First Aid bicycles are custom made with a longer bicycle frame in order to facilitate easy usage when first aid boxes are attached to both sides of the bicycles. Since they are custom made, they would have to be securely stored during non-operational hours. Also due to their field patrol nature, they would have to be stored separately (in **Unit 2**) for hygiene reasons to avoid contamination of the treatment unit (**Unit 1**).

Custom made bicycle dimension: L1850mm x W650mm
