#### **TABLES**

#### **NUMBER**

- 2.1 Existing junction operational performance
- 2.2 Franchised bus and GMB services operating close to the subject site
- 3.1 Internal transport facilities provided in the similar type RCHE
- 3.2 Provision of internal transport facilities for RCHE within the Proposed Development
- 3.3 Details of provision of internal transport facilities for RCHE within the Proposed Development
- 3.4 Comparison of the HKPSG recommendations and proposed internal transport facilities for Hotel within the Proposed Development
- 3.5 Internal transport facilities provided for the Proposed Development
- 4.1 2019-based TPEDM data produced by Planning Department for Kwun Tong district
- 4.2 Planned developments in the vicinity of the Proposed Development
- 4.3 Traffic generation of the Proposed Development
- 4.4 Comparison of Traffic Generation between the Approved S16 Scheme and The Proposed Development
- 4.5 Planned traffic improvement schemes in the vicinity of the Proposed Development
- 4.6 2032 junction operational performance
- 5.1 Surveyed pedestrian locations
- 5.2 In-house pedestrian generation rates
- 5.3 Pedestrian generated by the Proposed Development
- 5.4 Extract of exhibit 18-3 of the HCM 2000

# TABLES (Continued)

# <u>NUMBER</u>

- 5.5 Effective width of surveyed footpaths
- 5.6 Year 2032 LOS of footpath without and with the Proposed Development
- 5.7 Year 2032 LOS of pedestrian crossing waiting areas without and with the Proposed Development

### NUMBER

- 4.3 The ingress / egress route for traffic generated by the Proposed Development (via Wai Yip Street)
- 4.4 The ingress / egress route for traffic generated by the Proposed Development (via the Service Lane)
- 5.1 Observed existing pedestrian flows
- 5.2 Year 2032 pedestrian flows without the Proposed Development
- 5.3 Year 2032 pedestrian flows with the Proposed Development

#### 1.0 INTRODUCTION

#### Background

- 1.1 The Subject Site is located at Nos. 107 109 Wai Yip Street in Kwun Tong, which is now vacant. Figure 1.1 shows the location of the Subject Site.
- On 29<sup>th</sup> May 2020, the Town Planning Board ("TPB") approved the S16 Planning Application for Office, Shop and Services & Eating Place Uses at 107-109 Wai Yip Street (TPB ref: A/K14/780) ("Approved S16 Scheme"). The Applicant has the intention to rezone the Subject Site and construct residential care home for the elderly ("RCHE") and a hotel (together known as "Proposed Development").
- 1.3 CKM Asia Limited, a traffic and transportation planning consultancy firm, was commissioned by the Applicant, to conduct a traffic impact assessment ("TIA") in support of Proposed Development. This report describes the traffic study undertaken.

#### Scope of the Assessment

- 1.4 The main objectives of this TIA are as follows:
  - To assess the existing traffic issues in the vicinity of the subject site;
  - To quantify the traffic and pedestrians generated by the Proposed Development; and
  - To examine the traffic and pedestrian impact on the local road network in the vicinity of the subject site.

#### Contents of the Report

1.5 After this introduction, the remaining chapters contain the following:

Chapter Two - describes the existing situation;
Chapter Three - outlines the development proposal;
Chapter Four - presents the traffic impact analysis;

Chapter Five - presents the pedestrian impact analysis; and

Chapter Six - summarises the overall conclusion.

#### 2.0 THE EXISTING SITUATION

# The Subject Site

2.1 The Subject Site fronts onto Wai Yip Street to the south, and is bounded by a service lane to the north. The section of Wai Yip Street fronting the Subject Site is a dual carriageway 3-lane road.

#### Traffic Survey

- 2.2 To quantify the traffic flows at the junctions chosen for the capacity analysis, manual classified counts were conducted on Friday, 15<sup>th</sup> March 2024 during the AM and PM peak periods. The locations of the surveyed junctions are presented in Figure 2.1 and their layout is shown in Figures 2.2 to 2.11.
- 2.3 The surveyed junctions include the following:
  - J1: Hoi Bun Road / Shun Yip Street;
  - J2: Wai Yip Street / Shun Yip Street;
  - J3: Tai Yip Street / Service Lane;
  - J4: Hong Tak Road / Tai Yip Street;
  - J5: Tai Yip Street / Tai Yip Lane;
  - J6: Kwun Tong Road / Hong Tak Road;
  - J7: Wai Yip Street / Lai Yip Street;
  - J8: Kwun Tong Road / Lai Yip Street;
  - J9: Hoi Bun Road / Lai Yip Street and;
  - J10: Lai Yip Street / Hung To Road
- 2.4 The counts were classified by vehicle type to enable traffic flows in passenger car units ("pcu") to be calculated. From the survey, the AM and PM peak hours were found to be between 0845 0945 and 1730 1830 hours respectively.

#### Adjustment of the traffic flows obtained from the traffic survey

- The traffic flows obtained from the traffic surveys conducted in March 2024 were reviewed against the traffic flows of the Traffic Impact Assessment of other approved planning applications and found to be of similar order. Nevertheless, adjustment of the traffic flows obtained from the traffic survey is made based on the Annual Average Daily Traffic ("AADT") of Annual Traffic Census ("ATC") station 3020 Wai Yip Street (from Lai Yip Street to Hoi Yuen Road), in order to produce adjusted annual average traffic flows.
- 2.6 In view that the AADT is only available up to 2022, and the AADT for 2019 to 2022, are not considered due to the impact of the social events in 2019, and COVID-19 pandemic in 2020 2022, reference is made to 2018 AADT. The March 2018 AADT is around 2% lower than the average for 2018, and is shown in Photo A below.

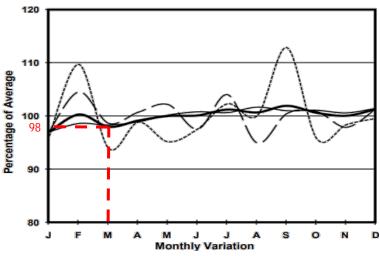

PHOTO A Monthly variable of ATC Station 3020 in 2018

Based on the above, a factor of 1.02 (i.e., (1+2%) = 1.02) is applied to the 2024 traffic flows, and the adjusted peak hour traffic flows are presented in Figure 2.12.

