North Point
Hong Kong

Dear Sirs,

Re: A/NE-LMH/1
Application for Permission under Section 16 of the Town Planning Ordinance for Public Utility Installation (Telecommunication Radio Base Station) and Associated Excavation of Land at Government land, near Lin Ma Hang Road, Lin Ma Hang, New Territories

We refer to the captioned S.16 Application and would like to reply the comment from DPO/N received on 28 November 2024 as follows:

The subject Radio Base Station (RBS) is proposed at the application site due to the following reasons:

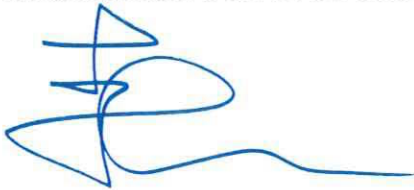

- (a) One of the main purposes of the subject RBS serving the Police to provide better signal coverage along the border area, the subject location could provide the coverage fulfilling the Police's expectation.
- (b) Nearby blockage is an essential consideration for an RBS as it will affect the signal, the area near the application site is open space, therefore it is a good location for an RBS.
- (c) The application site is adjoining to existing vehicle road under the Police's control; therefore it is easier to control and power and fiber connection could be provide easily.
- (d) The application site is formed area and would not have adverse impact to the nature environment during construction and operation.
