10. Justifications 理由

The applicant is invited to provide justifications in support of the application. Use separate sheets if necessary.
現請申請人提供申請理由及支持其申請的資料。如有需要，請另頁說明。

1. The proposed roadside equipment cabinets do not fall within the specified limitation/requirement of telecommunications radio base station, which is to install within, attach to or on the roof top of a building or structure, hence they are regarded as 'Public Utility Installation' requiring planning permission from the Town Planning Board.

2. To improve the mobile network coverage of the area along Hong Kong - Shenzhen border road starting from Mai Po Nature Reserve in Yuen Long and ends along Lin Ma Hang Road for Police Force's daily operation. This application is for the section of Lin Ma Hang.

3. The cables with total length of 2500m which are connected between the equipment cabinet are for signal transmission and reception, and the equipment (Remote Radio Unit) is wireless signal source.

4. Most of the fibre cables and leaky cables with cable tray will be laid on floor. In order not to obstruct the entrance gates along the road, 13 sections of the cable trays for laying fibre and leaky cables will be mounted underground. Therefore, excavation of land is required.

5. The proposed location is considered to be suitable for establishing the radio base station with the following reasons:

a. This is a government land without the existence of complicated ownership issue;

b. The proposed location is primarily paved road that no impacts to the existing trees/vegetation and any tree felling implication will be caused; and

c. There is sufficient available space within the Hong Kong - Shenzhen border road that we consider no alternative to be better than that.

6. We adopt a minimal design to minimize the visual impact on the environment.