#### Operational Performance of the Surveyed Junctions

2.8 The existing operational performance of the surveyed junctions is calculated based on the observed traffic counts and the analysis is undertaken using the methods outlined in Volume 2 of Transport Planning and Design Manual ("TPDM"). The existing operational performance of the surveyed junctions are summarised in Table 2.1 and the detailed calculations are found in Appendix 1.

TABLE 2.1 EXISTING JUNCTION OPERATIONAL PERFORMANCE

Ref	Junction	Type of Junction	Parameter <sup>(1)</sup>	AM Peak	PM Peak
J1	Hoi Bun Road / Shun Yip Street	Signal	RC	56%	43%
J2	Wai Yip Street / Shun Yip Street	Signal	RC	66%	62%
J3	Tai Yip Street / Service Lane	Priority	RFC	0.016	0.010
J4	Hong Tak Road / Tai Yip Street	Priority	RFC	0.226	0.181
J5	Tai Yip Street / Tai Yip Lane	Priority	RFC	0.058	0.025
J6	Kwun Tong Road / Hong Tak Road	Priority	RFC	0.365	0.454
J7	Wai Yip Street / Lai Yip Street	Signal	RC	69%	87%
J8	Kwun Tong Road / Lai Yip Street	Signal	RC	58%	43%
J9	Hoi Bun Road / Lai Yip Street	Signal	RC	81%	87%
J10	Lai Yip Street / Hung To Road <sup>(2)</sup>	Signal	RC	85%	104%

Notes: (1) RC – Reserve Capacity

RFC - Ratio of Flow to Capacity

2.9 The results in Table 2.1 indicate that the junctions now operate with capacities during the AM and PM peak hours.

#### Pedestrian Facilities

2.10 There are good pedestrian facilities provided in the vicinity of the Subject Site, including footpaths, and at-grade pedestrian crossings are provided at the signalised road junctions.

#### Availability of Public Transport Facilities

2.11 The Subject Site is well-served by various types of public transport services, including road-based franchised bus and public light bus. These services operate

<sup>(2)</sup> Kerbside on-street activities are reflected in the junction performance

- along Kwun Tong Road and Wai Yip Street within 500m or about 10 minutes' walk away.
- 2.12 The Subject Site is located closest to the Ngau Tau Kok MTR Station and the nearest entrance is at Lai Yip Street, which is some 500 metres or 10 minutes' walk away.
- 2.13 Details of the road-based public transport services operating in the vicinity of the Subject Site are shown in Figure 2.13 and Table 2.2.

TABLE 2.2 FRANCHISED BUS AND GMB SERVICES OPERATING CLOSE TO THE SUBJECT SITE

Route	Routing	Frequency (minutes)
KMB 1A	Sau Mau Ping (Central) – Star Ferry	5 – 15
KMB 3D	Tsz Wan Shan (Central) – Kwun Tong (Yue Man Square)	4 – 16
KMB 5R	Kai Tak Cruise Terminal – Kwun Tong (apm) (Circular)	30

#### 3.0 THE PROPOSED DEVELOPMENT

#### **Development Parameters**

3.1 The Proposed Development has a RCHE with (i) no less than 302, but not more than 557 beds ("RCHE within the Proposed Development"), and (ii) a Hotel with 200 quest rooms ("Hotel within the Proposed Development").

# <u>Provision of Internal Transport Facilities</u> (a) RCHE within the Proposed Development

- The HKPSG has no recommendation on the provision of internal transport facilities for RCHE, hence, the parking provision for the RCHE within the Proposed Development, is provided based on the operational needs and also with reference to similar type RCHE in Kwun Tong i.e. the Buddhist Sum Ma Shui Ying Care & Attention Home for the Elderly, 8 Kung Lok Road, Kwun Tong. This RCHE is regarded as similar because of the transport characteristics, i.e., located within 0.7km from the MTR Station, and the number of beds provided.
- 3.3 The internal transport facilities of the similar RCHE is found in Table 3.1.

TABLE 3.1 INTERNAL TRANSPORT FACILITIES PROVIDED IN THE SIMILAR TYPE RCHE

No. of beds	Distance from nearest MTR Station	Parki	ng space <sup>(1)</sup>		sion rate ce /bed)
		Car	Ambulance	Car	Ambulance
266	0.7 km (Ngau Tau Kok Station)	4	1	0.0150	0.0038

<sup>(1)</sup> Based on on-site observation on the maximum occupancy of the car park

3.4 Based on the provision rate in Table 3.1, the internal transport facilities of RCHE within the Proposed Development is calculated and presented in Table 3.2.

TABLE 3.2 PROVISION OF INTERNAL TRANSPORT FACILITIES FOR RCHE WITHIN THE PROPOSED DEVELOPMENT

No. of beds	Provision for the RCHE withi	n the Proposed Development
	Car	Ambulance
557	8	1

3.5 Table 3.2 shows the provision of 8 car parking spaces and 1 ambulance parking space. In addition, 1 HGV loading/unloading bay is also provided which is for shared used with the Hotel within the Proposed Development. The details of the provision of internal transport facilities for RCHE within the Proposed Development are shown in Table 3.3.

TABLE 3.3 DETAILS OF PROVISION OF INTERNAL TRANSPORT FACILITIES FOR RCHE WITHIN THE PROPOSED DEVELOPMENT

Item	Proposed Provision	
Car Parking	8 nos. car parking spaces provided based on operational needs:	
Space	(i) 5 parking spaces @ 5m (L) x 2.5m (W) x 2.4m (H) for senior management staff of RCHE;	
	(ii) 3 parking spaces for RCHE visitors, including	
	- 2 nos. @ 5m (L) x 2.5m (W) x 2.4m (H); and	
	- 1 no accessible car parking space @ 5m (L) x 3.5m (W) x 2.4m (H)	

<u>Item</u>	Proposed Provision
Loading / Unloading Bay	1 no. Heavy Goods Vehicles loading / unloading bay @ 11.0m (L) x 3.5m (W) x 4.7m (H)are provided for shared use, i.e., for RCHE and hotel use
Ambulance lay-by	
	based on the operational needs.

#### (b) Hotel within the Proposed Development

3.6 The internal transport facilities for Hotel within the Proposed Development are provided in accordance to the recommendations of the HKPSG, and are presented in Table 3.4.

