Current fish culture zone

Proposed electrical meter box

Possibility of a division of electricity supply from the establishment of the proposed meter box

Current (and the only) electrical meter box available for the fish culture zone

****The supply of electricity concerns the establishment of a network of electrical cables underneath sea level. An overly-dense concentration of a network in a small area will cause danger to ships sailing around the area**

Proposed alternative source of electricity that does not interfere with most of the fish farms

Current sole source of electricity that interferes with the route/space between the fish farms and the mainland
