公眾查閱早前收到的 4 千多份申述，公眾可於 3 月 6 日前就各申述表達意見。香港龍窯關注組現發起聯署，希望趕及截止前，向城規會表達對屯門青山陶窯的關注。

本人 / 組織同意由環保觸覺所作申述的第六點（編號：TPB/R/TM/34-543），「過去政府已多次改劃屯門區的綠化地帶及 G1C 用地作住宅，社區不斷受壓，環境犧牲甚多」，並特別就位於 A5 旁的青山陶窯（下稱：陶窯）作補充如下：（可複選）

- 【政府不負責任，忽視改劃對古蹟的影響，以及未在申請前就陶窯作評估】**  
根據土木工程拓展署於技術研究報告（Technical Assessment Report）第 8.3 節中，指出基於其象徵意義及歷史脈絡，建議原址保留陶窯。然而當局於 8.3.3 - 8.3.5 小節提及對古蹟結構可能造成的影響，卻未能令人信服。8.3.3 稱建屋的打樁工程「預料不會對 30 米外的陶窯造成直接影響」，8.3.4 稱周邊樹木及環境會保護陶窯，免受工程間接影響。8.3.5 卻建議需於建屋階段前，進行詳細土力評估及陶窯狀況調查。顯然當局認為擬議發展會對此古蹟構成影響，但從未依大綱圖所言諮詢古蹟辦，亦未有進行考古影響評估。
- 【嚴重限制陶窯將來的保育計劃】**  
古物諮詢委員會於 2014 年為評級時，與會委員認為有需要維修該陶窯，並建議將之活化，連結社區。如將鄰近陶窯的社區用地用作興建高密度住宅，將大大減少陶窯日後保育活化的空間。青山陶窯是香港唯一原址保留的陶窯，政府必須重視。
- 【大幅削減陶窯面積】**  
改劃將令陶窯面積（現屬政府、機構及社區用地）縮減達五分之一。有違當日諮詢區議會及古蹟辦決定保育的總面積，不尊重區議會及古蹟辦。

□ 【改劃過於接近陶窰所在地】

改劃的工程地盤將與陶窰非常接近，新增用地卻在設計中並無指明用途，可見根本無必要將鄰近陶窰土地（A5）包括在此計劃中，令陶窰受到不必要的威脅。

□ 【嚴重破壞原有景觀】

青山陶窰背靠綠化帶，與周邊樹木及鄉村渾然天成。改劃將令陶窰被高樓遮蔽，嚴重破壞青山公路沿路一帶的景觀以至陶窰四周原有景觀的保育。

Library 圖書館	1 district library for every 200,000 persons 每 200,000 人設一間分區圖書館	2.30	2.90	3.00	3.00	+0.70	+0.10
Sports Centre 體育中心	1 per 50,000 to 65,000 persons 每 50,000 至 65,000 人設一個	7.00	8.50	5.00	8.00	-2.00	-0.50

Type of Facilities 設施種類	Hong Kong Planning Standards and Guidelines (HKPSG) 《香港規劃標準與準則》	HKPSG Requirement (based on existing population) 《香港規劃標準與準則》的要求 (按現有人口)	HKPSG Requirement (based on planned population) <sup>1</sup> 《香港規劃標準與準則》的要求 (按規劃人口) <sup>1</sup>	Provision 供應		Surplus/ Shortfall (against existing provision) 過剩/ 短缺 (與現有供應比較)	Surplus/ Shortfall (against planned provision) 過剩/ 短缺 (與已規劃供應比較)
				Existing Provision 現有	Planned (Existing + Proposed) Provision 已規劃		
Sports Ground/ Sports Complex 運動場/運動場館	1 per 200,000 to 250,000 persons 每 200,000 至 250,000 人設一個	1.80	2.20	1.00	2.00	-0.80	-0.20
Swimming Pool Complex – standard 游泳池 – 標準池	1 complex per 287,000 persons 每 287,000 人設一間場館	1.60	1.90	2.00	2.00	+0.40	+0.10

**Remarks 備註:**

- <sup>1</sup> The planned population is about 572,500, including the population of the proposed housing development under Amendment Items A1 to A5 and Item B. 規劃人口約 572,500，包括改劃項目 A1 至 A5 和項目 B 的擬議房屋發展的人口。
- <sup>2</sup> Including the proposed 30-classroom primary school in the site of Amendment Item A3 (Tseng Tau Sheung Tsuen South Site). 包括於改劃項目 A3 (井頭上村南地盤)的一所擬議小學(30 間課室)。
- <sup>3</sup> According to HKPSG, the provision includes all types of hospital beds (i.e. general, infirmary, psychiatric and mentally handicapped beds) in both public and private sectors. 根據《香港規劃標準與準則》，供應包括公立及私立醫院的各類型病床 (即普通病床、療養病床、精神科病床和弱智人士病床)。
- <sup>4</sup> The provision includes the three hospitals within Tuen Mun OZP, including Castle Peak Hospital (CPH), Siu Lam Hospital (SLH) and Tuen Mun Hospital (TMH). If the provision in CPH and SLH is excluded (which mainly provide medical services for psychiatric patients and patients with severe intellectual disability), there will be deficit of 563 beds and 1,214 beds for existing provision and planned provision respectively. 供應包括位於屯門分區計劃大綱圖內的青山醫院、小欖醫院和屯門醫院。如果撇除青山醫院和小欖醫院的病床 (主要為精神科病人和嚴重弱智人士提供醫療服務)，現有和已規劃供應分別欠缺 563 和 1,214 張病床。
- <sup>5</sup> The provision is determined on a regional basis. 供應是按區域計算。

**Provision of GIC Facilities and Open Space in Tuen Mun District (as at July 2018)**  
**屯門區內提供的休憩用地及主要政府、機構或社區設施 (截至二零一八年七月)**

(Excluding Hung Shui Kiu and Ha Tsuen Outline Zoning Plan)