TABLE 3.4 COMPARISON OF THE HKPSG RECOMMENDATIONS AND PROPOSED INTERNAL TRANSPORT FACILITIES FOR HOTEL WITHIN THE PROPOSED DEVELOPMENT

HKPSG Recommendation for a Hotel with 200 guest rooms	Proposed Provision
Car Parking Space  1 car parking space per 100 rooms.  200/100 = 2 nos.	$\frac{2 \text{ nos.}}{(H)}$ @ 5m (L) x 2.5m (W) x 2.4m (H) = HKPSG recommendation
Motorcycle Parking Space  5 to 10% of the total provision for private cars  Minimum = 2 x 5% = 0.1, say 1 no.  Maximum = 2 x 10% = 0.2, say 1 no.	1 no. @ 2.4m (L) x 1m (W) x 2.4m (H) = HKPSG recommendation
Taxi and Private Car Layby  Minimum 2 lay-by for taxi and private cars for ≤ 299 rooms = 2 nos.	2 nos. @ 5m (L) x 2.5m (W) x 2.4m (H) = HKPSG recommendation
Single-Deck Tour Bus Layby  Minimum 1 lay-by for single-deck tour buses for ≤ 299 rooms = 1 no.	1 no. @ 12m (L) x 3.5m (W) x 3.8m (H) = HKPSG recommendation
Goods Vehicle Loading / Unloading Bay  0.5 - 1 goods vehicle bay per 100 rooms  Minimum = 200 / 100 x 0.5 = 1 no.  Maximum = 200 / 100 x 1 = 2 nos.	1 no. @ 7m (L) x 3.5m (W) x 3.6m (H) for Light Goods Vehicles  = HKPSG recommendation

3.7 With reference to Tables 3.3 and 3.4, the internal transport facilities provided are summarised in Table 3.5.

TABLE 3.5 INTERNAL TRANSPORT FACILITIES PROVIDED FOR THE PROPOSED DEVELOPMENT

Item	Use	Proposed Provision
Car Parking Space	RCHE	8
	Hotel	2
	Total	<u>10</u>
Ambulance Parking Space	RCHE	<u>1</u>
Motorcycle Parking Space	Hotel	<u>1</u>
Taxi and Private Car Layby	Hotel	<u>2</u>
Single-Deck Tour Bus Layby	Hotel	<u>1</u>
LGV Goods Vehicle Loading /	Hotel	1
Unloading Bay		
HGV Goods Vehicle Loading /	Shared use by RCHE and Hotel	1
Unloading Bay	_	
	<u>Total</u>	2

Reasons for Deviation from the HKPSG Maximum Recommendation for Hotel within the Proposed Development

- The only internal transport facility for the Hotel within the Proposed Development, which deviates from the HKPSG maximum recommendation is the provision of 1 goods vehicles loading / unloading bay, instead of 2. However, a second goods vehicle loading / unloading bay is provided which is for shared use with the RCHE within the Proposed Development.
- 3.9 The provision of an additional goods vehicle loading / unloading bay on the ground floor was considered, but not found to be possible due to:
  - (1) The Outline Development Plan no. D/K14A/1H require setback along Wai Yip Street of 2.3m, and (ii) 1.5m setback and 1.5m non-building area along the service lane and;
  - (2) With the above setback requirements, the length of the subject site (i.e. measured from Wai Yip Street to the service lane) which is only 21.3m is further reduced to only 17.5m (reduction of length of 17.8%, which is substantial).
- 3.10 After accommodating the essential facilities such as, structural columns, staircases, escalators, lift lobby and vehicle ramp to the basement car park, etc, the provision of another goods vehicle loading / unloading bay is not possible.

#### Layout Plans

- 3.11 The carpark layout plans for G/F and B1/F are found in Figures 3.1 3.2. Similar to the Approved S16 Planning Application (TPB ref: A/K14/809), two vehicular access points are provided for the Proposed Development, and these are located at:
  - (i) The service lane at the northern side of the Proposed Development
  - (ii) Wai Yip Street

#### Swept Path Analysis

3.12 The CAD-based swept path analysis program, Autodesk Vehicle Tracking, was used to check the ease of vehicle manoeuvring, and the swept path drawings of vehicle manoeuvring on the parking levels are found in in Appendix 2. Vehicles are found to have no manoeuvring problems and all vehicles could enter and leave the spaces with ease.

# Traffic Management Plan

3.13 Loading / unloading related to goods deliveries will be undertaken during the non-peak hours. The Management Office will ensure good maintenance of the turntable and should there the turntable fail to operate, the Management Office will immediately contact the turntable maintenance company to repair.

#### 4.0 TRAFFIC IMPACT

# Design Year

4.1 The Proposed Development is expected to be completed by 2029, and the design year adopted for the capacity analysis is 2032, i.e. 3 years after the completion of the development.

#### **Traffic Forecast**

4.2 The 2032 traffic flows used for the junction analysis are produced with reference to the (i) 2031 traffic flows from the Base District Traffic Model ("BDTM"); (ii) estimated traffic growth from 2031 to 2032; (iii) the planned developments in the vicinity of the Proposed Development, and (iv) additional traffic generated by the Proposed Development.

#### Estimated Traffic Growth Rate from 2031 to 2032

4.3 Reference is made to the 2019 – based Territorial Population and Employment Data Matrix ("TPEDM") data produced by Planning Department for Kwun Tong District, which are for 2019, 2026 and 2031 and are presented in Table 4.1.

TABLE 4.1 2019-BASED TPEDM DATA PRODUCED BY PLANNING DEPARTMENT FOR KWUN TONG DISTRICT

Item	TPEDN	A Estimation / Projection	
	2019	2026	2031
Population	693,900	769,400	741,300
Employment	395,350	410,550	408,250
<u>Total</u>	<u>1,089,250</u>	1,179,950	1,149,550
Average Growth%	From 2019 to 2026: +1.15% From 2019 to 2031: +0.45%	From 2026 to 2031: -0.52%	N/A

4.4 Table 4.1 shows that the highest average annual growth rate is 1.15%. In view that there is no estimation beyond 2031 and to err on the high side, the growth rate of 1.15% per annum is adopted for the traffic growth between 2031 and 2032.

