**Further Representation on Pokfulam OZP No.S/H10/22**

To: tpbpd@pland.gov.hk

Date: 2/1/2025

Further Representation Number:  
TPB/R/S/H10/22-F901

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

TPB/R/S/H10/22-F926

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

TPB/R/S/H10/22-F938

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

(7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

(7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

Further Representation Number:  
TPB/R/S/H10/22-F976

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.

**Further Representation on Pokfulam OZP No.S/H10/22**

To: tpbpd@pland.gov.hk

Date: *Jan 1, 2025*

- (1) I oppose the proposed 'U' zoning and the originally proposed zoning of 'OU', preferring that the land of 'ITEM A' be zoned Green Belt (GB) until a revised proposal is put forth for consideration.
- (2) I can't find a representation that proposed an amendment to zone the land to (U) Undetermined. The TPB's decision to rezone Item A to (U) Undetermined has no legal basis under Section 6B(8) of the Town Planning Ordinance because no representor has asked for the rezoning of Item A to (U) Undetermined.
- (3) I disagree that the 2,250 trees have no value just because they are common species. 2,250 trees are valuable regardless of how common the species are and whether or not they are registered.
- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

- (7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.

- (4) During the TPB public hearings held in early November, it was made clear that the HKU GIC proposal was flawed and included numerous unnecessary structures such as residential, restaurant and vast open spaces. If excluded, the size and scope of the proposed HKU GIC can be substantially reduced.
- (5) If the Pok Fu Lam area is deemed most suitable by the Planning Department, a perfectly sized and located RC6 area, already zoned "Residential" comprising 2.5ha, is located alongside the GB and should be considered first before any rezoning of GB takes place.
- (6) As Hong Kong faces a HK\$100 billion deficit, HKU should look for alternative more appropriate sites which can save the construction costs which are likely to be funded by public money.

(7) I strongly disagree with the Planning Department assertion that because we have educational, institutional, hospital and residential land users in Pokfulam, that this makes development of our adjacent green belt acceptable. Residents in Pokfulam area are already facing daily congested traffic condition because of the developments in Wah Fu, Queen Mary Hospital and the Cyberport. The proposed gigantic GIC development in Pokfulam will likely be the last straw that breaks the camel's back.
