Introduction.....

Energy efficiency and environmental protection should become more prominent nowadays.....

HK has also undertaken the commitment to minimize greenhouse gas emissions "to contribute to international efforts to stabilize greenhouse gas concentrations in the atmosphere" quote from EMSD-Study on the Potential Applications of Renewable Energy in Hong Kong.

The truth is HK's major carbon dioxide emissions mostly come from electricity generation. It is heavily increasing the internalize local and global pollution costs. In addition, the HKSAR has also set the goal advocating to increase the proportion of energy needs met from renewable sources, to help reducing reliance on imported energy or fuel, and increase the security of energy supply.

Moreover, according to EPD, "Energy consumption has been increasing over the past decades, driven by the growth in the economy. The government has put in considerable efforts to promote energy efficiency and renewable energy in order to restrain the rise in energy demand, for sustainable development of the territory."

Therefore, we deeply believe that we will not constitute the claim of undesirable precedent. In the alternative, promoting environmentally friendly and reducing pollution to HK and Global. We should respond positively to SAR's target and objective in the renewable energy aspect.