# <u>Planned Developments in the Vicinity of the Proposed Development</u>

4.5 The planned developments included in the 2032 reference traffic flows are presented in Table 4.2.

TABLE 4.2 PLANNED DEVELOPMENTS IN THE VICINITY OF THE PROPOSED DEVELOPMENT

Site	Diagning Application No. / Diag No.	Address
-	Planning Application No. / Plan No.

14	A/K14/807	Kun Tong Inland Lots 1 S.A , 1 RP, 3 and 15
15	A/K14/808	201 Wai Yip Street
16	A/K14/809	1 Tai Yip Street and 111 Wai Yip Street
17	A/K14/810	5 Lai Yip Street
18	A/K14/820	73 – 75 Hung To Road
19	A/K14/822	25 Tai Yip Street, Kwun Tong
20	S/K14S/URA1/3 Urban Renewal	Areas 4 and 5 of Kwun Tong Town Centre
	Authority's (URA) latest 'Vertical City'	
	scheme of a mixed use development	
21	N/A	EKEO Lai Yip Street Development
22	N/A	Kwun Tong Action Area
23	N/A	Kowloon Bay Action Area

- 4.6 The infrastructure and road network included in the BDTM are as follows:
  - Kai Tak Development
  - Tseung Kwan O Lam Tin Tunnel
  - Central Kowloon Route
  - Trunk Road T2 between Central Kowloon Route and Tseung Kwan O Lam Tin Tunnel

# <u>Traffic Generated by the Proposed Development</u>

- 4.7 In view that the TPDM does not provide trip generation rates for RCHE, the traffic generation associated with the RCHE is estimated based in-house trip generation rates. The surveyed RCHE are:
  - (i) 266-bed RCHE known as Buddhist Sum Ma Shui Ying Care & Attention Home for the Elderly at 8 Kung Lok Road, Kwun Tong
  - (ii) 110-bed known as Little Sisters of the Poor St. Mary's Home for the Aged at 2 Welfare Road, Wong Chuk Hang
- 4.8 As for Hotel, reference is also made to in-house trip generation rates because the hotels are of similar class, number of hotel rooms and traffic characteristics, i.e. proximity to the MTR and road-based public transport services to the Hotel within the Proposed Development. The surveyed hotels are:
  - (i) 254-room Nina Hotel Kowloon East at 38 Chong Yip St, Kwun Tong
  - (ii) 298-room Tuen Mun Pentahotel at 6 Tsun Wen Road, Tuen Mun
- 4.9 To be conservative, it is assumed that the RCHE has 557 beds. The adopted trip generation rates and the calculated traffic generation associated with the Proposed Development are presented in Table 4.3.

TABLE 4.3 TRAFFIC GENERATION OF THE PROPOSED DEVELOPMENT

Item	AN	1 Peak Ho	our	PN	1 Peak Ho	our
	In	Out	2-way	In	Out	2-way
Trip Generation Rates for RCHE (pcu/hour/bed)						
In-house trip generation for RCHE	0.0188	0.0182	NA	0.0273	0.0182	NA
Trip Generation Rates for hotel (pcu/hour.	/guest roo	om)				
In-house trip generation for hotel 0.0591 0.0433 NA 0.0512 0.0472 N				NA		
Traffic Generation of Proposed Developm	ent (pcu/	hour)				
RCHE: 557 beds [a]	11	11	22	16	11	27
Hotel: 200 guest rooms [b]	12	9	21	11	10	21
Total [a] + [b]	23	<u>20</u>	<u>43</u>	<u>27</u>	<u>21</u>	<u>48</u>

4.10 Table 4.3 shows the Proposed Development generates 43 and 48 more pcu (2-way) during the AM and PM peak hours respectively.

Comparison of Traffic Generation between the Approved S16 Scheme and the Proposed Development

4.11 The Approved S16 Scheme is a commercial building with 16,656.323m<sup>2</sup> Office and 200m<sup>2</sup> GFA. The traffic generated by this Approved S16 Scheme is compared with the Proposed Development and is presented in Table 4.4.

TABLE 4.4 COMPARISON OF TRAFFIC GENERATION BETWEEN THE APPROVED S16 SCHEME AND THE PROPOSED DEVELOPMENT

Scheme		Traffi	c Genera	tion (pcu/	hour)	
	A۱	/I Peak Ho	our	P۱	/I Peak Ho	our
	In	Out	2-way	In	Out	2-way
Approved S16 Planning Application (TPB ref: A/K14/780) [A]	42	30	72	21	28	49
Proposed Development [B]	23	20	43	27	21	48
Difference [B] – [A]	<u>-19</u>	<u>-10</u>	-29	<u>6</u>	<u>-7</u>	<u>-1</u>

4.12 Table 4.4 shows that compared with the Approved S16 Scheme, the Proposed Development generates 29 pcu and 1 pcu (2-way) less during the AM and PM peak hours, respectively. It can be concluded from traffic generation aspect that compared with the Approved S16 Scheme, the Proposed Development is a better-off scheme.

#### Planned Junction Improvement Schemes

The planned junction improvement schemes found in the vicinity of the Subject Site are summarized in Table 4.5 and shown in Appendix 3.

TABLE 4.5 PLANNED TRAFFIC IMPROVEMENT SCHEMES IN THE VICINITY OF THE PROPOSED DEVELOPMENT

	Junction	Description of Work	The Project Proponent <del>s</del>	Estimated Completion Year <sup>(1)</sup>
J1	Hoi Bun Road / Shun Yip Street	The road markings are changed at Shun Yip Street Westbound and Eastbound	3	Before 2032

	Junction	Description of Work	The Project Proponent <del>s</del>	Estimated Completion Year <sup>(1)</sup>
J7	Wai Yip Street / Lai Yip Street	The road alignment is adjusted at Lai Yip Street Northbound		
J8	Kwun Tong Road / Lai Yip Street	The road alignment is adjusted at Lai Yip Street Northbound	· ·	
J9	Hoi Bun Road / Lai Yip Street	A new pedestrian crossing across Hoi Bun Road Eastbound is added and existing staggered pedestrian crossing at Lai Yip Street to be converted to straight crossing	the Lai Yip Street site	

#### 2032 Traffic Flows

4.14 Year 2032 traffic flows for the following cases are derived:

2032 without the	= 2031 traffic flows derived with reference to BDTM
Proposed	+ estimated total growth from 2031 to 2032+ Traffic
Development [A]	generated by the planned developments in the
	vicinity of the Proposed Development
2032 with the Proposed Development [B]	= [A] + traffic generated by the Proposed Development (Table 4.3)

4.15 The 2032 peak hour traffic flows for the cases without and with the Proposed Development, are shown in Figures 4.1 - 4.2, respectively. The ingress/egress vehicular routings to/from the Proposed Development via Wai Yip Street and the service lane at the northern side of the Proposed Development are shown in Figures 4.3 - 4.4.

