Appendix I - Supplementary Information

Proposed Temporary Warehouse (Excluding Dangerous Goods Godown) with Ancillary Facilities and Associated Filling of Land for a Period of 3 Years in “Other Specified Uses” Annotated “Comprehensive Development to include Wetland Restoration Area” Zones, Lot 3719 S.H ss.1 RP (Part) in D.D. 104, Tai Sang Wai, Yuen Long, New Territories

(Application No. A/YL-NSW/345)

1. **Active Point Real Estate Investment Limited**, i.e. the applicant, is the affected business operator seeking for relocation of its existing business premises in Ngau Tam Mei. Please refer to the following further justifications in support of the application:

To facilitate the relocation of the affected premises affected by government development

- 2.1 The current application intends to facilitate the relocation of the applicant’s affected premises on various lots in D.D. 104 due to land resumption and to pave way for the development of the Ngau Tam Mei New Development Area (NTM NDA) (**Plan A1**). Details of the affected premises are enclosed at **Annex I**.
- 2.2 The affected premises falls within an area zoned “Industrial (Group D)” (“I(D)”) on the Approved Ngau Tam Mei Outline Zoning Plan (OZP) No.: S/YL-NTM/14 (**Plan A1**). Besides, the affected premises mostly situates within an area indicated as ‘Integrated Medical Teaching and Research Hospital and Third Medical School’ on the Broad Land Use Concept Plan in the development proposal of NTM NDA (**Plan A2**). As the concerned land parcel is expected to be resumed and reverted to the Government in the near future, the applicant desperately needs to identify a suitable site for relocation in order to continue the business operation.

Applicant’s effort in identifying suitable site for relocation

- 2.3 Whilst the applicant has spent effort to relocate the affected premises to a number of alternative sites in the New Territories, those sites were considered not suitable or impracticable due to various issues such as land use incompatibility, environmental concerns, land ownership issue or accessibility (**Annex II**). After a lengthy site-searching process, the application site (the Site) is identified for relocation as it is relatively flat, in close proximity to the affected premises and easily accessible.

Same applied use as the affected premises

- 2.4 The Site involves the operation of a warehouse (excluding dangerous goods godown) with ancillary facilities to support the daily operation of the proposed development. The applied use is the same as that at the affected premises. Details of the difference between the affected premises and the Site are shown at **Table 1** below:

Table 1: Difference between the affected premises and the Site

	Affected Premises (a)	The Site (b)	Difference (b) – (a)
Site Area	19,025 m ²	1,303 m ²	-17,722 m ² , -93%

- 2.5 Since the affected premises involve a relatively large scale of operation (i.e. 19,025 m²), various suitable sites have been identified to facilitate the relocation, including the subject site¹. The proposed development with 2-storey warehouse is intended to alleviate the pressing demand for indoor storage space, as well as to support the local warehouse industry.
- 2.6 The Site is also geographically close to the border area with convenient access to nearby highway networks, which help facilitate the efficient cross-border movement of goods, reduce cross-district traffic cost for goods delivery and enhance the overall supply chain.

To echo with Government’s policy on upgrading and restructuring the open storage industry

- 2.7 According to the Government’s Northern Metropolis Development Strategy, the Government intends to relocate and accommodate the affected brownfield operations (including open storage activities) by upgrading and restructuring their business premises through the provision of proper buildings for industrial uses. The proposed development would echo with the Government’s intention to consolidate brownfield operations in a more land-efficient manner.
- 2.8 The proposed development would also support the transformation of brownfield operations in the New Territories. The relocation of the open storage activities from the affected premises to the proposed warehouses at the Site will enhance storage conditions by protecting items from environmental harm, mitigate risks related to the external environment and worker safety, as well as improve overall operational efficiency.

¹ The affected business operator intends to relocate its business to other suitable sites under separate planning applications.
