

Comment	Response
<b>Transport Department (contact: Ken Cheung, Tel: 23996985 / Destiny Mui, Tel: 2399 2446)</b>	
<p>1. The TIA should propose the operating hours and frequency of the shuttle bus service on weekdays, weekends and during festive days (please note that special traffic arrangement and / or road closure will be implemented on Lo Wai Road on specified festive days). The proposed service level should be based on the projected passenger demand.</p>	<p>Noted. Please refer to <b>Section 5.2.5</b> in the replacement page in the updated TIA report (see attached).</p>
<p>2. All proposed details of the shuttle bus service should be included in the content of the TIA, not only the "Management Plan" or response to comments.</p>	<p>Noted. Please refer to <b>Section 5.2.5</b> in the replacement page in the updated TIA report (see attached).</p>
<p>3. As the TIA stated that the development should not induce additional transport demand on the existing public transport service and a shuttle service is proposed, the applicant should ensure adequate information dissemination such that visitors are well-informed about the shuttle arrangement. The consultant should state so in the TIA.</p>	<p>Visit-by-Appointment scheme will be implemented at the proposed columbarium development to control the number of visitors each day and to reserve shuttle service for visitors. The visitors will be informed about the shuttle service arrangement and they can make reservations during the booking process. Please refer <b>Section 5.1.1</b> in the replacement page in the updated TIA report (see attached).</p>