# 2032 Junction Operational Performance

4.16 Year 2032 capacity analysis for the cases without and with the Proposed Development are summarized in Table 4.6 and detailed calculations are found in the Appendix 1.

TABLE 4.62032 JUNCTION OPERATIONAL PERFORMANCE

Ref.	Signal Junction	Type of Junction / Parameter <sup>(1)</sup>	Prop	Without the Proposed Development		n the posed opment
			AM	PM	AM	PM

Notes: (1) RC – reserve capacity

RFC – Ratio of Flow to Capacity

4.17 Table 4.6 shows that the junctions operate with capacities during the AM and PM peak hours for the cases without and with the Proposed Development.

<sup>(2)</sup> Kerbside on-street activities are reflected in the junction performance (3) Junction Improvement Scheme has been incorporated in the assessment

#### 5.0 PEDESTRIAN ASSESSMENT

#### Surveyed Pedestrian Locations

5.1 In order to quantify the existing pedestrian flows, pedestrian counts were conducted at the footpaths and waiting area of pedestrian crossing shown in Figure 5.1 during the AM and PM peak periods. The survey locations are summarized in Table 5.1.

TABLE 5.1 SURVEYED PEDESTRIAN LOCATIONS

Ref.	Location
	<u>Footpath</u>
1	Northern footpath of Wai Yip Street between Shun Yip Lane and Tai Yip Street (Eastern side)
2	Northern footpath of Wai Yip Street between Shun Yip Lane and Tai Yip Street (Western side)
3	Shun Yip Lane between Wai Yip Street and Service Lane
	Waiting area of pedestrian crossing
W1	Western pedestrian crossing of Wai Yip Street / Shun Yip Street
W2	Eastern pedestrian crossing of Wai Yip Street / Shun Yip Street

# 5.2 Existing Pedestrian Flows

The existing peak 15-minute 2-way pedestrian flows are also presented in Figure 5.1.

## Estimated growth from 2024 to 2032

5.3 The 2032 reference pedestrian flows are estimated with the reference of the existing pedestrian flows and a growth rate of 1.15% per annum which is derived from the latest TPEDM data.

#### Pedestrian Generated by the Proposed Development

5.4 The pedestrian generations associated with the RCHE and Hotel within the Proposed Development, are estimated based on in-house pedestrian rates. The in-house pedestrian rates are presented in Table 5.2, and the estimated pedestrian generation of Proposed Development is found in Table 5.3.

TABLE 5.2 IN-HOUSE PEDESTRIAN GENERATION RATES

Use	Pedestrian Generation Rates (pedestrian / 15 min / 100m²)				
	AM	Peak	PM Peak		
	In	Out	In	Out	
RCHE <sup>(1)</sup>	0.049	0.004	0.011	0.034	
Hotel <sup>(2)</sup>	0.053	0.173	0.156	0.177	

<sup>(1) 266-</sup>bed RCHE known as Buddhist Sum Ma Shui Ying Care & Attention Home for the Elderly at 8 Kung Lok Road, Kwun Tong

TABLE 5.3 PEDESTRIAN GENERATED BY THE PROPOSED DEVELOPMENT

Use	GFA (m²)	Pedestrian Generation (pedestrian / 15 min)				
		AM	Peak	PM Peak		
		In Out		In	Out	
RCHE	557 beds	28	3	7	19	

<sup>(2) 254-</sup>room Nina Hotel Kowloon East at 38 Chong Yip St, Kwun Tong

Use	GFA (m²)	Pedestrian Generation (pedestrian / 15 min)				
		AM	Peak	PM Peak		
		In Out		In	Out	
Hotel	200 rooms	11 35		32	36	
<u>Total</u>		39	38	39	<u>55</u>	

#### Year 2032 Pedestrian Flows

The 2032 pedestrian flow with and without the Proposed Development are derived using the following method:

Without the = 2024 observed pedestrian flows + growth from 2024 to 2032 + pedestrian generated by the planned developments in the vicinity of the Subject Site

With the Proposed [a] + pedestrian generated by the Proposed Development [b] = Development

5.6 The 2032 pedestrian flows without and with the Proposed Development are presented in Figures 5.2 and 5.3.

# Level-Of-Service ("LOS") Assessment

5.7 The pedestrian assessment method adopted is referenced to Exhibit 18-3 of Chapter 18 of the Highway Capacity Manual ("HCM") 2000 and the extract of Exhibit 18-3 is summarised in Table 5.4.

TABLE 5.4 EXTRACT OF EXHIBIT 18-3 OF THE HCM 2000

LOS	Space (m²/p)	Flow Rate (p/min/m)
А	> 5.6	≤ 16
В	> 3.7-5.6	> 16-23
С	> 2.2-3.7	> 23-33
D	> 1.4-2.2	> 33-49
E	> 0.75-1.4	> 49-75
F	≤ 0.75	variable

#### (a) LOS of the Footpaths

The effective width of the surveyed footpaths and the year 2032 LOS without and with the Proposed Development are presented in Table 5.5 and 5.6.

TABLE 5.5 EFFECTIVE WIDTH OF SURVEYED FOOTPATHS

Ref	Footpath width (m)	Effective width (m) <sup>(1)</sup>
1	3.5	2.5
2	2.7	1.7
3	9.8	8.8

Note:(1) The effective width does not include 0.5m dead zone on both sides, i.e. 1m

TABLE 5.6 YEAR 2032 LOS OF FOOTPATH WITHOUT AND WITH THE PROPOSED DEVELOPMENT

Ref.	Peak Period	Year 2032 without the Proposed  Development			Year 2032 with the Proposed Development		
		Flow Rate <sup>(1)</sup> LOS		Flow	Rate <sup>(1)</sup>	LOS	
		(Ped/15 min)	(Ped/min/m)		(Ped/15 min)	(Ped/ min/m)	
1	AM	350	9.3	Α	369	9.8	Α
	PM	317	8.5	Α	340	9.1	Α
2	AM	467	18.3	В	516	20.2	В
	PM	336	13.2	Α	395	15.5	Α
3	AM	969	7.3	Α	1008	7.6	Α
	PM	593	4.5	Α	640	4.8	Α

Note:  $^{(1)}$  pedestrian flow rate = pedestrian flow  $\div$  15 minutes  $\div$  effective width

5.9 Table 5.6 shows that the footpaths achieve LOS A and B during AM and PM peak for the 2032 cases without and with the Proposed Development.

#### (B) Waiting area of the pedestrian crossing

5.10 The year 2032 LOS of pedestrian crossing waiting areas without and with the Proposed Development are presented in Table 5.7.

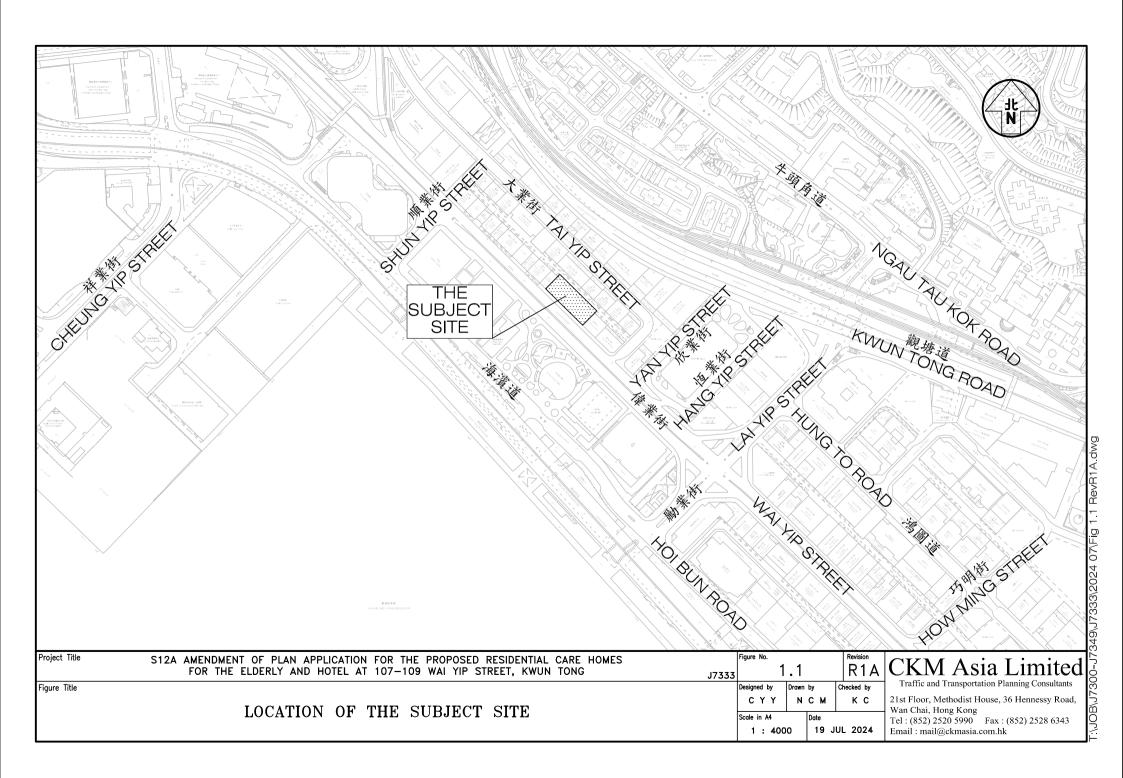

TABLE 5.7 YEAR 2032 LOS OF PEDESTRIAN CROSSING WAITING AREAS WITHOUT AND WITH THE PROPOSED DEVELOPMENT

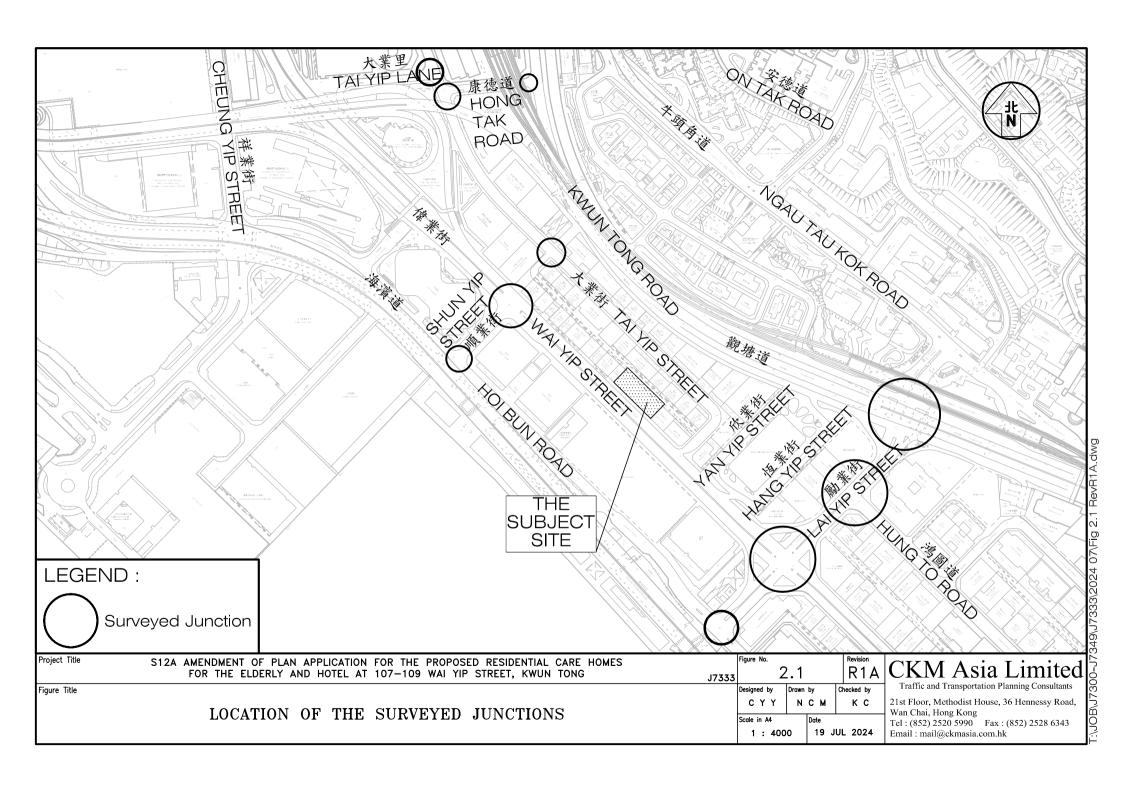

Ref	Area (m²)	Average No. of Pedestrians at the waiting area (ped/signal cycle)		Pedestrian Space (m²/ped)		LOS	
		AM	PM	AM	PM	AM	PM
			Without the	Proposed De	velopment		
W1	150	47	11	3.2	13.6	С	Α
W2	63	24	4	2.6	15.8	С	Α
	With the Proposed Development						
W1	150	48	12	3.1	12.5	С	Α
W2	63	25	5	2.5	12.6	С	Α

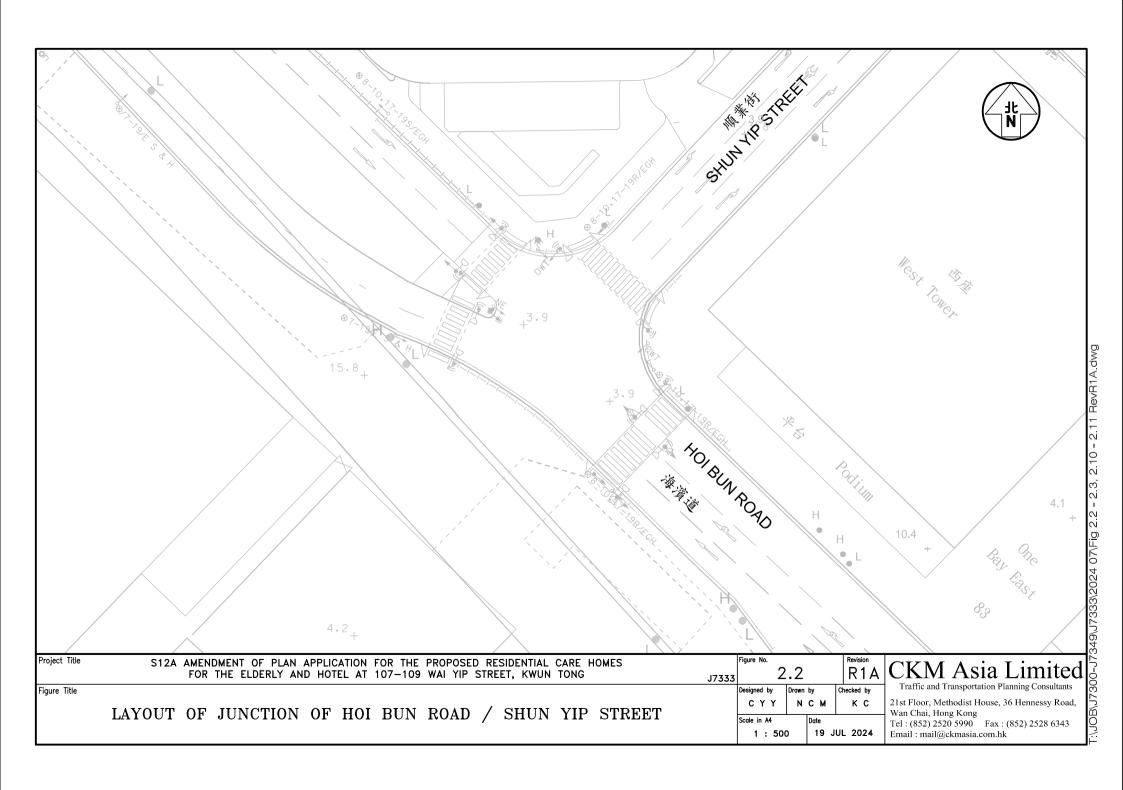

- 5.11 Table 5.7 shows that the pedestrian crossing waiting areas achieve LOS A and C during AM and PM peak for the 2032 cases without and with the Proposed Development.
- 5.12 It is noted that "In general, LOS C is desirable for most design at streets with dominant 'living' pedestrian activities". Since the LOS in Tables 5.6 and 5.7 are A to C, it can be concluded that the Proposed Development will have no adverse impact to the footpaths and pedestrian crossing waiting areas in the vicinity.

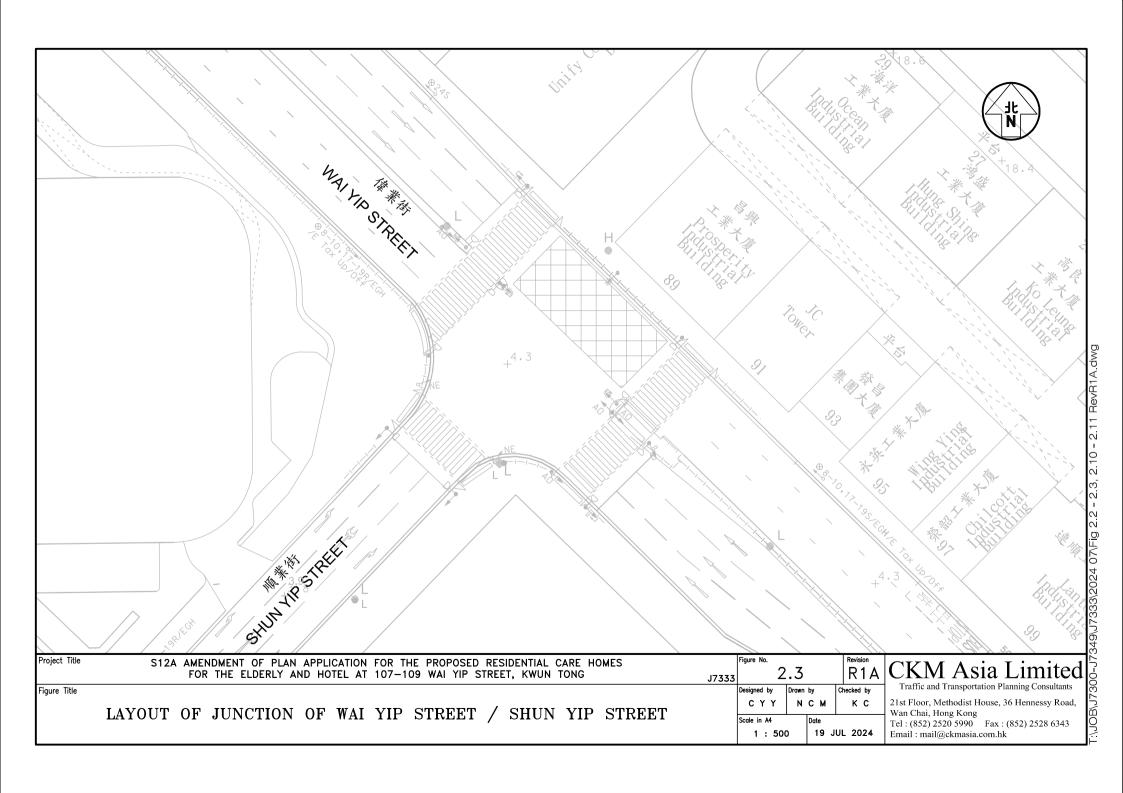

#### 6.0 CONCLUSION

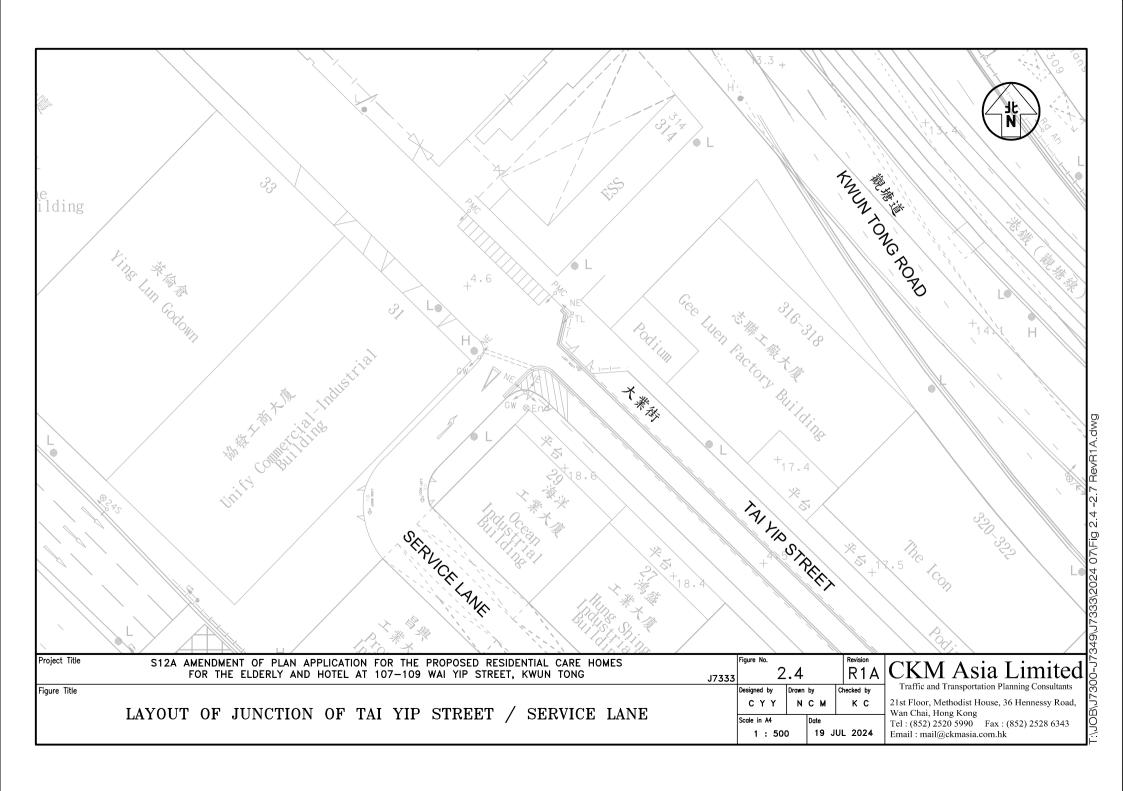

- 6.1 The Subject Site is located at Nos. 107 109 Wai Yip Street in Kwun Tong. On 29<sup>th</sup> May 2020, the TPB approved the S16 Planning Application (TPB ref: A/K14/780) for Office, Shop and Services & Eating Place Uses at the Subject Site.
- 6.2 Subsequent to the approved S16 Scheme, the Applicant has the intention to rezone the Subject Site and construct a building which comprises of a RCHE with (i) no less than 302, but not more than 557 beds and (ii) hotel with 200 rooms.
- 6.3 Manual classified counts were conducted at the junctions located in the vicinity of the Subject Site in order to establish the peak hour traffic flows. Currently, the surveyed junctions operate with capacities during the AM and PM peak hours.
- 6.4 Similar to the Approved S16 Scheme, two vehicular access points are provided for the Proposed Development, including, (i) the service lane at the northern side of the Proposed Development, and (ii) Wai Yip Street. Compared to the Approved S16 Scheme, the Proposed Development is expected to generate less traffic during the AM and PM peak hours.
- 6.5 The internal transport facilities provided for RCHE within the Proposed Development are based on the operational needs and also with reference to similar type RCHE in Kwun Tong. Those for the hotel within the Proposed Development are provided with reference to the recommendation of the HKPSG. Swept path analysis was conducted to ensure that all vehicles could enter and leave the development and the spaces provided with ease.
- 6.6 The Proposed Development is expected to be completed by 2029, and the junction capacity analysis is undertaken for year 2032. For the design year 2032, the junctions analysed are expected to operate with capacities during the peak hours for the case without and with Proposed Development.
- 6.7 The pedestrian assessment conducted found that the surveyed footpaths and waiting area of the pedestrian crossing would operate with LOS A to C in 2032 for the cases without and with the Proposed Development. Hence, it is concluded that the Proposed Development has <u>no</u> adverse impact to the footpaths and pedestrian crossing in the vicinity.
- 6.8 It is concluded that the Proposed Development will result in <u>no</u> adverse traffic impact to the surrounding road network.
